Intermediate Accounting, Volume 2 Nov 29 2019
Intermediate Accounting, 12th Edition, Volume 2, continues to be the number one intermediate accounting resource in the Canadian market. Viewed as the most reliable resource by accounting students, faculty, and professionals, this course helps students understand, prepare, and use financial information by linking education with the real-world accounting environment. This new edition now incorporates

new data analytics content and up-to-date coverage of leases and revenue recognition.

<u>Advances in Conceptual Modeling</u> Oct 21 2021 The objective of the workshops associated with the ER'99 18th International Conference on Conceptual Modeling is to give participants access to high level presentations on specialized, hot, or emerging scientific topics. Three themes have been selected in this respect: — Evolution and Change in Data Management (ECDM'99) dealing with han dling the evolution of data and data structure, — Reverse Engineering in Information Systems (REIS'99) aimed at exploring the issues raised by legacy systems, — The World Wide Web and Conceptual Modehng (WWWCM'99) which ana lyzes the mutual contribution of WWW resources and techniques with con ceptual modeling. ER'99 has been organized so that there is no overlap between conference ses sions and the workshops. Therefore participants can follow both the conference and the workshop presentations they are interested in. I would like to thank the ER'99 program co-chairs, Jacky Akoka and Mokrane Bouzeghoub for having given me the opportunity to organize these workshops. I would also like to thank Stephen Liddle for his valuable help in managing the evaluation procedure for submitted papers and helping to prepare the workshop proceedings for publication. August 1999 Jacques Kouloumdjian Preface for ECDM'99 The first part of this volume contains the proceedings of the First International Workshop on Evolution and Change in Data Management, ECDM'99, which was held in conjunction with the 18th International Conference on Conceptual Modehng (ER'99) in Paris,

France, November 15-18, 1999.

Questions in Dynamic Semantics Dec 23 2021 Amsterdam is one of the breeding grounds for the formal study of logic and language, for dynamic semantics, and for the study of questions and answers. This book brings together work on the topic as it has been developed in Amsterdam. It illustrates how semantic/pragmatic stance can be used for problems in other areas of linguistic theorising.

Cybersecurity Issues in Emerging Technologies Mar 14 2021 The threat landscape is evolving with tremendous speed. We are facing an extremely fast-growing attack surface with a diversity of attack vectors, a clear asymmetry between attackers and defenders, billions of connected IoT devices, mostly reactive detection and mitigation approaches, and finally big data challenges. The clear asymmetry of attacks and the enormous amount of data are additional arguments to make it necessary to rethink cybersecurity approaches in terms of reducing the attack surface, to make the attack surface dynamic, to automate the detection, risk assessment, and mitigation, and to investigate the prediction and prevention of attacks with the utilization of emerging technologies like blockchain, artificial intelligence and machine learning. This book contains eleven chapters dealing with different Cybersecurity Issues in Emerging Technologies. The issues that are discussed and analyzed include smart connected cars, unmanned ships, 5G/6G connectivity, blockchain, agile incident response, hardware assisted security, ransomware attacks, hybrid threats and

cyber skills gap. Both theoretical analysis and experimental evaluation of state-of-the-art techniques are presented and discussed. Prospective readers can be benefitted in understanding the future implications of novel technologies and proposed security solutions and techniques. Graduate and postgraduate students, research scholars, academics, cybersecurity professionals, and business leaders will find this book useful, which is planned to enlighten both beginners and experienced readers.

