*Boys and Girls Learn Differently!* Aug 26 2019 At last, we have the scientific evidence that documents the many biological gender differences that influence learning. For instance, girls talk sooner, develop better vocabularies, read better, and have better fine motor skills. Boys, on the other hand, have better auditory memory, are better at three-dimensional reasoning, are more prone to explore, and achieve greater abstract design ability after puberty. In this profoundly significant book, author Michael Gurian synthesizes the current knowledge and clearly demonstrates how this distinction in hard-wiring and socialized gender differences affects how boys and girls learn. Gurian presents a new way to educate our children based on brain science, neurological development, and chemical and hormonal disparities. The innovations presented in this book were applied in the classroom and proven successful, with dramatic improvements in test scores, during a two-year study that Gurian and his colleagues conducted in six Missouri school districts.

At A Loss For Words Sep 07 2020 Drawing on the latest research on development among toddlers and preschoolers, *At a Loss for Words* lays out the importance of getting parents, policy makers, and child care providers to recognize the role of early literacy skills in reducing the achievement gap that begins before three years of age. Readers are guided through home and classroom settings that promote language, contrasting them with the "merely mediocre" child care settings in which more and more young children spend increasing amounts of time. Too many of our young children are not receiving the level of input and practice that will enable them to acquire language skills—the key to success in school and life. Bardige explains how to build better community support systems for children, and better public education, in order to ensure that toddlers learn the power of language from their families and teachers.

*Diseases and Disorders in Infancy and Early Childhood* Oct 28 2019 Currently, there are two types of pediatric disorder books available: high level technical books geared toward pediatric specialists, and self-help books for parents. The technical books cover diagnosis and treatment, while the self-help books cover general problems, are single authored, and speak little to the research of any given disorder. This volume consists of focused articles from the authoritative Encyclopedia of Infant and Early Childhood Development that cover the research information on common disorders in age 0-3. Topics include those most typically occurring, making them of great interest to both specialists and nonspecialists. Disorders and dysfunction of a variety of types are discussed, whether cognitive, social, emotional, or physiological. Coverage includes asthma, allergies, colic, bedwetting, diarrhea, genetic disorders, SIDS and learning disabilities, and provides an essential, affordable reference for researchers in developmental psychology, as well as allied health fields. Written at a level for general understanding—allows for easy and quick grasp of information to both specialists and non specialists alike Covers disorders across many systems (neurological, immunological etc) providing quicker access to info that would normally be dispersed across a wide literature Written by research experts ensuring accuracy that is sometimes lacking in non-specialist books Covers disorders, dysfunctions, and abnormal development in one place saving time looking at multiple sources for these related items

Standardized Childhood Jun 28 2022 A array of childcare and preschool options blossomed in the 1970s as the feminist movement spurred mothers into careers and community organizations nurtured new programs. Now a small circle of activists aims to bring more order to childhood, seeking to create a more standard, state-run preschool system. For young children already facing the rigors of play dates and harried parents juggling the strains of work and family, government is moving in to standardize childhood. Sociologist Bruce Fuller traveled the country to understand the ideologies of childhood and the raw political forces at play. He details how progressives earnestly seek to extend the rigors of public schooling down into the lives of very young children. Fuller then illuminates the stiff resistance from those who hold less trust in government solutions and more faith in nonprofits and local groups in contributing to the upbringing of young children. The call for universal preschool is a new front in the culture wars, raising sharp questions about American families, cultural diversity, and the appropriate role of the state in the lives of our young children. Standardized Childhood shows why the universal preschool movement is attracting such robust support—and strident opposition—nationwide.

Issues in the Psychology of Motivation Jan 30 2020 In psychology, motivation refers to the initiation, direction, intensity and persistence of behaviour. Motivation is a temporal and dynamic state that should not be confused with personality or emotion. Motivation is having the desire and willingness to do something. This book presents research in this field.

**Promoting Well-Being in the Pre-School Years** Jul 26 2019 Promoting Well-Being in the Pre-School Years provides evidence-based research and real-life strategies that support social and emotional development and well-being for children aged 3–5 years. It places emphasis on nurturing social emotional competence through purposeful scaffolding activities and how these can be used by children and families to create a harmonious platform for building resilience and positive relationships with family and the community. Drawing on principles from Positive Psychology and Positive Education, it is illustrated throughout with examples of sustainable practice in diverse, global settings. Key topics explored include: Contemporary well-being concepts, including ‘grit’, ‘growth mindset’ and ‘gratitude’, as well as ‘classic’ constructs such as coping and self-efficacy The attitudes and skills that need to be developed to ensure that young children flourish Cognitive and sociocultural perspectives complemented by neuroscience and epigenetics Social Emotional Learning (SEL) in the early years curriculum Using visual tools – the Early Years Coping Cards How we measure young children’s coping The relationship between coping, stress and mental health Recognition of the importance of parents’ own coping skills How partnerships with communities can improve children’s SEL. Promoting Well-Being in the Pre-School Years shows how we can support young children to develop an understanding of what it means to be happy and to flourish as a socially responsible member of the family and wider community. It is essential reading for teachers, parents and professionals who work with young children, as well as academics in child development.

