Power of a Woman Apr 13 2021 Description: The feminine spirit soars in Power of a Woman as Eleanor of Aquitaine, toughest of medieval women, relates her memoirs: of caring and loyalties, triumphs and trials; of her marriages to two warring kings, Louis VII of France, then Henry II of England. She speaks intimately, emotionally of her too many quarreling sons, including Richard the Lionheart and John, of Magna Carta fame. A patron of troubadours, Eleanor commissions poetry as propaganda. She regales her readers with intrigues, crusades and tales of ruthless diplomacy against barons, kings, popes and Thomas Becket, while confessing her loves, her hopes for her many children, and their fates. In midlife her sense of community leads her to set up her Court of Ladies to balance male-dominated worlds of Church and state. Her mission: to empower women with the Grace she enjoyed as the femme fatale of her day. Eleanor's power of a woman

lets her pluck triumph from her defeats as well as her victories. Reviews: Those of you who know me know that for me to give a work of historical fiction a high rating, it has to offer something extraordinary. This Robert Fripp has done in Power of a Woman. In this highly unusual fictional autobiography, Mr. Fripp tells Eleanor of Aquitaine's story in her own words, as if she is dictating to a young lady in her household. Power of a Woman: review by Melissa Snell, Your Guide to Medieval History at About.com, which posts her full review at: http://historymedren.about.com/od/ewho/fr/frripp_eleanor.htm -Melissa Snell, Your Guide to Medieval History at About.com Finally! Power of a Woman brings us an autobiography of Eleanor of Aquitaine that is accessible and entertaining. Telling her story in Eleanor's voice, Robert Fripp brings us medieval Europe through her eyes. At eighty-one, she hasn't much time. We feel her urgency, the chill in her bones. Impeccable research and storytelling combine to make this a must for all who want to know more about this fascinating woman. Her definition of love survives to this day! What a great read. This is so gripping. I got so totally caught up in this story one night that I woke up with images of Eleanor in my mind, and Kate Hepburn's voice in my ear. I love this tale. -Veronica Prior, Round Rock, TX Power of a Woman is gripping in its wealth of detail. It makes me feel like I am in the midst of the action. Of all books I have read, this is the only one that makes me experience what it must have felt like to have lived through those troublesome, exciting times. Such a wonderful, exciting book! -Lady Shirley Cassidy, Dublin, Ireland Author Bio: British-born Robert Fripp gained a medieval outlook from five years on a choral scholarship in the choir of Salisbury Cathedral, the model for Lord of the Flies. He went on to study earth sciences before producing current affairs television for CBC in Toronto. He also: created IBM Visions magazine about high-performance computing; worked for Japan's public broadcaster; and wrote a book with great reviews, Let There Be Life, about cosmic and organic origins. Power of a Woman tells the

memoirs of Eleanor of Aquitaine. Career change (including downsizing or layoff), empty nest syndrome, failed retirement, failed business, failed relationships and a lack of confidence in the future are just some of the issues facing women over 50. Cheryl begins the book sharing with the reader her personal journey from a "bold and fearless" 20-year-old to a 50something woman who has been defeated by life-altering changes. Re-Invent Yourself is a working guide that chronicles the steps Cheryl took to re-vitalize her life. Why do we stop dreaming after 50something? Why do we think we are too old to start a business or run a marathon? This book answers these questions and then provides resources to help women live out their dreams and aspirations. The book is filled with personal experiences and is divided into 5 chapters, each designed to move the reader closer to creating a Re-Invention Plan which is the objective of the book. Know Yourself - Helps the reader answer the question, "Who are You?" and "What do you Want?." Cheryl believes that at the core of many of the problems women over 50 have is a lack of true identify or an identity that has been lost in the years of giving to others and spending very little time taking care of ourselves. The exercises in this chapter lead women through an assessment of their self-esteem right now and gives techniques for helping them find their true identity. Women completing this chapter will also be able to take a hard look at what they are currently accomplishing in their personal and professional life and begin the process of identifying what they desire to be and do. Heal Yourself- How do we overcome the beliefs that have kept us from succeeding? Cheryl carries the reader through extensive exercises that will help them identify the thoughts that have kept them standing in "cement blocks" and then break through to a life of accomplishment. Re-Invent Yourself- Readers are given the tools needed to take the

