The Use of the Creative Therapies with Sexual Abuse Survivors Jun 25 2019 This book is a useful reference for anyone seeking to provide therapy to survivors of sexual abuse. The approach represented here is a holistic one that utilizes various approaches to heal the various manifestations of sexual abuse trauma. Since the acts associated with such abuse are often so difficult to discuss, this book presents several methods of communicating these unspeakable horrors nonverbally, allowing the survivor to express their trauma with less difficulty. This approach seeks to use the actions of the body to heal the mind. This text contains information relevant to treatment for children, adolescents, and adults, as well as male or female, and in group or individual settings. Many useful activities are outlined and illustrations are provided as examples.

Use of Weapons Apr 15 2021 The man known as Cheradenine Zakalwe was one of Special Circumstances' foremost agents, changing the destiny of planets to suit the Culture through intrigue, dirty tricks and military action. The woman known as Diziet Sma had plucked him from obscurity and pushed him towards his present eminence, but despite all their dealings she did not know him as well as she thought. The drone known as Skaffen-Amtiskaw knew both of these people. It had once saved the woman's life by massacring her attackers in a particularly bloody manner. It believed the man to be a lost cause. But not even its machine could see the horrors in his past. Ferociously intelligent, both witty and horrific, *USE OF WEAPONS* is a masterpiece of science fiction.

Rewriting Histories of the Use of Force Sep 08 2020 It is commonly taught that the prohibition of the use of force is an achievement of the twentieth century and that beforehand States were free to resort to the arms as they pleased. International law, the story goes, was 'indifferent' to the use of force. 'Reality' as it stems from historical sources, however, appears much more complex. Using tools of history, sociology, anthropology and social psychology, this monograph offers new insights into the history of the prohibition of the use of force in international law.

Conducting in-depth analysis of nineteenth century doctrine and State practice, it paves the way for an alternative narrative on the prohibition of force, and seeks to understand the origins of international law's traditional account. In so doing, it also provides a more general reflection on how the discipline writes, rewrites and chooses to remember its own history.

The Metaphorical Use of Language in Deuterocanonical and Cognate Literature Jul 19 2021

Metaphors are a vital linguistic component of religious speech and serve as a cultural indicator of how groups understand themselves and the world. The essays compiled in this volume analyze the use, function, and structure of metaphors in Jewish writings from the Hellenistic-Roman period (including the works of Philo and the texts of Qumran), as well as in apocryphal early Christian texts and inscriptions.

Uses of 'the West' Sep 28 2019 The notion of 'the West' is commonly used in politics, the media, and in the academic world. To date, our idea of 'the West' has been largely assumed and effective, but has not been examined in detail from a theoretical perspective. *Uses of 'the West'* combines a range of original and topical approaches to evaluate what 'the West' really does, and how the idea is being used in everyday political practice. This book examines a range of uses of 'the West', and traces how 'the West' works in a broad array of conceptual and empirical contexts, ranging from the return of geopolitics - via a critical review of the debates surrounding Samuel Huntington's *Clash of Civilization* thesis - to the question of the future of 'the West'. Analysis extends further to the repercussions of the war on terror on Western democracy and the processes of delineating the Western from the non-Western, as well as observations of the institutional transformations of Western order.

The Use of Force in International Law Sep 01 2022 This volume of essays examines the development of political and legal thinking regarding the use of force in international relations. It provides an analysis of the rules on the use of force in the political, normative and factual contexts within which they apply and assesses their content and relevance in the light of new challenges such as terrorism, weapons of mass destruction and cyber-attacks. The volume begins with an overview of the ancient and medieval concepts of war and the use of force and then concentrates on the contemporary legal framework regulating the use of force as moulded by the United Nations Charter and state practice. In this regard it discusses specific issues such as the use of force by way of self-defence, armed reprisals, forcible reactions to terrorism, the use of force in the cyberspace, humanitarian intervention and the responsibility to protect. This collection of previously published classic research articles is of interest to scholars and students of international law and international relations as well as practitioners in international law.

The Use of Negatives In Esl Writing Of Malay Undergraduate Students Apr 03 2020 This book is useful for teachers, students and anyone who wants to understand the errors that undergraduate students make in the use of negatives in their English as a Second Language (ESL) writing. Even though the sample in this book comprises sixty undergraduate Malay students, the findings may be extended to other races too. The major causes for these errors in the use of negatives are due to interference from Malay grammar, the nature of English grammar, overgeneralization of linguistic rules, direct translation, inadequate learning, teaching and analogy. This book also discusses some ways of teaching negatives to ESL Malay students.

