*Argumentative and Aggressive Communication*

Jul 29 2019 *Argumentative and Aggressive Communication: Theory, Research, and Application* is the first text to describe the development, history, research, and application efforts on the communication traits of argumentativeness and verbal aggressiveness. Authors Andrew S. Rancer and Theodore A. Avtgis include a collection of nine widely used reliable and valid instruments which the reader, the researcher, and the practitioner can use for diagnostic and research purposes.

Teaching Argument Writing, Grades 6-12 Apr 29 2022 Offers teaching strategies and resources to instruct sixth- through twelfth-graders on how to prepare and write strong arguments and

evaluate the arguments of others, providing step-by-step guidance on arguments of fact, judgment, and policy, and including advice to help students understand how judgments get made in the real world, how to develop and support criteria for an argument, and related topics.

**Prototypical Argumentative Patterns** Oct 24 2021 *Prototypical Argumentative Patterns* reports about a research project started at the University of Amsterdam in 2012. In this project distinctive argumentative patterns have been identified in argumentative discourse in the political, the legal and the medical domain. These patterns consist of constellations of argumentative moves in which, in order to deal with a particular kind of difference of opinion, in defence of a particular type of standpoint, a particular argument scheme or combination of argument schemes is used in a particular kind of argumentation structure. The composition of these prototypical argumentative patterns can

be explained by referring to the institutional characteristics of the communicative activity types in which they occur. By exploring the relationship between argumentative discourse and the institutional context, Frans van Eemeren, Bart Garssen, Corina Andone, Eveline Feteris and Francisca Snoeck Henkemans have provided a new and illuminating perspective on the context-dependency of argumentative discourse.

### **An Argumentative Analysis of the Emergence of Issues in Adult-Children Discussions**

Feb 25 2022 This book traces the issue in argumentative discussions from its emergence to its evolution. The book makes use of naturally occurred data of spoken argumentation to investigate how an issue is raised and possibly negotiated in argumentative discussions between young children (aged 2 to 6 years) and adults. The author proposes a typology of the emergence of issues based on the argumentative agency of the interlocutors.

Moreover, the investigation sheds light on how issues evolve through negotiation among the involved interlocutors and how issues may be related to the interlocutors' endoxa. By applying an interdisciplinary approach including argumentation theory (the pragma-dialectical model of a critical discussion and the Argumentum Model of Topics) as well as sociocultural developmental psychology this work allows for a careful consideration of the many aspects that come into play when young children start or engage in an argumentative discussions with adults.

*Argumentative Style* May 19 2021

*Argumentative Style* discusses the various ways in which the defence of a standpoint is given shape in argumentative discourse. In this innovative study the new notion - 'argumentative style' - introduced for this purpose is situated in the theoretical framework of the pragma-dialectical approach to argumentation. This means that the choices

involved in utilising a particular argumentative style do not only concern the presentational dimension, but also the topical selection and the audience adaptation of the strategic manoeuvring taking place in the discourse. In identifying the functional variety of the argumentative styles utilised in the political, the diplomatic, the legal, the facilitatory, the academic, and the medical domain, the point of departure is that these argumentative styles manifest themselves in the discourse in the argumentative moves that are made, the dialectical routes that are chosen and the strategic considerations that are brought to bear.

Argumentative Indicators in Discourse Mar 17

2021 This volume identifies and analyses English words and expressions that are crucial for an adequate reconstruction of argumentative discourse. It provides a systematic set of

instruments for giving a well founded analysis that results in an analytic overview of the elements that are relevant for the evaluation of the argumentation. By starting from everyday examples, the study immediately connects with the practice of argumentative discourse.

**Writing Argumentative Essays** Sep 03 2022

This brief rhetoric helps students develop strategies for critical reading, critical thinking, research, and writing that will help them argue clearly and convincingly. It teaches them to identify and develop arguments, to read and form reactions and opinions of their own, to analyze an audience, to seek common ground, and to use a wide, realistic range of techniques to write argument papers that express their individual views and original perspectives on modern issues. It includes clear explanations and examples of argument theory and reading and writing processes, research and documentation skills, and offers engaging, class-tested writing assignments and activities. 49

Essays for Analysis cover several broad issue and sub-issue areas, all of contemporary concern. Unique chapters discuss student argument styles, Rogerian argument, and argument and literature.