wants they have identified as important to them and create a lifestyle plan for re-invention. The plan includes goal creation, identifying timelines, budgeting, and accountability in order to ensure that goals become a reality. The reader will create long-term, short-term and immediate goals that support their overall plan. Commit Yourself - The final part of Cheryl's re-invention plan is for the reader to be committed to change. Without making the commitment and being open to change, nothing will change. This chapter encourages the reader to get a digital calendar and keep track of daily progress. The next important part of change is getting an accountability partner who will make the journey with the reader. Finally, surrounding oneself with positive affirmations is an important part in creating lasting and sustained change. Cheryl's goal for the reader after they have completed the book is to celebrate a new life just as she has done. She went from near depression to now writing books, creating training programs, coaching and speaking to women over 50 about living a life of passion and purpose.

Certain Personal Matters Aug 18 2021 This early edition of H.G. Wells features the author's amusing commentary and opinion about the customs and issues of his time.

Exploring the Biological Contributions to Human Health Apr 25 2022 It's obvious why only men develop prostate cancer and why only women get ovarian cancer. But it is not obvious why women are more likely to recover language ability after a stroke than men or why women are more apt to develop autoimmune diseases such as lupus. Sex differences in health throughout the lifespan have been documented. Exploring the Biological Contributions to Human Health begins to snap the pieces of the puzzle into place so that this knowledge can be used to improve health for both sexes. From behavior and cognition to metabolism and response to chemicals and infectious organisms, this book explores the health impact of sex (being male or female, according to reproductive organs and chromosomes) and gender (one's sense of self as male or female in society). Exploring the Biological Contributions to Human Health

discusses basic biochemical differences in the cells of males and females and health variability between the sexes from conception throughout life. The book identifies key research needs and opportunities and addresses barriers to research. Exploring the Biological Contributions to Human Health will be important to health policy makers, basic, applied, and clinical researchers, educators, providers, and journalists-while being very accessible to interested lay readers.

Gender and Justice Aug 30 2022 Intended for use in courses on law and society, as well as courses in women's and gender studies, women and politics, and women and the law - this book that takes up the question of what women judges signify in several different jurisdictions in the United States, United Kingdom, and European Union. In so doing, its empirical case studies uniquely offer a model of how to study gender as a social process rather than merely studying women and treating sex as a variable. A gender analysis yields a fuller understanding of emotions and social movement mobilization, backlash, policy implementation, agenda setting, and representation. Lastly, the book makes a non-essentialist case for more women judges, that is, one that does not rest on women's difference.

A Matter of Choices Jul 29 2022 When the author became a nuclear physicist, the number of women in the field could be counted on one hand. In this memoir, she reveals her difficult journey to international recognition in physics. She is frank about the ways being a woman has made a difference in her opportunities and choices as a scientist--and how, by being a woman, she has made a difference in the world of physics.

The Essential Gloria Steinem Reader Nov 01 2022 Gloria Steinem, one of the most iconic feminist thinkers of the world, spent her early years in India. Her time in the country revealed to Gloria the Gandhian insight that change, like a tree, must grow from the bottom up. Subsequently, her decades of work with the feminist movement in the

US and across the world taught her that violence and domination are normalized by the false division of human beings into subject and object, the dominator and the dominated, 'masculine' and 'feminine'. In *As if Women Matter*, Gloria Steinem and activist Ruchira Gupta bring together a selection of ground-breaking essays by Gloria which, since the time that they were first written, have transcended borders and have laid the groundwork for much of modern feminist thought. In these pages, Gloria demonstrates how racism and discrimination based on caste and class differences cannot survive without controlling women's bodies--she also describes the many ways in which women and men are fighting that control. She brilliantly analyzes Adolf Hitler's obsession with masculinity, and finds a gendered understanding of violence in the making. She distinguishes between erotica and pornography, locating the difference between the two in the inequality that governs relations between the sexes. And, in addition to a trenchant account of a few days she spent as a Playboy Bunny, this volume also carries a never-before-published essay on sex trafficking by Gloria, 'The Third Way'. *As if Women Matter* is scholarly, profound, and leavened by a lightness of touch which makes the most complex arguments accessible to all readers.

