ncbi bookshelf Oct 28 2022 web aug 16 2005
for this genereview the term isolated
methylmalonic acidemia refers to a group of
inborn errors of metabolism associated with
elevated methylmalonic acid mma concentration
in the blood and urine that result from the
failure to isomerize convert methylmalonyl
coenzyme a coa into succinyl coa during
propionyl coa metabolism in

newborn screening wikipedia Aug 26 2022
web newborn screening nbs is a public health

program of screening in infants shortly after birth for conditions that are treatable but not clinically evident in the newborn period the goal

is to identify infants at risk for these conditions early enough to confirm the diagnosis and provide intervention that will alter the clinical course of the disease and prevent or