BMW 5 Series (E28) Service Manual 1982, 1983, 1984, 1985, 1986, 1987 1988 Jun 28 2022 The BMW 5 Series (E28) Service Manual: 1982-1988 is a comprehensive, single source of service information and specifications for BMW 5-Series (E28) cars from 1982-1988. Whether you're a professional technician or a do-it-yourself BMW owner, this manual will help you understand, maintain, and repair systems on 5-Series cars. BMW E28 Models and engines covered in this BMW repair manual: 528e (B27, 2.7 liter) 533i (B32, 3.2 liter) 535i (B34, 3.5 liter) 535is (B34, 3.5 liter) BMW E28 Transmissions covered in this BMW repair manual: Getrag 260 (with integral bellhousing) Getrag 265 (with removable bellhousing) Technical features: Complete preventive maintenance procedures from the yearly brake fluid change to resetting the oil service indicator and oxygen sensor lights. This manual tells you what to do, how and when to do it and why it's important. Many of the maintenance recommendations exceed factory-recommended service intervals and are designed to extend your BMW's service life. Detailed troubleshooting and repair information for these Bosch fuel injection and engine management

systems: Motronic (528e, 533i, 535i, 535is) and Motronic 1.1 (528e from March 1987). This Motronic 1.1 service information is not covered in BMW's factory repair manual. Comprehensive Engine Management information for specific BMW 5-Series driveability problems, including troubleshooting electronically-controlled idle speed faults that are frequently misdiagnosed. Troubleshooting tips with fast, proven repair procedures used by BMW technicians and specialists. Critical updates and hard-to-find information from dealer service bulletins, such as how to replace the camshaft timing belt, sprocket and tensioner with the correct Z-127 update, and cylinder head bolt replacement on 528e models. Large, easy-to-read wiring schematics for major circuits, along with a full listing of ground points, connector and splice locations, and electronic component locations. Procedures and specifications for rebuilding engines and manual transmissions.

Blockchain for Decision Makers Dec 31 2019 Understand how blockchain works and explore a variety of strategies to implement it in your organization effectively Key FeaturesBecome familiar with business challenges faced by companies when using blockchainDiscover how companies implement blockchain to monetize and secure their dataStudy real-world examples to understand blockchain and its use in organizationsBook Description In addition to cryptocurrencies, blockchain-based apps are being developed in different industries such as banking, supply chain, and healthcare to achieve digital transformation and enhance user experience. Blockchain is not only about Bitcoin or cryptocurrencies, but also about different technologies such

as peer-to-peer networks, consensus mechanisms, and cryptography. These technologies together help sustain trustless environments in which digital value can be transferred between individuals without intermediaries. This book will help you understand the basics of blockchain such as consensus protocols, decentralized applications, and tokenization. You'll focus on how blockchain is used today in different industries and the technological challenges faced while implementing a blockchain strategy. The book also enables you, as a decision maker, to understand blockchain from a technical perspective and evaluate its applicability in your business. Finally, you'll get to grips with blockchain frameworks such as Hyperledger and Quorum and their usability. By the end of this book, you'll have learned about the current use cases of blockchain and be able to implement a blockchain strategy on your own. What you will learnBecome well-versed with how blockchain worksUnderstand the difference between blockchain and BitcoinLearn how blockchain is being used in different industry verticals such as finance and retailDelve into the technological and organizational challenges of implementing blockchainExplore the possibilities that blockchain can unlock for decision makersChoose a blockchain framework best suited for your projects from options such as Ethereum and Hyperledger FabricWho this book is for This book is for CXOs, business professionals, organization leaders, decision makers, technology enthusiasts, and managers who wish to understand how blockchain is implemented in different organizations, its impact, and how it can be customized according to business needs. Prior experience with

blockchain is not required.

Cyberfactories Apr 14 2021 ÔOnly the polyglott Barbara Czarniawska, a keen ethnographer of organizations, could give us a picture of the production of news in the age of digital reproduction. By a close description of the process through which news agencies elaborate this exquisitely complex product Ð the piece of news Ð she manages to give us a realistic interpretation of what technology and globalization do to journalism. Far from indicating the end of the trade and the dissolution of its credibility, her careful and witty account shows the many ways in which authority of information may be regained. Walter Lippmann would have loved this book.Õ Ð Bruno Latour, Sciences Po Paris, France ÔTT, Ansa, Reuters are not intermediaries that transfer information to their clients, rather they are producers of the news. . . or better, in this book, they are fac(s)tories. This passionate journey into the management of overflow of news input and output starts with the question: when a flow is an overflow? How do people daily survive such overflow? Read the book and discover how the answer is simpler than expected!Õ Ð Silvia Gherardi, University of Trento, Italy Have you ever wondered how organizations decide which news is important? This insightful book portrays in detail everyday work in three news agencies: Swedish TT, Italian ANSA and the worldwide Reuters. This unique study is about organizing rather than journalism, revealing two accelerating phenomena: cybernization (machines play a more and more central role in news production) and cyborgization (people rely more and more on machines). Barbara Czarniawska reveals that technological