**Preschool in Three Cultures Revisited** Jun 16 2021 Published twenty years ago, the original *Preschool in Three Cultures* was a landmark in the study of education: a profoundly enlightening exploration of the different ways preschoolers are taught in China, Japan, and the United States. Here, lead author Joseph Tobin—along with new collaborators Yeh Hsueh and Mayumi Karasawa—revisits his original research to discover how two decades of globalization and sweeping social transformation have affected the way these three cultures educate and care for their youngest pupils. Putting their subjects’ responses into historical perspective, Tobin, Hsueh, and Karasawa analyze the pressures put on schools to evolve and to stay the same, discuss how the teachers adapt to these demands, and examine the patterns and processes of continuity and change in each country. Featuring nearly one hundred stills from the videotapes, *Preschool in Three Cultures Revisited* artfully and insightfully illustrates the surprising, illuminating, and at times entertaining experiences of four-year-olds—and their teachers—on both sides of the Pacific.

University Laboratory Preschools May 16 2021 This volume is a collection of articles that showcase new research that is emerging from laboratory schools, guided by principles of applied

developmental science. In the 1920's, new university laboratory preschools ushered in a modern era of child development research. Campus preschools with a research mission were home to seminal studies of children's play and age-related changes in children's abilities. They produced data about normative child development, along with evidence-based practical advice for teachers and parents. Now, nearly 100 years later, lab schools are still thriving in many colleges and universities as centers of research, education and care for young children, support for families, and practical education for students and teachers of young children. However, with tightening higher education budgets and changing research agendas, many lab schools are struggling to focus and balance these research, education, and service missions. The chapter authors illustrate a variety of ways that faculty and laboratory school early childhood educators are collaborating to do research to address critical issues in the early childhood field, including the preparation of the next generation of early childhood professionals. This book was originally published as a special issue of *Early Education and Development*.

*Theories of Childhood* Jan 12 2021 "Find solutions and guidance in your classroom today by learning about the theoretical foundations of early childhood care. *Theories of Childhood* examines the work of five groundbreaking education theorists in relation to early childhood. Author Carol Garhart Mooney distills each theorist's work to reveal how it relates to child care and children. She shows how John Dewey examined the qualities that make curriculum meaningful; Maria Montessori, the need for carefully prepared classroom environments ; Erik Erikson, an approach to making children healthy and comfortable; Jean Piaget, our knowledge of children's thought processes; and Lev Vygotsky, the importance of teachers and peers in learning." -Back cover.

*Music in Childhood Enhanced: From Preschool through the Elementary Grades, Spiral bound Version* Oct 21 2021 *MUSIC IN CHILDHOOD: FROM PRESCHOOL THROUGH THE ELEMENTARY GRADES, Enhanced 4th Edition*, equips teachers with the research, knowledge and resources to develop musically and pedagogically as they help children's grow from musical intuition to musical mastery. Combining current research with years of experience, Campbell and Scott-Kassner use practical strategies, imaginative scenarios and examples from worldwide musical resources to inspire the best possible teaching methods. The text emphasizes contemporary theories and practices of music education, including strategies for developing pitch, vocal, rhythmic, instrumental, listening, movement and creative responses in children. Numerous lesson plans and various curricular units offer plenty of examples to help readers create plans specifically tailored to the unique needs of their own classrooms. **Developing Teacher Diversity in Early Childhood and Elementary Education** Nov 09 2020

This book explores the effects of the REACH program (Recruiting and Enlightening through  
Access to and Communication with High-need schools), a seven-year initiative devised to help  
find, attract, and prepare diverse teacher candidates interested in working with young children.  
The book analyzes how the program, set at a national liberal arts college in the US, used the three  
R's: recruitment, retention, and recognition, to successfully draw in diverse educators for young  
children who then go on to become leaders and role models in their schools and communities.  
Chapters examine ways to provide the academic, social, and enrichment supports necessary for  
diverse teacher candidates and identify current teacher education practices that are effective as  
well as opportunities for change.

**The State of the World's Children 2019** Nov 02 2022 This report examines nutrition, providing  
a fresh perspective on a rapidly evolving challenge. Despite progress in the past two decades,  
around 200 million under-fives suffer from undernutrition. Adding to this toll is rising obesity,  
which affects 38 million children. All these forms of malnutrition threaten children's  
development, while obesity is creating a lifelong legacy of disease. At the heart of this evolving  
challenge is a global shift towards modern diets that do not meet children's nutritional  
requirements. The report provides unique data and analysis of malnutrition in the 21st century  
and outlines recommendations to put children's needs at the heart of global and national food  
systems.

**Allergy, Immunity and Tolerance in Early Childhood** Jul 06 2020 Allergy, Immunity and  
Tolerance in Early Childhood: The First Steps of the Atopic March provides valuable insights on  
the atopic diseases, including asthma, allergic rhinitis, atopic dermatitis, and food allergies,  
which have developed into major health problems in most parts of the world. As the natural  
history of these chronic diseases has been extensively studied, including their major genetic,  
environmental, and lifestyle determinants and potential protective factors, the book presents  
tactics on how pediatric allergists can provide early intervention. In addition, the book unites  
key, global experts in the field who summarize their collective, and current, knowledge of the  
early stage of the "Atopic March", along with novel ideas for potential options of prevention.  
Summarizes the current knowledge of the epidemiological, genetic, and cellular basis of allergic  
diseases Ideal reference for the study of allergies in young children, atopic dermatitis, allergic  
rhinitis, childhood asthma, and food allergies Provides landmark findings in the field of  
immunology and allergy development Fulfills the need for a book that focuses on primary and  
secondary allergy prevention, especially during the first years of life Unites key, global experts in  
the field who summarize their collective, and current, knowledge, along with novel ideas for

potential options of prevention