Complementary and Alternative Medicine in the United States Jun 05 2020 Integration of complementary and alternative medicine therapies (CAM) with conventional medicine is occurring in hospitals and physicians offices, health maintenance organizations (HMOs) are covering CAM therapies, insurance coverage for CAM is increasing, and integrative medicine centers and clinics are being established, many with close ties to medical schools and teaching hospitals. In determining what care to provide, the goal should be comprehensive care that uses the best scientific evidence available regarding benefits and harm, encourages a focus on healing, recognizes the importance of compassion and caring, emphasizes the centrality of relationship-based care, encourages patients to share in decision making about therapeutic options, and promotes choices in care that can include complementary therapies where appropriate. Numerous approaches to delivering integrative medicine have evolved. *Complementary and Alternative Medicine in the United States* identifies an urgent need for health systems research that focuses on identifying the elements of these models, the outcomes of care delivered in these models, and whether these models are cost-effective when compared to conventional practice settings. It

outlines areas of research in convention and CAM therapies, ways of integrating these therapies, development of curriculum that provides further education to health professionals, and an amendment of the Dietary Supplement Health and Education Act to improve quality, accurate labeling, research into use of supplements, incentives for privately funded research into their efficacy, and consumer protection against all potential hazards.

Advances in the Applications of Nonstandard Finite Difference Schemes Jan 01 2020 This

volume provides a concise introduction to the methodology of nonstandard finite difference (NSFD) schemes construction and shows how they can be applied to the numerical integration of differential equations occurring in the natural, biomedical, and engineering sciences. These methods had their genesis in the work of Mickens in the 1990's and are now beginning to be widely studied and applied by other researchers. The importance of the book derives from its clear and direct explanation of NSFD in the introductory chapter along with a broad discussion of the future directions needed to advance the topic. Contents: Nonstandard Finite Difference Methods (R E Mickens) Application of Nonstandard Finite Difference Schemes to the Simulation Studies of Robotic Systems (R F Abo-Shanab et al.) Applications of Mickens Finite Differences to Several Related Boundary Value Problems (R Buckmire) High Accuracy Nonstandard Finite-Difference Time-Domain Algorithms for Computational Electromagnetics: Applications to Optics and Photonics (J B Cole) Nonstandard Finite Difference Schemes for Solving Nonlinear Micro Heat Transport Equations in Double-Layered Metal Thin Films Exposed to Ultrashort Pulsed Lasers (W Dai) Reliable Finite Difference Schemes with Applications in Mathematical Ecology (D T Dimitrov et al.) Violent Entrepreneurs Mar 03 2020 Entering the shady world of what he calls "violent entrepreneurship," Vadim Volkov explores the economic uses of violence and coercion in Russia in the 1990s. Violence has played, he shows, a crucial role in creating the institutions of a new market economy. The core of his work is competition among so-called violence-managing agencies—criminal groups, private security services, private protection companies, and informal protective agencies associated with the state—which multiplied with the liberal reforms of the early 1990s. This competition provides an unusual window on the dynamics of state formation. *Violent Entrepreneurs* is remarkable for its research. Volkov conducted numerous interviews with members of criminal groups, heads of protection companies, law enforcement employees, and businesspeople. He bases his findings on journalistic and anecdotal evidence as well as on his own personal observation. Volkov investigates the making of violence-prone groups in sports clubs (particularly martial arts clubs), associations for veterans of the Soviet—Afghan war, ethnic gangs, and regionally based social groups, and he traces the changes in their activities across the decade. Some groups wore state uniforms and others did not, but all of their members spoke and acted essentially the same and were engaged in the same activities: intimidation, protection, information gathering, dispute management, contract enforcement, and taxation. Each group controlled the same resource—organized violence.

The gender dimension of non-medical use of prescription drugs in Europe and the

Mediterranean region Sep 20 2021 In recent years, the non-medical use of prescription drugs

(NMUPD) has caused increasing public concern around the globe. Women constitute a special

risk category for NMUPD and understanding gender as it relates to this phenomenon is now a

critical requirement for effective policy and practice. Intended primarily for policy makers and

researchers, this Pompidou Group publication aims to explore gender specificities in terms of the

use and misuse of prescription drugs in Europe and the Mediterranean region. Using secondary

sources, it also seeks to identify gaps in the data available in the area covered and to make

recommendations for further research, coherent policy development and effective, gender-

sensitive practice. This publication is an initial attempt to map this emerging phenomenon and to

identify lacunae and avenues for further investigation. It constitutes an important resource for

those interested in the interaction between gender and drug use.
