The 48 Laws Of Power Mar 03 2020 THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4:

Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power. _____ (From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In The 48 Laws of Power, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

The Dynamics of Doctrine Sep 20 2021 This paper is a case study in the wartime evolution of tactical doctrine. Besides providing a summary of German Infantry tactics of the First World War, this study offers insight into the crucial role of leadership in facilitating doctrinal change during battle. It reminds us that success in war demands extensive and vigorous training calculated to insure that field commanders understand and apply sound tactical principles as guidelines for action and not as a substitute for good judgment. It points out the need for a timely effort in collecting and evaluating doctrinal lessons from battlefield experience. --Abstract.

So Far and No Further! Jun 05 2020 'So Far and No Further!' Rhodesia's Bid for Independence during the Retreat from Empire 1959-1965 Ian Smith's unilateral declaration of independence for Rhodesia (now Zimbabwe) on 11 November 1965 was seen by many as the act of a rebellious white minority seeking to preserve their privileged position in defiance of Britain's determination to shed her Empire and introduce rule by the African majority as soon as possible. However, the drama of UDI has long overshadowed and oversimplified the complexities of the preceding years. In this account of that time, based on sole access to the hitherto closed papers of Ian Douglas Smith and Sir Roy Welensky, as well as extensive research at London's Public Record Office, and in government and private collections elsewhere, Dr J.R.T. Wood chronicles the collision course on which Britain and Rhodesia were set after 1959, complementing his study of the fate of the Federation of Rhodesia and Nyasaland in his definitive 'The Welensky Papers: A History of the Federation of Rhodesia and Nyasaland 1953-1963'. Britain, Wood shows, was intent on shedding her Empire as quickly as possible against a backdrop of the Cold War and the rise of Chinese- and Soviet-sponsored African nationalism. She delivered some 600 one man, one vote constitutions to her fledgling nations and had no intention of granting Rhodesia independence on different terms. Unlike Britain's other African possessions, however, Rhodesia had enjoyed self-governance since 1923. The largely white Rhodesian electorate, wary of the consequences of premature and ill-prepared majority rule, sought instead dominion status akin to that of Canada, Australia and New Zealand. Their intention was gradually to pave the way for majority rule: since 1923, Rhodesia's electoral qualifications had excluded race. It was always understood that the African majority would acquire power; the concern was the speed and smoothness of that acquisition. Culminating in those dramatic days of November 1965 when Ian Smith concluded in the face of resolute British stonewalling that he had no alternative but UDI, this unique account is the first in a series which chronicles the course of events that ultimately led to Robert Mugabe's accession to power in 1980, and all that entailed.

Crossing the Rubicon Nov 10 2020 The acclaimed investigative reporter and author of *Confronting Collapse* examines the global forces that led to

9/11 in this provocative exposé. The attacks of September 11, 2001 were accomplished through an amazing orchestration of logistics and personnel. Crossing the Rubicon examines how such a conspiracy was possible through an interdisciplinary analysis of petroleum, geopolitics, narco-traffic, intelligence and militarism—without which 9/11 cannot be understood. In reality, 9/11 and the resulting "War on Terror" are parts of a massive authoritarian response to an emerging economic crisis of unprecedented scale. Peak Oil—the beginning of the end for our industrial civilization—is driving the elites of American power to implement unthinkably draconian measures of repression, warfare and population control. Crossing the Rubicon is more than a story of corruption and greed. It is a map of the perilous terrain through which we are all now making our way.
