[Writing Home](#) Oct 11 2020 Writing Home explores the literary representation of Australian places by those who have walked them. In particular, it examines how Aboriginal and settler narratives of walking have shaped portrayals of Australia's Red Centre and consequently ideas of nation and belonging. Central Australia has long been characterised as a frontier, the supposed divide between black and white, ancient and modern. But persistently representing it in this way is preventing Australians from re-imagining this internationally significant region as home. Writing Home argues that the frontier no longer adequately describes Central Australia, and that the Aboriginal songlines make a significant but under-acknowledged contribution to Australian discourses of hybridity, belonging and home. Drawing on anthropology, cultural theory, journalism, politics and philosophy, the book traces shifting perceptions of Australian place and space since precolonial times, through six recounted walking journeys of the Red Centre.

Mothing as a Metaphor for Ministry Jul 20 2021 Drawing together original research which weaves together ideas from theology, philosophy, feminism and writing on mothering and child development, Percy affirms and encourages aspects of good practice in ministry that are in danger of being overlooked because they are neither well-articulated nor valued. Offering a fresh look at parish ministry, this book uses a maternal metaphor to provide an integrated image of being and doing.

The China Model and Global Political Economy Aug 01 2022 Since the beginning of China's phenomenal rise in the international system, our knowledge of the country has grown rapidly. But those who have debated the China issue in policy circles mostly focus on the implications of China's rise, often without a firm understanding of why the country is rising in the first place. Using an analytical framework which links China's domestic political economy order and the global system, this book helps us to understand China's rise and the China model more clearly. Indeed, unlike most other works that study the China model as a domestic political economy issue, it adopts an explicit international comparative perspective, comparing the Chinese model to others, such as the Washington Consensus and the Japan model. This comparison allows us to break down different components of the China model, and to show that while the Chinese Communist Party leadership part of the model is unique, other components such as export-led growth strategy or packaged aid programs are not. By focusing on the root cause of China's rise - namely the loop between the evolving China model and an evolving global governance structure - this book reveals the degree of compatibility between the country's profit-driven domestic political economy system and the post-war global economic order, and in turn how and why China has been able to rise in the global system. The China Model and Global Political Economy makes a key contribution to theories of international relations, state development and modernization, and as such will appeal to students and scholars of Chinese politics, Chinese foreign policy, international political economy, development studies and international relations.

The Entrepreneurial Librarian Apr 04 2020 The old image of an entrepreneur as a scrappy, independent risk-taker has been replaced by the reality of individuals incorporating innovative ideas in more traditional settings. This collection of essays illustrates how librarians are infusing entrepreneurial principles in a variety of arenas, including public, private, academic, and special libraries. It chronicles how entrepreneurial librarians are flourishing in the digital age, advocating social change, responding to patron demands, designing new services, and developing exciting fundraising programs. Applying new business models to traditional services, they eagerly embrace entrepreneurship in response to patrons' demands, funding declines, changing resource formats, and other challenges. By documenting the current state of entrepreneurship in libraries, this volume upends the public image of librarians as ill-suited to risky or creative ventures and places them instead on the cutting edge of innovations in the field.

Yemen Endures Feb 01 2020 Why is Saudi Arabia, the world's largest oil exporter, involved in a costly and merciless war against its mountainous southern neighbor Yemen, the poorest country in the Middle East? When the Saudis attacked the hitherto obscure Houthi militia, which they believed had Iranian backing, to oust Yemen's government in 2015, they expected an easy victory. They appealed for Western help and bought weapons worth billions of dollars from Britain and America; yet two years later the Houthis, a unique Shia sect, have the upper hand. In her revealing portrait of modern Yemen, Ginny Hill delves into its recent history, dominated by the enduring and pernicious influence of career dictator Ali Abdullah Saleh, who ruled for three decades before being forced out by street protests in 2011. Saleh masterminded patronage networks that kept the state weak, allowing conflict, social inequality and terrorism to flourish. In the chaos that follows his departure, civil war and regional interference plague the country while separatist groups, Al-Qaeda and ISIS compete to exploit the broken state. And yet, Yemen endures.

Cochrane Handbook for Systematic Reviews of Interventions Jan 02 2020 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Research Methods and Methodologies in Education Jan 26 2022 'This work will be of immense value to those who are undertaking a significant post-graduate research study in Education. The array of impressive contributors writes in an accessible and clear manner, and brings the attention of the reader to both technical and conceptual terms. This book certainly will be an addition to my own reference library' - Susan Groundwater-Smith, Faculty of Education and Social Work, University of Sydney This straightforward and jargon-free book will provide students with the theoretical understandings, practical knowledge and skills they need to carry out independent research. The international contributors identify key research methodologies, data collection tools and analysis methods, and focus on the direct comparisons between them. Each chapter sets out the strengths and weaknesses of a key research method by: identifying specific research designs presenting a series of relevant data collection tools highlighting which analytical methods which can be used. The chapters cover the full range of methods and methodologies, including internet research, mixed methods research and the various modes of ethnographic research. Additional online materials are also available including links to useful journal articles enabling further reading and exploration of each chapter. This is a key book for M-level students and other postgraduates within Education and Educational Research Methods courses. James Arthur is Head of School and Professor of Education and Civic Engagement at the University of Birmingham, UK. Michael J. Waring is a Senior Lecturer in the School of Sport, Exercise and Human Sciences at Loughborough University, UK. Teaching Contemporary Themes in Secondary Education: Technology, Culture and Communication Sep 21 2021 The media has a huge impact on how we view society and the world, and new technologies continue to transform the way in which we work and learn. It is therefore essential that young people can engage critically in their consumption of media and the internet and are able to make informed decisions about the technologies they use. This book explores