developments lead to many unexpected consequences and complications. Cyberfactories will prove essential to researchers interested in contemporary forms of organizing, studies of technology, and media. It will also appeal to a lay reader interested in how news is produced.

200 Women Apr 02 2020 "200 women from around the world, famous and unknown, answer the same 5 questions, such as "What really matters to you?" and "What would you change in the world if you could?" The answers are inspiring, moving, sometimes funny, sometimes painful, but always powerful. Interviewees include Graca Michel, widow of Nelson Mandela and an impressive political and social activist, author Margaret Atwood, Nobel laureate Jody Williams, US Supreme Court Justice Ruth Bader Ginsberg, and women from around the world making a difference. Each interview is accompanied by a photographic portrait, resulting in a volume that is compelling in word and image as it is global in its scope. It is published to coincide with an interactive website, and a photographic exhibition. New Zealand interviewees include, Louise Nicholas, Marilyn Waring, Damaris Coulter, Kimbra Johnson, Lydia Ko, Marama Fox, Eva McGauley and Karen Walker"--Taken from publisher's website.

Driver Acceptance of New Technology May 04 2020
Acceptance of new technology and systems by drivers is an important area of concern to governments, automotive manufacturers and equipment suppliers, especially technology that has significant potential to enhance safety. To be acceptable, new technology must be useful and satisfying to use. If not, drivers will not want to have it, in which case it will never achieve the intended safety benefit. Even if they have the technology, drivers may not use it if it is deemed unacceptable, or may not use it in the manner intended by the designer. At worst, they may seek to disable it. This book brings into a single edited volume the accumulating body of thinking and research on driver and operator acceptance of new technology. Bringing together contributions from international experts from around the world, the editors have shaped a book that covers the theory behind acceptance, how it can be measured and how it can be improved. Case studies are presented that provide data on driver acceptance of a wide range of new and emerging vehicle technology. Although driver acceptance is the central focus of this book, acceptance of new technology by operators in other domains, and across cultures, is also investigated. Similarly, perspectives are derived from domains such as human computer interaction, where user acceptance has long been regarded as a key driver of product success. This book comes at a critical time in the history of the modern motor vehicle, as the number of new technologies entering the modern vehicle cockpit rapidly escalates. The goal of this book is to inspire further research

and development of new vehicle technology to optimise user acceptance of it; and, in doing so, to maximise its potential to be useful, satisfying to use and able to save human life. *Optical Information Systems* Jun 16 2021

International GAAP 2015 Sep 27 2019 IFRSs, the standards set by the International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special; and that is why International GAAP® 2015 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP® 2015 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of approach unavailable elsewhere. It shows how difficult practical issues should be approached in the complex, global world of international financial reporting, where IFRSs have become the accepted financial reporting system in more than 100 countries. This integrated approach provides a unique level of authoritative material for anyone

involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. All aspects of the detailed requirements of IFRS are dealt with on a topic-by-topic basis. Each chapter of International GAAP® 2015 deals with a key area of IFRS and has a common structure for ease of use: An introduction to the background issues An explanation of relevant principles A clear exposition of the requirements of IFRS A discussion of the implications in practice and possible alternative solutions available Worked examples Extracts from real company accounts A full listing of the required disclosures "...an important part to play in the process of promoting consistent, comparable and high quality financial reporting under IFRSs ... a book that not only provides an analysis of the requirements of the standards and the principles that they expound, but also presents a unique explanation of how the standards should be interpreted and applied in practice." —The Chairman of Trustees of the IASC Foundation "A standard reference work" —Financial Times "The definitive guide to financial reporting." —The Times

