**Index, A History of the: A Bookish Adventure from Medieval Manuscripts to the Digital Age** Jun 16 2021 A New York Times Editors' Choice Book Named a Most Anticipated Book of 2022 by Literary Hub and Goodreads A playful history of the humble index and its outsized effect on our reading lives. Most of us give little thought to the back of the book—it's just where you go to look things up. But as Dennis Duncan reveals in this delightful and witty history, hiding in plain sight is an unlikely realm of ambition and obsession, sparring and politicking, pleasure and play. In the pages of the index, we might find Butchers, to be avoided, or Cows that sh-te Fire, or even catch Calvin in his chamber with a Nonne. Here, for the first time, is the secret world of the index: an unsung but extraordinary everyday tool, with an illustrious but little-known past. Charting its curious path from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Duncan uncovers how it has saved heretics from the stake, kept politicians from high office, and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists' living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers, poets, librarians and—of course—indexers along the way. Revealing its vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart—and we have been for eight hundred years.

**A History of Fear** May 16 2021 "Readers, beware: this novel is not safe and will have you questioning what's real for many sleepless nights to come." —Clay McLeod Chapman, author of *The Remaking* "A disorienting, creepy, paranoia-inducing reimagining of the devil-made-me-do-it tale" (Paul Tremblay, author of *The Cabin at the End of the World*) following the harrowing downfall of a tortured graduate student arrested for murder. The Devil is in Scotland. Grayson Hale, the most infamous murderer in Scotland, is better known by a different name: the Devil's Advocate. The twenty-five-year-old American grad student rose to instant notoriety when he confessed to the slaughter of his classmate Liam Stewart, claiming the Devil made him do it. When Hale is found hanged in his prison cell, officers uncover a handwritten manuscript that promises to answer the question that's haunted the nation for years: was Hale a lunatic, or had he been telling the truth all along? Unnervingly, Hale doesn't fit the bill of a killer. The first-person narrative that centers this novel reveals an acerbic young atheist, newly enrolled at the University of Edinburgh to carry on the legacy of his recently deceased father. In need of cash, he takes a job ghostwriting a mysterious book for a dark stranger, but has misgivings when the project begins to reawaken his satanophobia, a rare condition that causes him to live in terror that the Devil is after him. As he struggles to disentangle fact from fear, Grayson's world is turned upside-down after events force him to confront his growing suspicion that he's working for the one he has feared all this time—and that the book is only the beginning of their partnership. **A History of Fear** is a propulsive foray into the darkness of the human psyche, marrying dread-inducing atmosphere and heart-palpitating storytelling.

**These Truths: A History of the United States** Sep 27 2019 New York Times Bestseller In the most ambitious one-volume American history in decades, award-winning historian and New Yorker writer Jill Lepore offers a magisterial account of the origins and rise of a divided nation, an urgently needed reckoning with the beauty and tragedy of American history. Written in elegiac prose, Lepore's groundbreaking investigation places truth itself—a devotion to facts, proof, and evidence—at the center of the nation's history. The American experiment rests on three ideas—"these truths," Jefferson called them—political equality, natural rights, and the sovereignty of the people. And it rests, too, on a fearless dedication to inquiry, Lepore argues, because self-government depends on it. But has the nation, and democracy itself, delivered on that promise? **These Truths** tells this uniquely American story, beginning in 1492, asking whether the course of events over more than five centuries has proven the nation's truths, or belied them. To answer that question, Lepore traces the intertwined histories of American politics, law, journalism, and technology, from the colonial town meeting to the nineteenth-century party machine, from talk radio to twenty-first-century Internet polls, from Magna Carta to the Patriot Act, from the printing press to Facebook News. Along the way, Lepore's sovereign chronicle is filled with arresting sketches of both well-known and lesser-known Americans, from a parade of

presidents and a rogues' gallery of political mischief makers to the intrepid leaders of protest movements, including Frederick Douglass, the famed abolitionist orator; William Jennings Bryan, the three-time presidential candidate and ultimately tragic populist; Pauli Murray, the visionary civil rights strategist; and Phyllis Schlafly, the uncredited architect of modern conservatism. Americans are descended from slaves and slave owners, from conquerors and the conquered, from immigrants and from people who have fought to end immigration. "A nation born in contradiction will fight forever over the meaning of its history," Lepore writes, but engaging in that struggle by studying the past is part of the work of citizenship. "The past is an inheritance, a gift and a burden," These Truths observes. "It can't be shirked. There's nothing for it but to get to know it."