The Liberal Defence of Murder Nov 04 2022 An updated account of how liberal calls for humanitarian intervention provide a smoke screen for imperial conquest. A war that has killed more than a million Iraqis was a "humanitarian intervention", the US army is a force for liberation, and the main threat to world peace is posed by Islam. These are the arguments of a host of liberal commentators, including such notable names as Christopher Hitchens, Kanan Makiya, Michael Ignatieff, Paul Berman, and Bernard-Henri Lévy. In this critical intervention, Richard Seymour unearths the history of liberal justifications for empire, showing how savage policies of conquest—including genocide and slavery—have been retailed as charitable missions. From the Cold War to the War on Terror, Seymour argues that colonialist notions of "civilization" and "progress" still shape liberal pro-war discourse, concealing the same bloody realities. In a new afterword, Seymour revisits the debates on liberal imperialism in the era of Obama and in the light of the Afghan and Iraqi debacles.

Community Action and Climate Change Aug 21 2021 The failure of recent international negotiations to progress global action on climate change has shifted attention to the emergence of grassroots sustainability initiatives. These civil society networks display the potential to implement social innovation and change processes from the 'bottom up'. Recent scholarship has sought to theorise grassroots community-based low carbon practices in terms of their sustainability transition potential. However there are few empirical examples that demonstrate the factors for success of community-based social innovations in achieving more widespread adoption outside of their local, sustainability 'niche'. The book seeks to address two significant gaps related to grassroots climate action: firstly the continuing dominance of the individualisation of responsibility for climate change action which presupposes that individuals hold both the ability and desire to shift their behaviours and lifestyle choices to align with a low carbon future. Secondly, the potential for community-based collectives to influence mainstream climate change governance, an area significantly under researched. Drawing on empirical research into Australian Climate Action Groups (CAGs) and related international research, the book argues that grassroots community-based collective action on climate change holds the key to broader social change. This book will be of great interest to students and scholars of climate change, citizen participation, environmental sociology and sustainable development.

Jihadism Transformed May 06 2020 Jihadist narratives have evolved dramatically over the past five years, driven by momentous events in the Middle East and beyond; the death of bin Laden; the rise and ultimate failure of the Arab Springs; and most notably, the rise of the so-called Islamic State. For many years, Al-Qaeda pointed to an aspirational future Caliphate as their utopian end goal - one which allowed them to justify their violent excesses in the here and now. The rise of Islamic State turned that aspiration into a dystopic reality, and in the process, usurped the Jihadist narrative from them almost completely, breathing new life into the global Salafi-Jihadi movement. Despite air-strikes from above, and local disillusionment from below, the new Caliphate has stubbornly persisted and has been at the heart of ISIL's growing global appeal. This timely collection of essays examines how jihadist narratives have changed globally, adapting to these turbulent circumstances. Area and thematic specialists consider transitions inside the Middle East and North Africa as well as in South Asia, sub-Saharan Africa and Europe. As these analyses demonstrate, the success of the ISIL narrative has been as much about resonance with local contexts, as it has been about the appeal of the global idea of a tangible and realised caliphate.

The Concept of Group Rights in International Law May 18 2021 Through a collective biography of four scholars (Erich Kaufmann, Hans Kelsen, Hersch Lauterpacht and Hans J. Morgenthau) this book investigates how Jewish identity and intellectual ties to Judaic civilization in the German-speaking and legal context influenced international law. By using biblical constitutive metaphors, it argues that Jewish German lawyers inherited, "inter alia," a particular Jewish legal approach that framed their understanding of the law as a means to reach God. The overarching argument is that because of their Jewish heritage, Jewish scholars inherited the endorsement of earthly particularism for the sake of universalism and the other way around: for the sake of universalism, humanity's differences need to be solved through the law.