Automotive Ethernet Aug 07 2020 Learn about the latest developments in Automotive Ethernet technology and implementation with this fully revised third edition. Including 20% new material and greater technical depth, coverage is expanded to include detailed explanations of the new PHY technologies 10BASE-T1S (including multidrop) and 2.5, 5, and 10GBASE-T1, discussion of EMC interference models, and description of the new TSN standards for automotive use. Featuring details of security

concepts, an overview of power saving possibilities with Automotive Ethernet, and explanation of functional safety in the context of Automotive Ethernet. Additionally provides an overview of test strategies and main lessons learned. Industry pioneers share the technical and non-technical decisions that have led to the success of Automotive Ethernet, covering everything from electromagnetic requirements and physical layer technologies, QoS, and the use of VLANs, IP and service discovery, to network architecture and testing. The guide for engineers, technical managers and researchers designing components for in-car electronics, and those interested in the strategy of introducing a new technology.

BMW MINI Oct 09 2020 The R-Series BMW MINI had a lot to live up to. Launched in 2001, it was riding in the wake of the classic 1959-2000 Mini. At the time, BMW were going to have to create something as special and innovative as its longstanding predecessor in order to silence the naysayers. And they did. Since its launch in 2001, BMW's modern MINI has become the pinnacle of small yet funky family cars in the premium small (and sometimes not so mall) car segment. Now in its third generation, having unveiled the new F-Series in 2014, BMW MINI offers 3- and 5-door hatchback models and convertibles, the estate

Clubman, the five-door Countryman, the Coupe, the Roadster and the three-door crossover Paceman. MINI enthusiast and motoring journalist Sophie Williamson-Stothert explores the journey from 1959 to the present day, covering design and development of the new MINI, launch and reception by the press, its many model variations and special editions, and an owner's and buyer's guide. Superbly illustrated with 170 colour photographs.

Navigation and Intelligent Transportation Systems Dec 11 2020 Navigation and Intelligent Transportation Systems contains 40 papers covering the technical and functional aspects of these systems including: 3D mapping, route guidance, cellular phone access, electronic compasses, and the history and future of navigation systems. The book also covers the important role of navigation in Intelligent Transportation Systems concerned with traffic management, traveler information, vehicle control systems, commercial vehicle operations, and public and rural transportation systems. The book concludes with a chapter on the Intelligent Vehicle Initiative, a joint program between the National Highway Traffic Safety Administration, the Federal Highway Administration, and the Federal Transit Administration.

Production and Operations Management Jul 26 2019 This informative anthology provides convenient, inexpensive access to current, carefully selected articles from such sources as Production and Inventory Management Journal, Forbes, Fortune, National Productivity Review, APICS--The Performance Advantage, and Business Week. The readings cover performance improvement; quality; human resources management for productivity; forecasting and product design; capacity, location, logistics, and layout planning; inventory and supply-chain management, and emerging trends.

Crisis Management of BMW Motorrad Australia Mar 02 2020 Research Paper (undergraduate) from the year 2010 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,3, Griffith University (Business School), language: English, abstract: 1. Introduction This assignment deals with the management of crisis. First of all, crisis and company crisis will be defined. Secondly, the characteristics of a crisis will be identified. Furthermore, theory about crisis management and crisis planning will be provided. In this context, guidelines, preparation and goals of crisis management will be described. Moreover, different tables will provide additional information and describe the crisis management of BMW. 1.1 Crisis definition According to Heath and Millar (2004, p. 2), a crisis is an inappropriate and inconvenient event that has negative consequences for everybody who is concerned. Argenti (2009, pp. 258-259) states that a crisis is a "major catastrophe" and argues that these catastrophes are either a result of "natural disaster" or

"caused by human error, negligence, or ... malicious intent". Argenti (2009) argues that a crisis is something everybody can identify with. 1.2 What is a company crisis? Stacks (2004) states that all organisations will at some time be affected by a crisis. Fearn-Banks defines a company crisis as a "major occurrence with a potentially negative outcome affecting an organization, company, industry, as well as its publics, products, services, or good name" (Fearn-Banks as cited in Heath & Millar, 2004, p. 5).

