*Understanding Violence* Apr 14 2021 What impels human beings to harm others--family members or strangers? And how can these impulses and actions be prevented or controlled? Heightened public awareness of and concern about what is widely perceived as a recent explosion of violence, on a spectrum from domestic abuse to street crime to terrorism has motivated behavioral and social scientists to cast new light on old questions. Many hypotheses have been offered. In this book Elizabeth Kandel Englander sorts, structures, and evaluates them. She draws on contemporary research and theory in varied fields--clinical and social psychology, sociology, criminology, psychiatry, social work, neuropsychology, behavioral genetics, and education--to present a uniquely balanced, integrated, and readable summary of what we currently know about the causes and effects of violence. Throughout, she emphasizes the necessity of distinguishing among different types of violent behavior and of realizing that nature and nurture interact in human development. There are no simple answers and many well-accepted "facts" must be challenged. This thoroughly revised and expanded second edition of *Understanding Violence* will be welcomed by all those concerned with violent offenders and their victims, and by their students and trainees. New chapters discuss: \*biological and psychological factors in violence; \*developmental and social learning factors in violence; and \*youth violence, including gang conflicts and school shootings. *Documenting American Violence* Jun 04 2020 Violence forms a constant backdrop to American history, from the revolutionary overthrow of British rule, to the struggle for civil rights, to the present-day debates over the death penalty. It has served to challenge authority, defend privilege, advance causes, and throttle hopes. In the first anthology of its kind to appear in over thirty years, *Documenting American Violence* brings together excerpts from a wide range of sources about incidents of violence in the United States. Each document is set into context, allowing readers to see the event through the viewpoint of contemporary participants and witnesses and to understand how these deeds have been excused, condemned, or vilified by society. Organized topically, this volume looks at such diverse topics as famous crimes, vigilantism, industrial violence, domestic abuse, and state-sanctioned violence. Among the events these primary sources describe are: --Benjamin Franklin's account of the Conestoga massacre, when an entire village of American Indians was killed by the Paxton Boys, a group of frontier settlers --militant abolitionist John Brown's attack on Harper's Ferry --Ida B. Wells' condemnation of lynchings in the South --the massacre of General Custer's 7th Cavalry at Little Bighorn, as witnessed by Cheyenne war chief Two Moon --Nat Turner's confession about the slave revolt he led in Southampton County, Virginia --Oliver Wendell Holmes' diaries and letters as a young infantry officer in the Civil War --a police officer's account of the Haymarket Trials --Harry Thaw's murder of the Gilded Age's most prominent architect, Stanford White, through his own published version of the events --the post-trial, public confessions of Ray Bryant and J.W. Milam for the murder of Emmett Till --the Los Angeles Police Department's investigation into the causes of the 1992 riot Taken as a whole, this anthology opens a new window on American history, revealing how violence has shaped America's past in every era.

*Decriminalizing Domestic Violence* Nov 21 2021 Decriminalizing Domestic Violence asks the crucial, yet often overlooked, question of why and how the criminal legal system became the primary response to intimate partner violence in the United States. It introduces readers, both new and well versed in the subject, to the ways in which the criminal legal system harms rather than helps those who are subjected to abuse and violence in their homes and communities, and shares how it drives, rather than deters, intimate partner violence. The book examines how social, legal, and financial resources are diverted into a criminal legal apparatus that is often unable to deliver justice or safety to victims or to prevent intimate partner violence in the first place. Envisioned for both courses and research topics in domestic violence, family violence, gender and law, and sociology of law, the book challenges readers to understand intimate partner violence not solely, or even primarily, as a criminal law concern but as an economic, public health, community, and human rights problem. It also argues that only by viewing intimate partner violence through these lenses can we develop a balanced policy agenda for addressing it. At a moment when we are examining our national addiction to punishment, *Decriminalizing Domestic Violence* offers a thoughtful, pragmatic roadmap to real reform.

*Sourcebook on Feminist Jurisprudence* Jun 24 2019 This book is a comprehensive analysis of the relationship between feminist theories and the law, and the way in which developments of the former have affected, and been affected by, the latter. The book takes as its starting point a study of women and culture on an international level, which demonstrates how religious and cultural influences have been fundamental in establishing contemporary legal and social mores. This provides the setting for an investigation into legal and social discrimination and inequality, and how this has been addressed by the emergence of feminism. A number of critiques and developments are examined.

