Power and Charity Feb 11 2021 Through the history of a charitable institution, the Tung Wah Hospital, Elizabeth Sinn reshapes and greatly deepens our understanding of the evolving interactions between the Chinese community in Hong Kong and the colonial rulers. She traces the rise to power of the Chinese merchants who organized and operated the Hospital and the complex relationships that the Hospital developed with the colonial regime, Mainland Chinese officials and the Chinese people of Hong Kong. As the first organized merchant elite recognized by the colonial government, the Tung Wah Hospital Committee played a crucial political role in nineteenth-century Hong Kong, mediating between ordinary Chinese and the colonial administration. Elizabeth Sinn's classic and pioneering study shows the great extent to which the Hospital's history is the history of Hong Kong itself. The author highlights the problems encountered by the Hong Kong government in managing a foreign population and the role of the Chinese local elite in a colonial situation, while also exploring the complex but fascinating relations between the Chinese residents in Hong Kong and Chinese officials on the Mainland, and between Hong Kong and other Chinese communities. Based on primary source materials, this is an original and refreshing contribution to the study of Hong Kong and modern Chinese history which reveals and discusses many fundamental issues that are entirely relevant today. In a new preface to this paperback edition, Dr. Sinn reconsiders her work in the light of subsequent research on Hong

Kong's history and connects it to recent developments in international scholarly work especially with respect to the study of philanthropy and to ideas of world history. "An excellent blend of history and ethnography. Power and Charity is one of the best books available on the everyday practice of colonialism in British Hong Kong. Sinn provides unique insights into a system that is fast becoming a distant memory. This book is required reading for anyone interested in colonialism, medical history, or urban anthropology." —James L. Watson, Professor of Anthropology, Harvard University "Dr. Sinn's book . . . is essential reading for anyone wishing to understand Hong Kong society and politics in the nineteenth century." —Ian Scott, Journal of the Hong Kong Branch of the Royal Asiatic Society "(Dr. Sinn's) book is a fascinating and awesomely researched account of the (Chinese) community's efforts to hold its own in a foreign-dominated enclave." —Philip Snow, Far Eastern Economic Review

Canadian Journal of Zoology Sep 20 2021

Understanding Morphology Mar 03 2020 This new edition of Understanding Morphology has been fully revised in line with the latest research. It now includes 'big picture' questions to highlight central themes in morphology, as well as research exercises for each chapter. Understanding Morphology presents an introduction to the study of word structure that starts at the very beginning. Assuming no knowledge of the field of morphology on the part of the reader, the book presents a broad range of morphological phenomena from a wide variety of languages. Starting with the core areas of inflection and derivation, the book presents the interfaces between morphology and syntax and between morphology and phonology. The synchronic study

of word structure is covered, as are the phenomena of diachronic change, such as analogy and grammaticalization. Theories are presented clearly in accessible language with the main purpose of shedding light on the data, rather than as a goal in themselves. The authors consistently draw on the best research available, thus utilizing and discussing both functionalist and generative theoretical approaches. Each chapter includes a summary, suggestions for further reading, and exercises. As such this is the ideal book for both beginning students of linguistics, or anyone in a related discipline looking for a first introduction to morphology.

Indian Epistemology and Metaphysics Aug 08 2020 Indian

Epistemology and Metaphysics introduces the reader to new perspectives on Indian philosophy based on philological research within the last twenty years. Concentrating on topics such as perception, inference, skepticism, consciousness, self, mind, and universals, some of the most notable scholars working in classical Indian philosophy today examine core epistemological and metaphysical issues. Philosophical theories and arguments from a comprehensive range of Indian philosophical traditions (including the Nyaya, Mimamsa, Saiva, Vedanta, Samkhya, Jain, Buddhist, materialist and skeptical traditions, as well as some 20th century thought) are covered. The contributors to this volume approach the topics from both a philosophical and a philological perspective. They demonstrate the importance of the subject matter for an understanding of Indian thought in general and they highlight its wider philosophical significance. By developing an appreciation of classical Indian philosophy in its own terms, set against the background of its unique assumptions and historical and cultural development, Indian Epistemology and Metaphysics is an invaluable guide to the current state of scholarship on Indian philosophy. It is a timely and much-needed reference resource, the first of its kind.

