The Cat and the Toaster Jan 12 2021 Living system ministry is an approach to Christian ministry in the Western world that recognizes the differences between cats, the world God created, and toasters, the world we create using our technology and our capacities, limited as they are. The church is the Body of Christ, a living system. Neighborhoods, cities, and cultures, too, are complex and interrelated living social systems. Why, then, would we try to do God's work in a church or social system using tools and methods designed for non-living systems? We do it because our culture is very organizationally - and technologically - centered. We have grown accustomed to thinking of our social contexts not as living systems, but as things we can easily measure and control. Embracing both perspective and procedure, Living System Ministry is about doing better ministry by seeing a better picture of what exists in the total system. Like farmers, rather than technicians, we learn to be involved in and to be in tune with what causes fruitfulness. We never cause fruit to happen. God does! But as our work becomes better aligned with what God is already doing in his complex, living-system environment, there is an explosion of life. We discover the fruit that remains. Writing from his forty-five years of experience as an urban ministry practitioner in Boston, Dr. Doug Hall introduces us to an approach to missions that recognizes the lead role of God's larger, living social systems as powerful engines for doing far more in our world than we can even begin to imagine.

Classic Oliver Tractors Oct 28 2019 James Oliver sold his first "chilled" plow in 1870--"chilled" because the cast iron was cooled quickly with water to harden the metal and strengthen the plow. And when Oliver Chilled Plow Works merged with the Hart-Parr Company in 1929, the might of capital, expertise, and engineering resources came together to create one of the most successful and revered small tractor manufacturers of all time. This book follows the Oliver tractor from its inception through its development over the years, until the last model rolled off the assembly line in 1976. A story of entrepreneurship and industry, of machinery and American know-how, this illustrated history captures the spirit of Oliver farm equipment as its tractors and crawlers, hay balers and threshers turned American farmland to gold. Throughout, brilliant color photographs and historical images bring the story of the Oliver tractor vividly and vibrantly to life.