**West Virginia** Jan 24 2022 " An essential resource for scholars, students, and all lovers of the Mountaineer State. From bloody skirmishes with Indians on the early frontier to the Logan County mine war, the story of West Virginia is punctuated with episodes as colorful and rugged as the mountains that dominate its landscape. In this first modern comprehensive history, Otis Rice and Stephen Brown balance these episodes of mountaineer individualism against the complexities of industrial development and the growth of social institutions, analyzing the events and personalities that have shaped the state. To create this history, the authors weave together many strands from the past and present. Included among these are geological and geographical features; the prehistoric inhabitants; exploration and settlement; relations with the Indians; the land systems and patterns of ownership; the Civil War and the formation of the state from the western counties of Virginia; the legacy of Reconstruction; politics and government; industrial development; labor problems and advances; and cultural aspects such as folkways, education, religion, and national and ethnic influences. For this second edition, the authors have added a new chapter, bringing the original material up to date and carrying the West Virginia story through the presidential election of 1992. Otis K. Rice is professor emeritus of history and Stephen W. Brown is professor of history at West Virginia Institute of Technology.

**A History of Marriage** Aug 26 2019 What does the "tradition of marriage" really look like? In *A History of Marriage*, Elizabeth Abbott paints an often surprising picture of this most public, yet most intimate, institution. Ritual of romance, or social obligation? Eternal bliss, or cult of domesticity? Abbott reveals a complex tradition that includes same-sex unions, arranged marriages, dowries, self-marriages, and child brides. Marriage—in all its loving, unloving, decadent, and impoverished manifestations—is revealed here through Abbott's infectious curiosity.

**The Moon** Jul 18 2021 An intimate portrait of the Earth's closest neighbor--the Moon--that explores the history and future of humankind's relationship with it Every generation has looked towards the heavens and wondered at the beauty of the Moon. Fifty years ago, a few Americans became the first to do the reverse--and shared with Earth-bound audiences the view of their own planet hanging in the sky instead. Recently, the connection has been discovered to be even closer: a fragment of the Earth's surface was found embedded in a rock brought back from the Moon. And astronauts are preparing to return to the surface of the Moon after a half-century hiatus--this time to the dark side. Oliver Morton explores how the ways we have looked at the Moon have shaped our perceptions of the Earth: from the controversies of early astronomers such as van Eyck and Galileo, to the Cold War space race, to the potential use of the Moon as a stepping stone for further space exploration. Advanced technologies, new ambitions, and old dreams mean that men, women, and robots now seem certain to return to the Moon. For some, it is a future on which humankind has turned its back for too long. For others, an adventure yet to begin.

**A History of the Modern Fact** Dec 31 2019 How did the fact become modernity's most favored unit of knowledge? How did description come to seem separable from theory in the precursors of economics and the social sciences? Mary Poovey explores these questions in *A History of the Modern Fact*, ranging across an astonishing array of texts and ideas from the publication of the first British manual on double-entry bookkeeping in 1588 to the institutionalization of statistics in the 1830s. She shows how the production of systematic knowledge from descriptions of observed particulars influenced government, how numerical representation became the privileged vehicle for generating useful facts, and how belief—whether figured as credit, credibility, or credulity—remained essential to the production of knowledge. Illuminating the epistemological conditions that have made modern social and economic knowledge possible, *A History of the Modern Fact* provides important contributions to the history of political thought, economics, science, and philosophy, as well as to literary and cultural criticism.

**A History of Books** Nov 02 2022 This new work by Gerald Murnane is a fictionalised autobiography told in thirty sections, each of which begins with the memory of a book that has left an image on the writer's mind. The titles aren't given but the reader follows the clues, recalling in the process a parade of authors, the great, the popular, and the now-forgotten. The images themselves, with their scenes of marital discord, violence and madness, or their illuminated landscapes that point to the consolations of a world beyond fiction, give new intensity to Murnane's habitual concern with the anxieties and aspirations of the writing life, in the absence of religious belief. *A History of Books* is accompanied by three shorter pieces of fiction which play on these themes, featuring the writer at different ages, as a young boy, a teacher, and an old recluse.

**A History of Book Publishing in Contemporary Latin America** Aug 19 2021 This book presents a cultural history of Latin America as seen through a symbolic good and a practice - the book, and the act of publication - two elements that have had an irrefutable power in shaping the modern world. The volume combines multiple theoretical approaches and empirical landscapes with the aim to comprehend how Latin American publishers became the protagonists of a symbolic unification of their continent from the 1930s through the 1970s. The Latin American focus responds to a central point in its history: the effective interdependence of the national cultures of the continent. Americanism, until the 1950s, or Latin Americanism, from the onset of the Cold War, were moral frameworks that guided publishers' thinking and actions and had concrete effects on the process of regional integration. The illustration of how Latin American publishing markets were articulated opens up broader and comparative questions regarding the ways in which the ideas embodied in books also sought to unify other cultural areas. The intersection of cultural, political and economic themes, as well as the style of writing, makes this book an interest to a wide reading public with historical and sociological sensitivity and global cultural curiosity.