Save the Males Jan 11 2021 With piercing wit and perceptive analysis, Pulitzer Prize-winning writer Kathleen Parker explores how men, maleness, and fatherhood have been under siege in American culture for decades. She argues that the feminist movement veered off course from its original aim of helping women achieve equality and ended up making enemies of men. The pendulum has swung from the reasonable middle to a place where men have been ridiculed in the

public square and the importance of fatherhood has been diminished—all to the detriment of women and children, who ultimately suffer most. Exploring our burgeoning culture of permissiveness and the impact of anti-male attitudes on families and relationships, Kathleen Parker tackles some of the more taboo subjects in today's sexual politics and culture wars that will have America talking about saving the males.

A Matter of Moral Justice Feb 09 2021 A long-overlooked group of workers and their battle for rights and dignity Like thousands of African American women, Charlotte Adelmund and Dollie Robinson worked in New York's power laundry industry in the 1930s. Jenny Carson tells the story of how substandard working conditions, racial and gender discrimination, and poor pay drove them to help unionize the city's laundry workers. Laundry work opened a door for African American women to enter industry, and their numbers allowed women like Adelmund and Robinson to join the vanguard of a successful unionization effort. But an affiliation with the powerful Congress of Industrial Organizations (CIO) transformed the union from a radical, community-based institution into a bureaucratic organization led by men. It also launched a difficult battle to secure economic and social justice for the mostly women and people of color in the plants. As Carson shows, this local struggle highlighted how race and gender shaped worker conditions, labor organizing, and union politics across the country in the twentieth century. Meticulous and engaging, *A Matter of Moral Justice* examines the role of African American and radical women activists and their collisions with labor organizing and union politics.

Through Their Eyes Oct 27 2019 In *Through Their Eyes*, author and teacher Gina Bolton takes her readers behind the scenes and into the hearts and minds of 10 women in the Bible; some very familiar and some quite unknown. As each chapter unfolds, the doubts and experiences; fears and triumphs of the women jump off the page. By the end of the book you will be awed not only by the women you meet on these pages, but by the God who takes the time to love each of

them and bring healing and worth into their lives - and into yours.

When Does Gender Matter? Feb 21 2022 "As the number of women candidates for office in the U.S. increases each election cycle, scholars are confronted with questions about the impact of their sex on their chances of success. Chief among these questions involves the influence of gender stereotypes on the decisions voters make in elections in which women run against men. Previous research documents that voters see women and men as possessing different character traits and different abilities to handle policy issues. These findings, combined with anecdotal evidence of sexist attitudes toward women candidates, raises concerns that women candidates are hampered by their sex and gender considerations. Employing data from an original survey of 3150 U.S. adults conducted in 2010, this book confronts scholarly concerns that gender stereotypes work to undermine women's chances of success. Challenging the conventional wisdom, these data demonstrate that voters do not rely heavily on gender stereotypes when evaluating and voting for women candidates. Voters do hold gendered attitudes, both positive and negative, about women candidates, but these attitudes are not related to the political decisions voters make. Instead, in deciding for whom to vote, people are influenced by traditional political forces, like political party and incumbency, regardless of the sex of the candidates. There is also evidence that partisan stereotypes interact with gender stereotypes to influence reactions to candidates, both women and men, depending on their political party. In the end, this project demonstrates that women candidates win as often as do men and that partisan concerns trump gender every time"--

Gender and Race Matter Oct 20 2021 This innovative collection puts forward how women are able to challenge oppression through circumventing rules, roles, obligations and prejudice through a powerful agency. A Matter of Simple Justice Nov 28 2019 In August 1972, *Newsweek* proclaimed that "the person in Washington who has done the most for the women's movement may be Richard Nixon." Today, opinions of the Nixon administration are strongly colored by foreign policy successes and the Watergate debacle. Its accomplishments in advancing the role of women in government have been largely forgotten. Based on the "A Few Good Women" oral history project at the Penn State University Libraries, *A Matter of Simple Justice* illuminates the administration's groundbreaking efforts to expand the role of women—and the long-term consequences for women in the American workplace. At the forefront of these efforts was Barbara Hackman Franklin, a staff assistant to the president who was hired to recruit more women into the upper levels of the federal government. Franklin, at the direction of President Nixon, White House counselor Robert Finch, and personnel director Fred Malek, became the administration's de facto spokesperson on women's issues. She helped bring more than one hundred women into executive positions in the government and created a talent bank of more than a thousand names of qualified

women. The Nixon administration expanded the numbers of women on presidential commissions and boards, changed civil service rules to open thousands more federal jobs to women, and expanded enforcement of antidiscrimination laws to include gender discrimination. Also during this time, Congress approved the Equal Rights Amendment and Nixon signed Title IX of the Education Amendments into law. Featuring a new forward by Sara Eisen, this updated edition of *A Matter of Simple Justice* celebrates the 100th anniversary of women's suffrage in the United States through the story of Barbara Hackman Franklin and those "few good women" and shows how the advances that were made in this time by a Republican presidency both reflected the national debate over the role of women in society and took major steps toward equality in the workplace for women.