Interactive Design 1 May 28 2022 Interactive Design 1 is the continuation of Graphis's effort to document the ever-expanding realms of new interactive media. Selected from hundreds of submissions to a call-for-entries, the designs shown here take their cues from many different sources, including such companies as Levi's, BMW, Tag Heuer, IBM, and Apple, as well as studios seeking to promote their own identities. Featured designs represent an array of media options, including websites, CD-ROMS, interactive kiosks, DVD software, and new interactive tools. An editorial commentary offers a frank exchange between writer Lyle Rexer and Robert Greenberg, chairman and CEO of R/GA interactive, who discusses both his pioneering past and the "third revolution" he sees in store for the future. Credits, project descriptions, and indices complete this book as a great resource for both designer and client.

Principles of Marketing Feb 22 2022 The 6th edition of Principles of Marketing makes the road to learning and teaching marketing more effective, easier and more enjoyable than ever. Today's marketing is about creating customer value and building profitable customer

relationships. With even more new Australian and international case studies, engaging real-world examples and up-to-date information, Principles of Marketing shows students how customer value–creating and capturing it–drives every effective marketing strategy. The 6th edition is a thorough revision, reflecting the latest trends in marketing, including new coverage of social media, mobile and other digital technologies. In addition, it covers the rapidly changing nature of customer relationships with both companies and brands, and the tools marketers use to create deeper consumer involvement.

Next Generation Information System Technology Oct 01 2022 Currently, the field of information systems technology is rapidly extending into several dimensions. There is the semantic dimension (including object orientation, data

deduction and extended knowledge representation schemes), there is improved systems integration, and there are new tools. All these extensions aim to provide semantically richer and better engineered information systems that allow for more adequate and complete representations and thus extend the effective use of database technology to a wider class of applications. Database researchers and developers, whether they are committed to application or to system construction, are convinced that next-generation information system technology will be heavily determined by a handful of new concepts that they have to understand and work out in detail now. This volume concentrates on the following topics: - Extended data types and data models, database programming languages; - Rule-based data deduction, expert systems, knowledge bases; - Object orientation and semantic data modelling; - DB application development, methodologies and tools; - Interface technology, parallelism, interoperability, ...; - New database applications.

The Referral Mindset Jan 12 2021 Referrals are the most effective way of getting business you will ever use. In fact, referrals are 35% more likely to do business with you and will give you 25% more money. But referrals also are among the most difficult to get. Asking for referrals is a mix of skills, confidence and mindset. Most referral generation techniques don't work. Now Kerry Johnson MBA, Ph.D. will show you the ones that do. Learn: • How to develop a results-focused mindset • Proven techniques in gaining 5 to 10 referrals every week • How to segment your client base • The steps to incumbent advisor relationship • How to get mass

referrals from centers of influence

ECAI 2006 Nov 21 2021 In the summer of 1956, John McCarthy organized the famous Dartmouth Conference which is now commonly viewed as the founding event for the field of Artificial Intelligence. During the last 50 years, AI has seen a tremendous development and is now a well-established scientific discipline all over the world. Also in Europe AI is in excellent shape, as witnessed by the large number of high quality papers in this publication. In comparison with ECAI 2004, there's a strong increase in the relative number of submissions from Distributed AI / Agents and Cognitive Modelling. Knowledge Representation & Reasoning is traditionally strong in Europe and remains the biggest area of ECAI-06. One reason the figures for Case-Based Reasoning are rather low is that much of the high quality work in this area has found its way into prestigious applications and is thus represented under the heading of PAIS.