From Argument Schemes to Argumentative Relations in the Wild Dec 26 2021 This volume comprises a selection of contributions to the theorizing about argumentation that have been presented at the 9th conference of the International Society for the Study of Argumentation (ISSA), held in Amsterdam in July 2018. The chapters included provide a general theoretical perspective on central topics in argumentation theory, such as argument schemes and the fallacies. Some contributions concentrate on the treatment of the concept of conductive argument. Other contributions are dedicated to specific issues such as the justification of questions, the occurrence of mining relations, the role of exclamatives, argumentative abduction, eudaimonistic

argumentation and a typology of logical ways to counter an argument. In a number of cases the theoretical problems addressed are related to a specific type of context, such as the burden of proof in philosophical argumentation, the charge of committing a genetic fallacy in strategic manoeuvring in philosophy, the necessity of community argument, and connection adequacy for arguments with institutional warrants. The volume offers a great deal of diversity in its breadth of coverage of argumentation theory and wide geographic representation from North and South America to Europe and China.

### **The Quest for Argumentative Equivalence**

Sep 30 2019 What are the implications of strategic manoeuvring for the activity of the simultaneous interpreter? This is the main question addressed in *The Quest for Argumentative Equivalence*. Based on the analysis of a multilingual comparable corpus named ARGO, the book investigates political argumentation with an eye to its reformulation

by interpreters. After reporting and discussing a series of case studies illustrating interpreters' problems in the political context, the study reconstructs the prototypical argumentative patterns used by Obama, Cameron, Sarkozy and Hollande not only in a hermeneutical perspective, but also considering interpreters' need to reproduce them into a foreign language. Situated at the intersection of Argumentation Theory and Interpreting Studies, the book provides a contribution to the descriptive study of political argumentation, highlighting the presence of interpreters as a key contextual variable in political communication and deepening the study of the interlinguistic and translational implications of the act of arguing.

**Perspectives on Scientific Argumentation** Sep 10 2020 Argumentation—arriving at conclusions on a topic through a process of logical reasoning that includes debate and persuasion— has in recent years emerged as a central topic of discussion among science educators and researchers. There is now a firm and general belief that fostering argumentation in learning activities can develop students' critical thinking and reasoning skills, and that dialogic and collaborative inquiries are key precursors to an engagement in scientific argumentation. It is also reckoned that argumentation helps students assimilate knowledge and generate complex meaning. The consensus among educators is that involving

students in scientific argumentation must play a critical role in the education process itself. Recent analysis of research trends in science education indicates that argumentation is now the most prevalent research topic in the literature. This book attempts to consolidate contemporary thinking and research on the role of scientific argumentation in education. *Perspectives on Scientific Argumentation* brings together prominent scholars in the field to share the sum of their knowledge about the place of scientific argumentation in teaching and learning. Chapters explore scientific argumentation as a means of addressing and solving problems in conceptual change, reasoning, knowledge-building and the promotion of scientific literacy. Others interrogate topics such as the importance of language, discursive practice, social interactions and culture in the classroom. The material in this book, which features intervention studies, discourse analyses, classroom-based

experiments, anthropological observations, and design-based research, will inform theoretical frameworks and changing pedagogical practices as well as encourage new avenues of research. ### **Dissociation in Argumentative Discussions**

Apr 17 2021 Dissociation is a pervasive argumentative technique that can be found in argumentative discussions from all realms of public and private life. Up till now, a comprehensive and systematic argumentation theoretical study of dissociation does not exist. This book aims to fill this gap. The treatment in this book, in several respects, is innovative. To begin with, so far, dissociation has been studied mainly from a monological orientation. This book specifically focuses on dialogual aspects of the use of dissociation in argumentative discussions. In the second place, extant studies deal primarily with examples of dissociation from the philosophical and literary spheres or from the political arena. This book discusses a great variety of examples, many from every-day contexts, from such sources as newspapers, television shows, websites, Parliamentary Reports, and ordinary conversations. Last, but

not least, the present book examines a broad range of features of dissociation. The first part of the book clarifies the notion of dissociation and provides insight into the way in which dissociation becomes manifest in argumentative discourse. The second part of the book, using the theoretical perspective of Pragma-Dialectics, answers the question how dissociation is used by the participants in argumentative discussions to realize their dialectical and rhetorical aims. The third and last part of the book discusses the strengths and weaknesses of the use of dissociation in argumentative discussions, both with regard to its dialectical soundness and to its persuasive effectiveness.