Beyond Bias and Barriers Jun 15 2021 The United States economy relies on the productivity, entrepreneurship, and creativity of its people. To maintain its scientific and engineering leadership amid increasing economic and educational globalization, the United States must aggressively pursue the innovative capacity of all its people—women and men. However, women face barriers to success in every field of science and engineering; obstacles that deprive the country of an important source of talent. Without a transformation of academic institutions to tackle such barriers, the future vitality of the U.S. research base and economy are in jeopardy. *Beyond Bias and Barriers* explains that eliminating gender bias in academia requires immediate overarching reform, including decisive action by university administrators, professional societies, federal funding agencies and foundations, government agencies, and Congress. If implemented and coordinated across public, private, and government sectors, the recommended actions will help to improve workplace environments for all employees while strengthening the foundations of America's competitiveness.

WE Matter! Mar 25 2022 Increasingly, social, cultural, and political discourse is deeming Black women and girls to be a critical group to engage. We are told their lives should matter, and yet, there is also overwhelming evidence that Black women and girls continue to be what Malcolm X declared, "The most neglected person in America". This critical volume engages a conversation at the intersection of the fields of education and psychology among recognized Black women scholars that contemporizes the discourse about Black women's and girls' diversity, their sociocultural contexts, and various approaches to communal and clinical work with them to support their mental health, wellness, and thriving. *WE Matter!: Intersectional Anti-Racist Feminist Interventions with Black Girls and Women* is a significant new contribution to Black Studies, Mental Health, and Gender Studies, and will be a great resource for academics, researchers, and advanced students of Sociology, Psychology, Education, and Politics. [Uncovered](#) May 15 2021 "In her foreword, author Susan Seligson states what all men and women already know: "Breasts are an inexplicably big deal." Whether hidden under layers of clothing, half-revealed in the service of fashion (and flirtation) or laid brazenly bare, breasts matter. They demand response, provoke moral questions and force confrontation with the very notion of taboo. Over a period of six years, Jordan Matter photographed over 100 women bare-breasted in New York City. They varied in terms of age, education and profession. Every one was a volunteer. Every subject faced reactions to her decision to defy convention, and many confronted feelings of shame and inadequacy. But after the shoots, the women were unexpectedly euphoric--and Matter wondered just what he had uncovered. Many of the women agreed to interviews or wrote their own texts for this collection, revealing their journeys toward self-acceptance. The result is a remarkable chorus of shared experience, secret fears, optimism and wisdom. *Uncovered* celebrates the controversial female body. But it also honors the individual women who were willing to confront their culture and themselves. These are their images and their stories, in their own words." -- Publisher's description

End Feminism; Save the World Sep 06 2020 Women are weak. Women are worthless. Women have no power unless politicians or activists grant it to them, unless they can effectively steal man's role, unless they bring others down to hoist themselves up. Those are the lies the modern-day feminist movement has repeated to society, again and again, from dramatically lit stages, supported by beams entitled "Pro-choice Movement," "Free Birth Control," "Abolition of Marriage," "Money before Families," "Gender Sameness," and "Misandry." Our media, politicians, pop culture, and educational system stand atop these stages. What they haven't told us is that women have held power since the beginning of time. Power runs in a woman's blood, her natural, feminine virtues inherently elect to uplift, create, and, through potential to succor the human race, change billions' lives for the best. The question is: will you conform to modern society's destructive expectations and crumple under feminist control or will you inspire a new movement to elevate fundamental womanhood and save the world?