Wisdom in The Crises of Cyber-Capitalism Aug 26 2019 Now capitalism became more dependent on ICT knowledge and innovative skills with the advent of nanotechnology, bio-chemical researches, DNA engineering, artificial intelligence, quantum computing, IoT, big data, e-governance, industry 4.0 and interactive social media. Nearly all of former tacit knowledge became explicit and has been available for netizens of the cyber world. Even human privacy, government credentials, and business secrets have been revealed easily by wiki-leaks and omnipresent social media. However more than goodness of this kind of improvements and economic development, evil sides of digital divide, trolls, fake accounts, propaganda, social engineering and dirty information has been emerged like thorns to roses. I have aimed to add value to the area by putting a systematic, integrative and disciplined approach to the reality of cyber-capitalism which is a new mode of production and socio-technological relations that covers innovative processes of both public and private domains. Science, politics, economics and nuclear military have

confessed their impotency and insufficiency against a miniscule virus called COVID19 that halted all dynamics and potentialities of the ultra and sub-systems of capitalism. Without rhetorical dogmas of historical materialism and deterministic philosophy against the capitalism, we have tried a unique methodology of Divine point of view to obtain wisdom in the complex systems and intertwining relations using infusion of different knowledge domains in relation with capitalist dynamics.

Perspectives on the Information Society Jul 18 2021 Perspectives on the Information Society is a complete introduction to many of the issues faced in the digital age. It investigates information society services, such as those involving transferring to the Cloud and maintaining customer satisfaction in banking, through to the threats faced from disinformation and online troll movements like Anonymous. The book takes a global perspective, in particular in relation to the United Kingdom and Africa, from both a legal and societal angle. Issues such as IT project success and failure are also discussed. Perspectives on the Information Society serves as an essential reference for those seeking to understand New Media and Network Societies from a service-orientated standpoint.

The effective reorganization of BMW Group applied to the New MINI Nov 09 2020 Inhaltsangabe:

Abstract: The story of the automobile manufacturer production can not be told without the story of Henry Ford, who was one of the pioneers constructing his first horseless carriage in 1896. He incorporated the Ford Motor Company in 1903, proclaiming I will build a car for the great multitude . As predicted he did so in 1908 offering a Model T for $ 950. This model heralds the beginning of the motor age. The car evolved from a former luxury item for the well-to-do to essential transportation for the ordinary man. Ford also revolutionized automobile manufacturing, in 1914 the Ford plant used innovation production techniques and was able to turn out a complete chassis every 95 minutes. That was a revolution in the automobile manufacturing at the time, because the former production time took about 730 minutes to turn out a complete chassis! Ford achieved that fast production time by using a constantly moving assembly line, subdivision of labor, careful coordination of operations and he began to pay nearly double the wages offered by their competitors. His innovations made him an international celebrity in the industrial revolution and he was one of the first who thought about effective organization to achieve a higher productivity. Ford s methods that changed the automobile production were perhaps not mainly the introduction of the assembly line, his goal was also to constantly standardizing the use of craftsmen. That firstly resulted in a high product variety despite in fact that they had been made using the same drawing. Secondly a lot of time was spent in fitting the parts

together. These facts influenced major loss in productivity and under such circumstances a real mass-production was not possible. But by standardizing components and developing work routines was the first scope for an assembly line approach. The target of our case study is to present and analyze the changes in companies organizations, applied to the example of BMW. The opening part will summarize the history of the working and organizing techniques in general. The middle part will focus on the changes in production organization in the automotive industry, followed by the last part analyzing new strategies in Sales & Marketing regarding the rebirth of MINI by the BMW Group. Zusammenfassung: Die vorliegende englischsprachige Projektarbeit behandelt das Thema effektive Reorganisation in Produktion, Vertrieb und Marketing in der Automobilindustrie am [...]

Fahrerassistenzsysteme 2016 Aug 19 2021 Der inhaltliche Schwerpunkt des Tagungsbands zur ATZlive-Veranstaltung " Fahrerassistenzsysteme 2016" liegt auf der noch vergleichsweise wenig ausgeprägten Disziplin IT-Security im und um das vernetzte Fahrzeug. Die Tagung ist eine unverzichtbare Plattform für den Wissens- und Gedankenaustausch von Forschern und Entwicklern aller Unternehmen und Institutionen, die dieses Ziel verfolgen.