**A Course in Argumentative Writing** Apr 05 2020

The Argumentative Turn in Policy Analysis Aug 10 2020 This book describes argumentative tools and strategies that can be used to guide policy decisions under conditions of great uncertainty. Contributing authors explore methods from

philosophical analysis and in particular argumentation analysis, showing how it can be used to systematize discussions about policy issues involving great uncertainty. The first part of the work explores how to deal in a systematic way with decision-making when there may be plural perspectives on the decision problem, along with unknown consequences of what we do. Readers will see how argumentation tools can be used for prioritizing among uncertain dangers, for determining how decisions should be framed, for choosing a suitable time frame for a decision, and for systematically choosing among different decision options. Case studies are presented in the second part of the book, showing argumentation in practice in the areas of climate geoengineering, water governance, synthetic biology, nuclear waste, and financial markets. In one example, argumentation analysis is applied to proposals to solve the climate problem with various technological manipulations of the natural climate system,

such as massive dispersion of reflective aerosols into the stratosphere. Even after a thorough investigation of such a proposal, doubt remains as to whether all the potential risks have been identified. In such discussions, conventional risk analysis does not have much to contribute since it presupposes that the risks have been identified, whereas the argumentative approach to uncertainty management can be used to systematize discussions.

coworkers, colleagues, customers, vendors, constituents, etc. Which is why the skill is important enough to be tested nationwide. Great for school, these 6 laminated pages can last to support the process of persuasion for a lifetime. 6-page laminated guide includes: Understanding Argument & the Writing process Logic in Argument Six Evidences of a Good Argument Types of Arguments What an Argument Requires Arguable Issues Reading Argumentative Materials Writing Your Own Argument Critical Thinking Prompts Purpose & Parts of an Argument Types of Claims Types of Evidence Types of Fallacies Questions for Reading/Writing an Argument Writing the Argumentative Essay Understanding the Audience Research Model Essay Outline Sample Essay *Strategic Maneuvering in Argumentative Discourse* May 07 2020 In *Strategic Maneuvering in Argumentative Discourse*, Frans H. van Eemeren brings together the dialectical and the rhetorical dimensions of argumentation

by introducing the concept of strategic maneuvering. Strategic maneuvering refers to the arguer's continual efforts to reconcile aiming for effectiveness with being reasonable. It takes place in all stages of argumentative discourse and manifests itself simultaneously in the choices that are made from the topical potential available at a particular stage, in adaptation to audience demand, and in the use of specific presentational devices. Strategic maneuvering derails when in the specific context in which the discourse takes place a rule for critical discussion has been violated, so that a fallacy has been committed. Van Eemeren makes clear that extending the pragma-dialectical approach to argumentation by taking account of strategic maneuvering leads to a richer and more precise method for analyzing and evaluating argumentative discourse.

**Evaluating the Language of Argument** Oct 12 2020 This book is concerned with the evaluation of natural argumentative discourse,

and, in particular, with the language in which arguments are expressed. It introduces a systematic procedure for the analysis and assessment of arguments, which is designed to be a practical tool, and may be considered a pseudo-algorithm for argument evaluation. The first half of the book lays the theoretical groundwork, with a thorough examination of both the nature of language and the nature of argument. This leads to a definition of argumentation as reasoning expressed within a procedure, which itself yields the three frames of analysis used in the evaluation procedure: Process, Reasoning, and Expression. The second half begins with a detailed discussion of the concept of fallacy, with particular attention on fallacies of language, their origin and their effects. A new way of looking at fallacies emerges from these chapters, and it is that conception, together with the understanding of the nature of argumentation described in earlier sections, which ultimately provides the support

for the Comprehensive Assessment Procedure for Natural Argumentation. The first two levels of this innovative procedure are outlined, while the third, that dealing with language, and involving the development of an Informal Argument Semantics, is fully described. The use of the system, and its power of analysis, are illustrated through the evaluation of a variety of examples of argumentative texts.