**A History of Art History** May 04 2020 "In this authoritative book, the first of its kind in English, Christopher Wood tracks the evolution of the historical study of art from the late middle ages through the rise of the modern scholarly discipline of art history. Synthesizing and assessing a vast array of writings, episodes, and personalities, this original and accessible account of the development of art-historical thinking will appeal to readers both inside and outside the discipline. The book shows that the pioneering chroniclers of the Italian Renaissance--Lorenzo Ghiberti and Giorgio Vasari--measured every epoch against fixed standards of quality. Only in the Romantic era did art historians discover the virtues of medieval art, anticipating the relativism of the later nineteenth century, when art history learned to admire the art of all societies and to value every

work as an index of its times. The major art historians of the modern era, however--Jacob Burckhardt, Aby Warburg, Heinrich Wölfflin, Erwin Panofsky, Meyer Schapiro, and Ernst Gombrich--struggled to adapt their work to the rupture of artistic modernism, leading to the current predicaments of the discipline. Combining erudition with clarity, this book makes a landmark contribution to the understanding of art history."--from book jacket

*A Social History of the Chinese Book* May 28 2022 In this learned, yet readable, book, Joseph McDermott introduces the history of the book in China in the late imperial period from 1000 to 1800. He assumes little knowledge of Chinese history or culture and compares the Chinese experience with books with that of other civilizations, particularly the European. Yet he deals with a wide range of issues in the history of the book in China and presents novel analyses of the changes in Chinese woodblock bookmaking over these centuries. He presents a new view of when the printed book replaced the manuscript and what drove that substitution. He explores the distribution and marketing structure of books, and writes fascinatingly on the history of book collecting and about access to private and government book collections. In drawing on a great deal of Chinese, Japanese, and Western research this book provides a broad account of the way Chinese books were printed, distributed, and consumed by literati and scholars, mainly in the lower Yangzi delta, the cultural center of China during these centuries. It introduces interesting personalities, ranging from wily book collectors to an indigent shoe-repairman collector. And, it discusses the obstacles to the formation of a truly national printed culture for both the well-educated and the struggling reader in recent times. This broad and comprehensive account of the development of printed Chinese culture from 1000 to 1800 is written for anyone interested in the history of the book. It also offers important new insights into book culture and its place in society for the student of Chinese history and culture. 'A brilliant piece of synthetic research as well as a delightful read, it offers a history of the Chinese book to the eighteenth century that is without equal.' - Timothy Brook, University of British Columbia 'Writers, scribes, engravers, printers, binders, publishers, distributors, dealers, literati, scholars, librarians, collectors, voracious readers — the full gamut of a vibrant book culture in China over one thousand years — are examined with eloquence and perception by Joseph McDermott in *The Social History of the Book*. His lively exploration will be of consuming interest to bibliophiles of every persuasion.' - Nicholas A. Basbanes, author of *A Gentle Madness, Patience and Fortitude, A Splendor of Letters, and Every Book Its Reader* Joseph McDermott is presently Fellow of St John's College, Cambridge, and University Lecturer in Chinese at Cambridge University. He has published widely on Chinese social and economic history, most recently on the economy of the Song (or, Sung) dynasty for the *Cambridge History of China*. He has edited *State and Court Ritual in China* and *Art and Power in East Asia*.

**A History of the Book in America** Jan 12 2021 Volume 3 of *A History of the Book in America* narrates the emergence of a national book trade in the nineteenth century, as changes in manufacturing, distribution, and publishing conditioned, and were conditioned by, the evolving practices of authors and readers. Chapters trace the ascent of the "industrial book--a manufactured product arising from the gradual adoption of new printing, binding, and illustration technologies and encompassing the profusion of nineteenth-century printed materials--which relied on nationwide networks of financing, transportation, and communication. In tandem with increasing educational opportunities and rising literacy rates, the industrial book encouraged new sites of reading; gave voice to diverse communities of interest through periodicals, broadsides, pamphlets, and other printed forms; and played a vital role in the development of American culture. *A History of the Book in America* Aug 07 2020 The fifth volume of *A History of the Book in America* addresses the economic, social, and cultural shifts affecting print culture from World War II to the present. During this period factors such as the expansion of government, the growth of higher education, the climate of the Cold War, globalization, and the development of multimedia and digital technologies influenced the patterns of consolidation and diversification established earlier. The thirty-three contributors to the volume explore the evolution of the publishing industry and the business of bookselling. The histories of government publishing, law and policy, the periodical press, literary criticism, and reading--in settings such as schools, libraries, book clubs, self-help programs, and collectors' societies--receive imaginative scrutiny as well. The *Enduring Book* demonstrates that the corporate consolidations of the last half-century have left space for the independent publisher, that multiplicity continues to define American print culture, and that even in the digital age, the book endures. **A History of Reading in the West** Apr 26 2022 Literature has not always been written in the same ways, nor has it been received or read in the same ways over the course of Western civilization. Cavallo (Greek palaeography, U. of Rome La Sapienza), Chartier (Ecole des Hautes Etudes en Sciences Sociales, Paris) and a number of other international contributors, address themes that highlight the transformation of reading methods and materials over the ages, such as the way texts in the Middle Ages were often written with the voice in mind, as they would have been read aloud, or even sung. Articles explore the innovations in the physical evolution of the book, as well as the growth and development of a broad-based reading public.