CREATING AN INCLUSIVE SCHOOL Sep 01 2022 With the proclamation of human rights and impact of the philosophy of humanism, there has been a worldwide call for providing humane treatment to the disabled and putting an end to their isolation. Written in the same context, the book developed as per the issued directives of NCTE equips its readers with the knowledge, understanding, skills, interests and attitude needed for working in the inclusive schools. It acquaints them with all the essentials related to the nature of the different types of disabilities or impairments, diversities and exceptionalities of the children belonging to an inclusive school, the need and means of introducing the required adaptations in the

environmental conditions, curriculum, teaching-learning strategies, teaching-learning aids and equipment, methods of assessing the progress of the diverse children, and likewise so many other things and requirements for fulfilling their responsibilities towards the diverse children in the inclusive set-up of the school. It is primarily designed for the students of secondary and elementary teacher education (B.Ed., B.El. Ed., D.Ed.) of the teacher training institutes. KEY FEATURES • Full coverage of the current syllabi prescribed for B. Ed., B. El. Ed. and D. Ed. in a user-friendly language • Comprehensive description of the various aspects of inclusive education and children with special needs (CWSN) such as historical perspectives to disability and inclusive education, needed pedagogical and assessment approaches for CWSN, educational provisions for the disabled at national and international levels, and so forth • Inclusion of recent topics such as learning styles in the context of different types of disabilities and CWSN, forms of exclusions on various grounds including disabilities in Indian education, approaches and models of inclusion, individual education programme, assistive and adaptive technologies, and so on • Comprises chapter-end summary for quick glance of the concepts TARGET AUDIENCE • B.Ed. • B. El. Ed. • D.Ed. *Science and Civilisation in China: Chemistry and chemical technology. Part 1. Paper and printing ; Part 2. Stolen Legacy Jan 01 2020 For centuries the world has been misled about the original source of the Arts and Sciences; for centuries Socrates, Plato and Aristotle have been falsely idolized as models of intellectual greatness; and for centuries the African continent has been called the Dark Continent, because Europe coveted the honor of transmitting to the world, the Arts and Sciences. It is indeed surprising how, for centuries, the Greeks have been praised by the Western World for intellectual accomplishments which belong without a doubt to the Egyptians or the peoples of North Africa.

PEDAGOGY OF SOCIAL SCIENCES Feb 23 2022 Written in an easy-to-understand style, the text has been thoroughly revised in tune with the spirit and need of the new nomenclature Pedagogy of Social Sciences in place of the old designation Teaching of Social Studies. It reflects on the theoretical knowledge and practical skills required to

teach Social Sciences in an effective manner. Introducing new chapters, the second edition of the book mainly focuses on improving the methodological concepts of the Social Sciences teachers. In doing so, it covers various strategies and devices of teaching Social Sciences, e-learning in Social Sciences, e-learning resources in Social Sciences, and professional growth of the Social Sciences teacher. Besides, the chapters of the previous edition have been updated, with the required information given in various new sections. This book is suitable for a course on 'Pedagogy of Social Sciences' for the students of B.Ed. and M.A. (Education). It can also be used for the in-service teacher education programmes organized by the Central and State education boards. NEW TO THE SECOND EDITION □ In addition to the four new chapters, the book now incorporates several new sections: • Concept and meaning of the term Social Sciences; distinguishing the subject Social Sciences from Natural Sciences and the subject Social Studies; justification for using the term teaching/pedagogy of Social Sciences in place of teaching/pedagogy of Social Studies (Chapter 1) • Bloom's revised taxonomy, 2001 (Chapter 4) • Views of NCF and Focus Group (NCERT) about curriculum at the various stages of school education (Chapter 5) • Survey method and cooperative learning method for the teaching of Social Sciences (Chapter 7) • Reference books in Social Sciences (Chapter 9) • Atlases, newspapers, digital audio recorders and players and documentaries as instructional material or teaching aids (Chapter 11) • Question banks, grading system, open book examinations and use of rubrics as the means and ways for improving the evaluation programmes in Social Sciences (Chapter 23) □ Also, the chapter on 'Relationship of Social Studies with other Subjects' has been replaced with a more comprehensive and detailed chapter on 'Correlation in Social Sciences' (Chapter 6). KEY FEATURES □ Chapter-end summary and study questions to help readers review the important topics and drill the concept discussed, respectively. □ Numerous figures and tables to facilitate easy understanding of the concepts. □ References and Suggested Readings to provide scope for further reading.

Elements of Algebraic Coding Theory Sep 28 2019 Coding theory came into existence in the late 1940's and is concerned with devising efficient encoding and decoding procedures. The book is intended as a principal text for first courses in coding and algebraic coding theory, and is aimed at advanced undergraduates and recent graduates as both a course and self-study text. BCH and cyclic, Group codes, Hamming codes, polynomial as well as many other codes are introduced in this textbook. Incorporating numerous worked examples and complete logical proofs, it is an ideal introduction to the fundamental of algebraic coding.
