The Aquarian Gospel of Jesus Christ Oct 22 2021 The Aquarian Gospel of Jesus the Christ is a book by Levi H. Dowling who claimed that he had transcribed the text of the book from the kashic records, a purported compendium of mystical knowledge supposedly encoded in a non-physical plane of existence. In the later 20th century, it was adopted by New Age spiritual groups. The title is derived from the practice in astrology of naming time periods in terms of constellations and their dominant positions in the sky, according to the earth's axial precession. In that system, the Age of Aquarius is approaching.

A Journey Into the Mind of Watts Mar 15 2021

Physics and Philosophy Sep 20 2021 "There is no more eloquent, interesting or persuasive exposition of what may be called science of philosophy than Sir James Jeans's." - The New York Times Can we have any knowledge of the world outside us other than we gain by the methods of science? Are we humans endowed with free will, or are we mere cogs in a vast machine that must follow its predestined course until it finally runs down? Is the world we perceive the world of ultimate reality, or is it only a curtain veiling a deeper reality beyond? In this strikingly lucid and often poetic book, one of the twentieth century's greatest scientists grapples with these age-old questions, achieving in the process a brilliant and non-technical exposition of the interrelationship between physics and philosophy. He begins by defining physics and philosophy, pointing out the difference in their respective attempts to explain physical reality and man's place in it. This discussion paves the way for an outline of epistemological methods in which the rationalism of thinkers like Descartes, Leibniz, and Kant is compared to the empiricism of Locke and Hume. Over the course of the book, in a manner that is careful and methodic but never dull, Jeans marshals the evidence for his startling conclusion: recent discoveries in astronomy, mathematics, sub-atomic physics, and other disciplines have washed away the scientific basis of many older philosophic discussions. Such long-standing problems as causality, free will and determinism, the nature of space and time, materialism and mentalism must be considered anew in the light of new knowledge and information attained by twentieth-century physical science. Even then, however, Jeans cautions against drawing any positive conclusions, pointing out that both physics and philosophy are

both relatively young and that we are still in Newton's words, like children playing with pebbles on the sea-shore, while the great ocean of truth rolls, unexplored, beyond our reach. Although first published in 1943, nothing in physics has happened to affect Jeans's account in this book; it remains remarkably fresh and undated, a classic exposition of the philosophical implications of scientific knowledge.

The Doctrine of Awakening Feb 11 2021 In a probing analysis of the oldest Buddhist texts, Julius Evola places the doctrine of liberation in its original context. The early teachings, he suggests, offer the foremost example of an active spirituality that is opposed to the more passive, modern forms of theistic religions. This sophisticated, highly readable analysis of the theory and practice of Buddhist asceticism, first published in Italian in 1943, elucidates the central truths of the eightfold path and clears away the later accretions of Buddhist doctrine. Evola describes the techniques for conscious liberation from the world of maya and for achieving the state of transcendence beyond dualistic thinking. Most surprisingly, he argues that the widespread belief in reincarnation is not an original Buddhist tenet. Evola presents actual practices of concentration and visualization, and places them in the larger metaphysical context of the Buddhist model of mind and universe. The Doctrine of the Awakening is a provocative study of the teachings of the Buddha by one of Europe's most stimulating thinkers.

Under the Autumn Star Jun 25 2019 Under the Autumn Star Knut Hamsun In Under the Autumn Star, Nobel prize-winning author Knut Hamsun writes a novel magically permeated with the air and light of fall. The narrator, Knut Pedersen (Hamsun's real name) first joins forces with Grindhusen, a man blessed with the faith that "something will turn up," and later with Lars Falkenberg, whose dubious talents include the tuning of pianos. Knut and Lars fetch up as workmen on the estate of Captain Falkenberg (no relation to Lars), with whose wife each falls or fancies himself in love - though this does not prevent either from doing "night duties" in other quarters. In time, Knut is laid off and, in futile pursuit of the woman with whom he is by now helplessly infatuated, finds himself sucked back into the city life he had fled. Antigone Dec 12 2020 Antigone is universally celebrated as the ultimate figure of ethical resistance to the state power which oversteps its legitimate scope and as the defender of simple human dignity (more important than all political struggles). But is she really so innocent and pure? What if there is a dark side to her? What if Creon, the representative of state power, also has a valuable point to make? And what if both Antigone and Creon are part of a problem that only a popular intervention can confront? Žižek's rewriting of this classic play confronts these issues in a practical way: not by theorizing about them, but by imagining an Antigone in which, at a crucial moment, the action takes a different turn, an Antigone along the lines of *Run, Lola, Run* or of Brecht's learning plays. A brilliantly funny, moving and political piece for those who are interested in reading and watching Antigone in an entirely new way.