**Violence Jun 16 2021** In the popular misconception fostered by blockbuster action movies and best-selling thrillers--not to mention conventional explanations by social scientists--violence is easy under certain conditions, like poverty, racial or ideological hatreds, or family pathologies. **Randall Collins** challenges this view in *Violence*, arguing that violent confrontation goes against human physiological hardwiring. It is the exception, not the rule--regardless of the underlying conditions or motivations. **Collins** gives a comprehensive explanation of violence and its dynamics, drawing upon video footage, cutting-edge forensics, and ethnography to examine violent situations up close as they actually happen--and his conclusions will surprise you. Violence comes neither easily nor automatically. Antagonists are by nature tense and fearful, and their confrontational anxieties put up a powerful emotional barrier against violence. **Collins** guides readers into the very real and disturbing worlds of human discord--from domestic abuse and schoolyard bullying to muggings, violent sports, and armed conflicts. He reveals how the fog of war pervades all violent encounters, limiting people mostly to bluster and bluff, and making violence, when it does occur, largely incompetent, often injuring someone other than its intended target. **Collins** shows how violence can be triggered only when pathways around this emotional barrier are presented. He explains why violence typically comes in the form of atrocities against the weak, ritualized exhibitions before audiences, or clandestine acts of terrorism and murder--and why a small number of individuals are competent at violence. *Violence* overturns standard views about the root causes of violence and offers solutions for confronting it in the future.

**Youth Violence Prevention Jul 26 2019** This important book deals with the problem of youth violence by attacking it at the grass-roots level -- the community.

**Sourcebook on the Foundations of Social Protection Delivery Systems Jan 30 2020** The *Sourcebook on the Foundations of Social Protection Delivery Systems* synthesizes real-world experiences and lessons learned of social protection delivery systems from around the globe. It takes a broad view of social protection, covering various intended populations such as poor or low-income families, unemployed workers, persons with disabilities, and individuals facing social risks. It discusses many types of interventions that governments provide to individuals, families, or households, including categorical programs, poverty-targeted programs, labor benefits and services, disability benefits and services, and social services. The *Sourcebook* seeks to address concrete "how-to?" questions, including: • How do countries deliver social protection benefits and services? • How do they do so effectively and efficiently? • How do they ensure dynamic inclusion, especially for the most vulnerable and needy? • How do they promote better coordination and integration—not only among social protection programs but also among programs in other parts of government? • How can they meet the needs of their intended populations and provide a better client experience? The *delivery systems framework* elaborates on the key elements of that operating environment. The framework is anchored in core implementation phases along the delivery chain. Key actors, including people and institutions, interact all along that delivery chain. Those interactions are facilitated by communications, information systems, and technology. This framework can apply to the delivery of one or many programs and to the delivery of adaptive social protection. The *Sourcebook* structures itself around eight key principles that can frame the delivery systems mind-set: 1. There is no single blueprint for delivery systems, but there are commonalities, and those common elements constitute the core of the delivery systems framework. 2. Quality of implementation matters, and weaknesses in any of the core elements will negatively affect the entire system, reducing the impacts of the program(s) they support. 3. Delivery systems evolve over time, in a nonlinear fashion, and their starting points matter. 4. Efforts should be made to "keep it simple?" and to "do simple well,?" from the start. 5. The "first mile?"—people's direct interface with administrative functions—is often the weakest link in the delivery chain; improving it may take systemic change but will greatly improve overall efficiencies and mitigate the risk of failures on the frontlines. 6. Social protection programs do not operate in a vacuum, and thus their delivery systems should not be developed in silos; synergies across institutions and information systems are possible and can improve program outcomes. 7. Social protection delivery systems can contribute more broadly to government's ability to serve other sectors, such as health insurance subsidies, scholarships, social energy tariffs, housing benefits, and legal services. 8. The dual challenges of inclusion and coordination are pervasive and perennial and encourage the continuous improvement of delivery systems, through a dynamic, integrated, and human-centered approach.

**Breaking the Silence Oct 09 2020** Children of violence need to be heard. Unable or unwilling to verbalize their suffering, abused children are often immobilized by fear, rage, guilt, and pain. In the second edition of *Breaking the Silence: Art Therapy with Children from Violent Homes*, **Cathy Malchiodi** demonstrates the unique power of art therapy as a tool for intervening with children from violent backgrounds. In this new edition, she describes the intervention process from intake to termination, noting the complex issues involved at various levels of evaluation and interpretation. Bringing her years of experience in working at battered women's shelters to bear on the subject, **Ms. Malchiodi** brings the language of art therapy to life—a language of art that gives children a voice and those who work with them, a way of listening. The emphasis here is on the short-term setting where time is at a premium and circumstances are unpredictable. It is within this setting that mental health practitioners often experience frustration and a sense