Hector Robertin Ph.D. "Multiculturalism in the Workplace engages everyone from the expert to the lay reader in principles validated through academic research. Through Barb's story, the reader is invited to explore the high level of misunderstanding among cultures and seek solutions for collaborative team development. Dr. Paris has simplified the understanding of Hofstede's research on cultural measurements in business by connecting them to different cultural traits, such as individualism and collectivism. Even the newest person to the study of multiculturalism will acquire excellent tools for interpreting actions and behaviors within his/her own environment." Sharon Seeberger, B.A.

Gender Equality and Policy Implementation in the Corporate World Jul 25 2019 Gender Equality and Policy Implementation in the Corporate World takes a unique approach to the issue of gender equality in corporations in the 21st century. It examines the implementation of specific policies that seek to promote women's presence on corporate boards in 15 democracies in Western and Central Eastern Europe, North America, and Australasia through the lens of the Gender Equality Policy in Practice Approach. The thirteen empirically rich country chapters by leading country experts and two separate comparative chapter answer core questions. How were policies adopted and implemented? Did they achieve any degree of success that would allow for real and lasting equality? What were the politics of the pursuit of corporate gender equality across the 15 countries? What worked and did not work and why? What are the

lessons to be drawn from these experiences? The findings of the book show that policy implementation does matter, but that in this last bastion of male domination, policies have had more success in increasing women's numbers over challenging gender-biased norms that block women of all cultural and socio-economic backgrounds from gaining real power on boards. The path-breaking study shows that the reasons for this slow change are highly complex and case specific, in the details of each policy mix. While progress has been slow in coming, it has still been made even in these challenging times. Future policy success, the book concludes, is in the hands of men and women willing to come forward to overcome these well entrenched obstacles. *Backdrop* Jun 23 2019 "There's a story behind every research study." In *Backdrop*, Gayle Pitman narrates the "story" behind the science of sexual orientation - a science that has been rife with contradictions and controversies. Pitman argues that, when it comes to sexual orientation research, we could potentially glean more powerful insights from the backdrop of politics and personalities behind the research than from the actual studies themselves. Beginning with a focus on the causes of sexual orientation, moving then to the politics of transgender and intersex identities, and culminating in the political controversies of reparative therapy, "don't ask, don't tell," and same-sex marriage, *Backdrop* brings into focus the rich and textured landscape behind the scientific research findings. Filled with plot twists and developments, variegated characters (the scientists as well as the activists and reactionaries), and thorny political, moral, and philosophical questions, *Backdrop* brings the science to life, raising more complex questions while simultaneously providing us with a more nuanced understanding of gender and sexual orientation. *Relationships Matter* Jul 17 2021 Women who want to advance their careers know they must develop a network. Yet for most women, especially those at mid-career level, building a network is an arduous task that ends up low on the priority list. Women at this level are prone to hunker down, work hard, and expect their work to speak for

itself. They assume that excellent work will be rewarded with advancement. They also assume that getting ahead by "playing the game" will compromise their integrity. In this ground-breaking book, Dr. Rosina Racioppi, President and CEO of WOMEN Unlimited, Inc., explains why these assumptions are dead wrong. While excellent work is a prerequisite for success, without strategic thinking, visibility, and the ability to leverage relationships for knowledge, resources, and practical wisdom, outstanding work is a dead end. *Relationships Matter* draws on WOMEN Unlimited's extensive experience partnering with Fortune 1000 organizations, the author's comprehensive research, and in-depth interviews with 10 successful leaders. In these pages, you'll discover: - Why a sense of curiosity could be one of your top assets - How to play the game without compromising yourself - Why what you know is less important than who knows what you know - How to determine and grow the right network to achieve your goals - How to remain authentic while strategically developing relationships While grounded in research, Dr. Racioppi's recommendations are practical and actionable-and she shares them in the context of compelling stories of women who have achieved their career dreams.

Feminist Liturgy Jul 05 2020 Feminist liturgy is not esoteric nor weird nor for women only. Rather it is liturgy that has been shaped by women and some men who recognized that something was missing in the worship of our synagogues and churches. And not only was something missing, but at times what was expressed was not true, especially for women and other marginalized people. Feminist liturgies began when women and a few men asked themselves what would be true, what would be just. The answers were not found in discussions about liturgy but rather in trying to use symbols, texts, and forms that expressed relationships with God, one another, all created life, more accurately and more authentically. This book traces the story of feminist liturgy: how, when, and why it began; the principles that guide it; what it looks like; and what its future may be.