Covering a time of great hope and incredible change, Reconstruction and Reform is a dramatic look at life after the Civil War in the newly re United States. Railroad tycoons were roaring across the country. New cities sprang up across the plains, and a new and different American West came into being: a land of farmers, ranchers, miners, and city dwellers. Back East, large scale immigration was also going on, but not all Americans wanted newcomers in the country. Technology moved forward: Thomas Edison lit up the world with his electric light. And social justice was on everyone's mind with Carry Nation wielding a hatchet in her battle against drunkenness and Booker T. Washington and W. E. B. DuBois counseling newly freed African Americans to behave in very different ways. **End of History and the Last Man** Apr 02 2020 Ever since its first publication in 1992, The End of History and the Last Man has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, The End of History and the Last Man is a modern classic.

**Year Zero** Jun 24 2019 A marvelous global history of the pivotal year 1945 as a new world emerged from the ruins of World War II Year Zero is a landmark reckoning with the great drama that ensued after war came to an end in 1945. One world had ended and a new, uncertain one was beginning. Regime change had come on a global scale: across Asia (including China, Korea, Indochina, and the Philippines, and of course Japan) and all of continental Europe. Out of the often vicious power struggles that ensued emerged the modern world as we know it. In human terms, the scale of transformation is almost impossible to imagine. Great cities around the world lay in ruins, their populations decimated, displaced, starving. Harsh revenge was meted out on a wide scale, and the ground was laid for much horror to come. At the same time, in the wake of unspeakable loss, the euphoria of the liberated was extraordinary, and the revelry unprecedented. The postwar years gave rise to the European welfare state, the United Nations, decolonization, Japanese pacifism, and the European Union. Social, cultural, and political "reeducation" was imposed on vanquished by victors on a scale that also had no historical precedent. Much that was done was ill advised, but in hindsight, as Ian Buruma shows us, these efforts were in fact relatively enlightened, humane, and effective. A poignant grace note throughout this history is Buruma's own father's story. Seized by the Nazis during the occupation of Holland, he spent much of the war in Berlin as a laborer, and by war's end was literally hiding in the rubble of a flattened city, having barely managed to survive starvation rations, Allied bombing, and Soviet shock troops when the end came. His journey home and attempted reentry into "normalcy" stand in many ways for his generation's experience. A work of enormous range and stirring human drama, conjuring both the Asian and European theaters with equal fluency, Year Zero is a book that Ian Buruma is perhaps uniquely positioned to write. It is surely his masterpiece.

**A History of History** Nov 09 2020 In a provocative analysis of European and American historical thinking and practice since the early 18th century, A History of History confronts several basic assumptions about the nature of history. Among these are the concept of historical realism, the belief in representationalism and the idea that the past possesses its own narrative. Written by one of the leading thinkers on the subject, this book provides an accessible and radical history of history while offering new insights into the pressing questions of the nature, purpose and function of history. This book is an essential text for all students, teachers and consumers of history.

**A History of Liturgical Books from the Beginning to the Thirteenth Century** Nov 21 2021 The history of liturgy and liturgical books is of interest not only for theologians and liturgists but also for historians, art historians, archaeologists, anthropologists, and researchers in religious sciences. This work meets the interdisciplinary need for a history and a typology of liturgical books. A History of Liturgical Books from the Beginning to the Thirteenth Century is an introduction to Western liturgical sources and a synthesis of their history for more than a millennium. It provides a historiographic summary, examines the relationship between medieval history and liturgy, suggests new methods of research, and underscores the fruitfulness of an interdisciplinary approach. Focusing on the history of liturgical books, rather than the history of liturgy, A History of Liturgical Books from the Beginning to the Thirteenth Century devotes a detailed chapter to each type of book intended for a specific celebration - Mass, Office, rites - and a specific presider - pope, bishop, deacon, monastic, etc. The crucial transition from oral practice to the use of the written document is discussed in every case, as is the illustration of liturgical books. Chapters are History of the Research on Liturgical Books, "The Books of the Mass," "The Office Books," and "The Books of Sacraments and Rites." Eric Palazzo, Ph.D., is head of research at Institut de Recherche et d'Histoire des Textes and a lecturer at the Institut superieur de Liturgie of the Institut catholique of Paris, in charge of the introductory course in liturgical sources.
