Interdisciplinary Computing in Java Programming Dec 23 2019

Books on computation in the marketplace tend to discuss the topics within specific fields. Many computational algorithms, however, share common roots. Great advantages emerge if numerical methodologies break the boundaries and find their uses across disciplines.

Interdisciplinary Computing In Java Programming Language introduces readers of different backgrounds to the beauty of the selected algorithms. Serious quantitative researchers, writing customized codes for computation, enjoy cracking source codes as opposed to the black-box approach. Most C and Fortran programs, despite being slightly faster in program execution, lack built-in support for plotting and graphical user interface. This book selects Java as the platform where source codes are developed and applications are run, helping readers/users best appreciate the fun of computation. Interdisciplinary Computing In Java Programming Language is designed to meet the needs of a professional audience composed of practitioners and researchers in science and technology. This book is also suitable for senior undergraduate and graduate-level students in computer science, as a secondary text.

[Hooking Mr. Right](#) Mar 06 2021 Can a butt-ugly alley cat named Cupid bring together two people driven apart by secrets and lies? After writing a doctoral thesis that exposed fraud in the pop-psychology genre, thirty-two year old professor Althea Chandler sacrifices her professional

integrity to save her family from financial disaster. She secretly becomes best-selling romance guru Dr. Trulee Lovejoy, self-proclaimed expert on how to catch a man, even though Thea's a miserable failure when it comes to relationships -- especially those with the opposite sex. Burned by a failed marriage, Luke Bennett finds himself pursued by Dr. Lovejoy toting women after a gossip columnist dubs him New York's most eligible bachelor. When he at first mistakes Thea for one of the women out to snare him, sparks fly, but the two soon find themselves battling sparks of a less hostile nature, thanks in part to that alley cat. Luke believes he's finally found an honest woman. Unfortunately, Thea is anything but honest. She's got more secrets than the CIA and a desperate gossip columnist out to expose her. Cupid definitely has his work cut out for him.

After We Kill You, We Will Welcome You Back as Honored Guests Mar 26

2020 An unflinching account—in words and pictures—of America's longest war by our most outspoken graphic journalist Ted Rall traveled deep into Afghanistan—without embedding himself with U.S. soldiers, without insulating himself with flak jackets and armored SUVs—where no one else would go (except, of course, Afghans). He made two long trips: the first in the wake of 9/11, and the next ten years later to see what a decade of U.S. occupation had wrought. On the first trip, he shouted his dispatches into a satellite phone provided by a Los Angeles radio station, attempting to explain that the booming in the background—and sometimes the foreground—were the sounds of an all-out war that no one at home would entirely own up to. Ten years later, the alternative newspapers and radio station that had financed his first trip could no longer afford to send him into harm's way, so he turned to Kickstarter to fund a groundbreaking effort to publish online a real-time blog of graphic journalism (essentially, a nonfiction comic) documenting what was really happening on the ground, filed daily by satellite. The result of this intrepid reporting is *After We Kill You, We Will Welcome You Back as Honored Guests*—a singular account of one determined journalist's effort to bring the realities of life in twenty-first-century Afghanistan to the world in the best way he knows how: a mix of travelogue, photography, and award-winning comics.