Teaching and Learning Argumentative Writing in High School English Language Arts Classrooms

Dec 02 2019 Focused on the teaching and learning argumentative writing in grades 9-12, this important contribution to literacy education research and classroom practice offers a new perspective, a set of principled practices, and case studies of excellent teaching. The case studies illustrate teaching and learning argumentative writing as the construction of knowledge and new understandings about experiences, ideas, and texts. Six themes key to teaching argumentative writing as a thoughtful,

multi-leveled practice for deep learning and expression are presented: teaching and learning argumentative writing as social practice, teachers' epistemological beliefs about argumentative writing, variations in instructional chains, instructional conversations in support of argumentative writing as deep learning and appreciation of multiple perspectives, contextualized analysis of argumentative writing, and the teaching and learning of argumentative writing and the construction of rationalities.

A Guide to Argumentative Research Writing and Thinking Jul 01 2022 Research is difficult. Even though students are trained in the basic research methodology skills, when confronted with research writing, it feels to them as if they enter a bizarre world, with its own language and conventions, where it is hard to get things right. This book translates the apparent complexities of research writing into everyday ideas, language and skills, and will enable novice

researchers to start overcoming the major stumbling blocks immediately. This book focuses only on the greatest challenges in research writing, specifically those that supervisors find most difficult to explain to novice researchers. These challenges include both basic and more complex skills, such as: finding original research contributions; establishing one's voice while drawing on other authors; turning a vague idea into a feasible research question; generating literature reviews that are original in themselves; and avoiding list-like writing when discussing the research methodology. Wentzel shows that it is easier to overcome these challenges, not with lists of prescriptions that are difficult to remember while writing, but rather by cultivating an argumentative mindset. Not only is such a mindset much easier to maintain, but it offers a central point around which one can organise any difficult writing task. The book shows how to use the argumentative mindset to approach every

important writing challenge. It translates all the necessary skills into jargon-free language using a variety of visuals and simple step-by-step procedures that will enable any person to read the book quickly and start writing immediately. The book is accompanied by a website containing an instructor's manual with guidance on the teaching and assessment of research writing, as well as lecture slides.

Reasonableness and Effectiveness in Argumentative Discourse Dec 14 2020 This volume presents 50 contributions on the themes of reasonableness and effectiveness and their connections, which are central issues in argumentation theory. It discusses van Eemeren's views on the study of argumentation; the approach to argumentation adopted in pragma-dialectics; pragma-dialectical perspectives on the dialectical and pragmatic dimensions of argumentative discourse; the notion of strategic maneuvering; the pragma-dialectical method of analyzing argumentative discourse; the treatment of fallacies as violations of rules for critical discussion; pragma-dialectical views on context, the role of logic,

verbal indicators of argumentative moves and argument schemes; and the process of writing and rewriting argumentative texts. The pragma-dialectical quantitative approach to empirical research on argumentative discourse is illustrated by reporting on selected, illustrative experimental studies, as well as qualitative studies of historical cases.

*Exploring Argumentative Contexts* Jan 15 2021 In *Exploring Argumentative Contexts* Frans H. van Eemeren and Bart Garssen bring together a broad variety of essays examining argumentation as it occurs in seven communicative domains: the political context, the historical context, the legal context, the academic context, the medical context, the media context, and the financial context. These essays are written by an international group of argumentation scholars, consisting of Corina Andone, Sarah Bigi, Robert T. Craig, Justin Eckstein, Frans H. van Eemeren, Norman Fairclough, Eveline Feteris, Gerd Fritz, Bart