of helplessness in their work with the youngest victims of abusive families. Since the first edition of this book was published, research has led to some new ideas related to sexual abuse. The author analyzes several issues concerning the treatment of sexually abused children and art expressions of sexually abused children. In addition, Ms. Malchiodi launches a discussion about the ethical issues in the use of children's art as a whole. Featured throughout the book are 95 drawings by abused children. These drawings are at once poignant and hopeful, clearly representing the extraordinary suffering that abused children experience at, at the same time, showing that they can be reached. Because the practice of art therapy methods has been integrated into many disciplines, the final chapter covers development of art therapy programs for children. The author shares information on art supplies, space, and storage ideas. For art therapists, social workers, and other practitioners who work with children in crisis, this book presents a practical methodology for intervention that fosters the compassion and insight necessary to reveal what words cannot.

Sourcebook on Violence Against Women Aug 31 2022 Jonathan Letterman was an outpost medical officer serving in Indian country in the years before the Civil War, responsible for the care of just hundreds of men. But when he was appointed the chief medical officer for the Army of the Potomac, he revolutionized combat medicine over the course of four major battles Antietam, Fredericksburg, Chancellorsville, and Gettysburg that produced unprecedented numbers of casualties. He made battlefield survival possible by creating the first organized ambulance corps and a more effective field hospital system. He imposed medical professionalism on a chaotic battlefield. Where before 20 percent of the men were unfit to fight because of disease, squalid conditions, and poor nutrition, he improved health and combat readiness by pioneering hygiene and diet standards. Based on original research, and with stirring accounts of battle and the struggle to invent and supply adequate care during impossible conditions, this new biography recounts Letterman's life from his small-town Pennsylvania beginnings to his trailblazing wartime years and his subsequent life as a wildcatter and the medical examiner of San Francisco. At last, here is the missing portrait of a key figure of Civil War history and military medicine. His principles of battlefield care continue to be taught to military commanders and first responders.

Violence, Gender and Justice Sep 27 2019 'This is a very impressive piece of thorough scholarship. It is an important book that highlights the need to consider gender when developing policies to respond to interpersonal violence. It is written in a clear and accessible style and should be required reading for all criminal justice students.' - Dr Malcolm Cowburn, Sheffield Hallam University This comprehensive text provides an overview of the relationship between violence, gender, crime and justice. It brings together theory with contemporary cases to enable the reader to understand the key concepts, issues and connections involved. Enlightening and accessible, the book examines the experiences and treatment of men and women as victims and criminals. It explores whether and how offending patterns differ according to gender, and investigates the connections between gender, offending and victimisation. The book covers different types of inter-personal violence including sexual violence, 'domestic' violence, 'domestic' murder, male-on-male violence and child abuse. It explores how sexual and 'domestic' violence have been represented in the media, in the law and in criminal justice processes. Not only does the book present a comprehensive introduction to the field, it also offers reflective questions at the end of each chapter to enable the reader to integrate and interrogate the material covered. Chapter summaries and annotated bibliographies enhance the learning process by helping students to consolidate and further investigate key points. This book is essential for students and academics in criminology, criminal justice, sociology and gender studies.

Safety Planning with Battered Women Jan 12 2021 Safety Planning with Battered Women introduces a new model of woman-defined advocacy that is designed to bridge the gap that sometimes occurs between a battered woman's perspective and a victim advocate's perception. Created to improve service delivery to women who are victims of domestic violence, this new model emphasizes placing attention on the victim's assessment of the risk in a violent relationship and in her decision making. Authors Jill Davies, Eleanor Lyon, and Diane Monti-Catania strive to help advocates better understand battered women's decisions, including the decision to remain in an abusive relationship; to improve advocacy for victims with varying cultural backgrounds and experiences; and to provide advocates with assistance in redesigning their services, so they may better meet the needs of battered women. Since there are no quick fixes to the problems encountered in cases of domestic violence, it is vital that victims be provided with a real understanding of their options and the opportunity to implement those safety plans they deem most feasible. Safety Planning with Battered Women helps advocates tailor alternatives that will enhance the safety of battered women based on the individual realities of battered women. This book is both enlightening and highly practical and is a must read for anyone working with domestic violence victims. By introducing a woman-defined model and offering a new approach to advocacy, Safety Planning with Battered Women will compel readers to reexamine current approaches and examine the future provision of services to domestic violence victims, making it a valuable resource for students, researchers, academics, professionals, and practitioners.