Language, Logic And God Jan 01 2020 " THIS BOOK is an attempt to fill the present striking need for an introduction to contemporary linguistic philosophy as it bears on theological discourse. Wherever I have gone, recently, among educated Christians in Britain and America, I have encountered profound curiosity—and a good deal of anxiety—concerning modern methods in philosophy as they relate to the logical nature and validity of theological affirmations. Similarly I have found many of my students in contemporary philosophy and in the philosophy of religion becoming deeply absorbed in the issues raised by a critical examination of theological speech. From both groups, the intellectually alert Christians and the thoughtful graduate and undergraduate students of philosophy and religion, I have been heavily bombarded with appeals for direction to some book which would (1) set forth the central issues and arguments concerning theological discourse for readers who have familiarity with traditional philosophy but who are relatively untrained in contemporary philosophical practices and (2) place into perspective the present state of philosophical and theological discussion in this area of burgeoning interest. To my frustration, I have had to answer such requests with the admission that no such book exists and with the promise that I would try, some day, to provide that book myself. In preparing this volume, therefore, I have done my best to keep those promises in mind. "

The Meaning of Love Aug 08 2020 "The meaning and worth of love as a feeling is that it really forces us, with all our being, to acknowledge for another the same absolute significance that, because of the power of egoism, we are conscious of only in our own selves. Love is important, not only as one of our feelings but as the transfer of all our interest in life from ourselves to another, as the shifting of the very center of our lives.... "The meaning of human love, speaking generally, is the justification and salvation

of individuality through the sacrifice of egoism. On this general basis we can also ... explain the meaning of sexual love" (Vladimir Solovyov) What is the meaning of love's intense emotion? Solovyov points to the spark of divinity that we see in another human being and shows how this "living ideal of Divine love, antecedent to our love, contains in itself the secret of the idealization of our love." According to Solovyov, love between men and women has a key role to play in the mystical transfiguration of the world. Love, which allows one person to find unconditional completion in another, becomes an evolutionary strategy for overcoming cosmic disintegration.

Il magico mondo delle fiabe Oct 29 2019 Principesse, eroi, gnomi, villaggi popolati da bravi uomini che cercano di condurre tranquillamente la loro vita, animali che si trasformano... Si dipanano tra questi personaggi e molti altri, e tra luoghi più o meno inventati, le fiabe dell' autrice. Tutte delicate, gentili, dolci, ben delineate e narrate. Lo stile è molto semplice e fiabesco, tipico dei libri per bambini. A cui, infatti, è dedicata l' opera. Che però, ad un' attenta lettura da parte dei genitori, può trovare spunti di riflessione anche per i più grandi, capaci di cogliere tra le righe anche insegnamenti ad un livello più colto. La stessa brevità dei racconti rende l' intera opera godibile e leggibile anche tutta d' un fiato. Le fiabe si susseguono sciolte e lineari, il libro si lascia leggere piacevolmente, rappresentando una buona lettura per bambini sia per dargli la buona notte, ed allietare così i loro sonni, sia come passatempo pomeridiano, senz' altro di un livello culturale migliore di quanto spesso offrano televisione o Internet. Le emozioni raccontate sono ovviamente semplici, chiare, espresse in forma libera e senza particolari giochi letterari. Lo stile fiabesco è rispettato in pieno, a partire dai canovacci delle storie fino ai loro personaggi. Per questo chi legge le fiabe si ritrova piacevolmente coinvolto in mondi paralleli, in cui la fantasia è libera di spaziare