Garssen, Kara Gilbert, Thomas Gloning, G. Thomas Goodnight, Dale A. **The Tipping Point** Sep 22 2021 From the bestselling author of *The Bomber Mafia*: discover Malcolm Gladwell's breakthrough debut and explore the science behind viral trends in business, marketing, and human behavior. The tipping point is that magic moment when an idea, trend, or social behavior crosses a threshold, tips, and spreads like wildfire. Just as a single sick person can start an epidemic of the flu, so too can a small but precisely targeted push cause a fashion trend, the popularity of a new product, or a drop in the crime rate. This widely acclaimed bestseller, in which Malcolm Gladwell explores and brilliantly illuminates the

tipping point phenomenon, is already changing the way people throughout the world think about selling products and disseminating ideas. "A wonderful page-turner about a fascinating idea that should affect the way every thinking person looks at the world." —Michael Lewis  
*Narration as Argument* Aug 22 2021 This book presents reflections on the relationship between narratives and argumentative discourse. It focuses on their functional and structural similarities or dissimilarities, and offers diverse perspectives and conceptual tools for analyzing the narratives' potential power for justification, explanation and persuasion. Divided into two sections, the first Part, under the title "Narratives as Sources of Knowledge and Argument", includes five chapters addressing rather general, theoretical and characteristically philosophical issues related to the argumentative analysis and understanding of narratives. We may perceive here how scholars in Argumentation Theory have recently

approached certain topics that have a close connection with mainstream discussions in epistemology and the cognitive sciences about the justificatory potential of narratives. The second Part, entitled “Argumentative Narratives in Context”, brings us six more chapters that concentrate on either particular functions played by argumentatively-oriented narratives or particular practices that may benefit from the use of special kinds of narratives. Here the focus is either on the detailed analysis of contextualized examples of narratives with argumentative qualities or on the careful understanding of the particular demands of certain well-defined situated activities, as diverse as scientific theorizing or war policing, that may be satisfied by certain uses of narrative discourse.

**Understanding and Evaluating Research** Jan 27 2022 Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to

defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

*Argumentative Writing in a Second Language*

Mar 29 2022 Argumentative Writing in a Second Language is a collection on teaching argumentative writing, offering multiple vantage points drawn from the contributors' own teaching and research experiences. The value of learning how to compose argumentative texts cannot be overstated, and yet, very little attention has been allocated to the equally important topic of how argumentation is or can be taught in the L2 context. Thus, this volume shifts attention to teachers and argumentative writing instruction, especially within increasingly common multimodal and digital literacy settings. While doing so, it provides a

comprehensive, wide-ranging view of the L2 argumentative writing landscape within an instructional lens. Part I of the volume is topic-oriented and focuses on explorations of important issues and perspectives, while Part II features several chapters reporting classroom-based studies of a variety of instructional approaches that expand our understanding of how argumentative writing can be taught. The book will be of value to pre-service and in-service teachers in varying instructional contexts, as well as teacher educators and L2 writing scholars/researchers.

**The Argumentative Indian** May 31 2022 A Nobel Laureate offers a dazzling new book about his native country India is a country with many distinct traditions, widely divergent customs, vastly different convictions, and a veritable feast of viewpoints. In *The Argumentative Indian*, Amartya Sen draws on a lifetime study of his country's history and culture to suggest the ways we must understand India today in the

light of its rich, long argumentative tradition. The millenia-old texts and interpretations of Hindu, Buddhist, Jain, Muslim, agnostic, and atheistic Indian thought demonstrate, Sen reminds us, ancient and well-respected rules for conducting debates and disputations, and for appreciating not only the richness of India's diversity but its need for toleration. Though Westerners have often perceived India as a place of endless spirituality and unreasoning mysticism, he underlines its long tradition of skepticism and reasoning, not to mention its secular contributions to mathematics, astronomy, linguistics, medicine, and political economy. Sen discusses many aspects of India's rich intellectual and political heritage, including philosophies of governance from Kautilya's and Ashoka's in the fourth and third centuries BCE

to Akbar's in the 1590s; the history and continuing relevance of India's relations with China more than a millennium ago; its old and well-organized calendars; the films of Satyajit Ray and the debates between Gandhi and the visionary poet Tagore about India's past, present, and future. The success of India's democracy and defense of its secular politics depend, Sen argues, on understanding and using this rich argumentative tradition. It is also essential to removing the inequalities (whether of caste, gender, class, or community) that mar Indian life, to stabilizing the now precarious conditions of a nuclear-armed subcontinent, and to correcting what Sen calls the politics of deprivation. His invaluable book concludes with his meditations on pluralism, on dialogue and dialectics in the pursuit of social justice, and on the nature of the Indian identity.