The Role of the Solicitor-General Aug 09 2020 Behind every government there is an impressive team of hard-working lawyers. In Australia, the Solicitor-General leads that team. A former Attorney-General once said, 'The Solicitor-General is next to the High Court and God.' And yet the role of government lawyers in Australia, and specifically the Solicitor-General as the most senior of government lawyers, is under-theorised and under-studied. The Role of the Solicitor-General: Negotiating Law, Politics and the Public Interest goes behind the scenes of government - drawing from interviews with over 45 government and judicial officials - to

uncover the history, theory and practice of the Australian Solicitor-General. The analysis reveals a role that is of fundamental constitutional importance to ensuring both the legality and the integrity of government action, thus contributing to the achievement of rule-of-law ideals. The Solicitor-General also works to defend government action and prosecute government policies in the court, and thus performs an important role as messenger between the political and judicial branches of government. But the Solicitor-General's position, as both an internal integrity check on government and an external warrior for government, gives rise to competing pressures: between the law, politics and the public interest. The office of the Solicitor-General in Australia has evolved many characteristics across the almost two centuries of its history in an attempt to navigate these tensions. These pressures are not unique to the Australian context. The understanding of the Australian position provided by this book is informed by, and will inform, comparative analysis of the role of government lawyers across the world.

Music & the British Military in the Long Nineteenth Century Oct 03 2022 Although military music was among the most widespread forms of music making during the nineteenth-century, it has been almost totally overlooked by music historians. *Music & the British Military in the Long Nineteenth Century* however, shows that military bands reached far beyond the official ceremonial duties they are often primarily associated with and had a significant impact on wider spheres of musical and cultural life. Beginning with a discussion of the place of the military in civilian and social life, authors Trevor Herbert and Helen Barlow plot the story of military music from its sponsorship by military officers to its role as an expression of imperial force, which it took on by the end of the nineteenth century. Herbert and Barlow organize their study around three themes: the use of military status to extend musical patronage by the officer class; the influence of the military on the civilian music establishments; and an incremental movement towards central control of military music making by governments throughout the world. In so doing, they show that military music impacted everything from the configuration of the music profession in the major metropolitan centers, to the development of wind instruments throughout the century, to the emergence of organized amateur music making. A much needed addition to the scholarship on nineteenth century music, *Music & the British Military in the Long Nineteenth Century* is an essential reference for music, cultural and military historians, the social history of music and nineteenth century studies.

Handbook of Translation Studies Nov 23 2021 As a meaningful manifestation of how institutionalized the discipline has become, the new *Handbook of Translation Studies* is most welcome. It joins the other signs of maturation such as Summer Schools, the development of academic curricula, historical surveys, journals, book series, textbooks, terminologies, bibliographies and encyclopedias. The HTS aims at disseminating knowledge about translation and interpreting and providing easy access to a large range of topics, traditions, and methods to a relatively broad audience: not only students who often adamantly prefer such user-friendliness, researchers and lecturers in Translation Studies, Translation & Interpreting professionals; but also scholars and experts from other disciplines (among which linguistics, sociology, history, psychology). In addition the HTS addresses any of those with a professional or personal interest in the problems of translation, interpreting, localization, editing, etc., such as communication specialists, journalists, literary critics, editors, public servants, business managers, (intercultural) organization specialists, media specialists, marketing professionals. Moreover, The HTS offers added value. First of all, it is the first Handbook with this scope in Translation Studies that has both a print edition and an online version. The advantages of an online version are obvious: it is more flexible and accessible, and in addition, the entries can be regularly revised and updated. The Handbook is variously searchable: by article, by author, by subject. A second benefit is the interconnection with the selection and organization principles of the online Translation Studies Bibliography (TSB). The taxonomy of the TSB has been partly applied to the selection of entries for the HTS. Moreover, many items in the reference lists are hyperlinked to the TSB, where the user can find an abstract of a publication. All articles (between 500 and 6000 words) are written by specialists in the different subfields and are peer-reviewed. Last but not least, the usability, accessibility and flexibility of the HTS depend on the commitment of people who agree that Translation Studies does matter. All users are therefore invited to share their feedback. Any questions, remarks and suggestions for improvement can be sent to the editorial team at hts@lessius.eu.

Ecological Sustainability Sep 02 2022 Complex systems is a new field of science studying how parts of a system give rise to the collective behaviors of the system, and how the system interacts with its environment. This book examines the complex systems involved in environmental sustainability, and examines the technologies involved to help mitigate human impacts, such as renewable energy, desalination, carbon capture, recycling, etc. It considers the relationships and balance between environmental engineering and science, economics, and human activity, with regard to sustainability.

The New Turkey and Its Discontents Apr 16 2021 Today's Turkey little resembles that of recent decades. Newfound economic prosperity has had many unexpected social and political repercussions, most notably the rise of the AKP party and President Erdogan. Despite unprecedented electoral popularity, the conduct of the AKP has faced growing criticism: Turkey has yet to solve its Kurdish question; its foreign policy is increasingly fraught as it balances relations with Iran, Israel, Russia and the EU; and widespread protests gripped the country in 2013, as did an unsuccessful coup in 2016. The government is now perceived by many to be corrupt, unaccountable, intimidating of the press and intolerant of political alternatives. Has this once promising democracy descended into a tyranny of the majority led by a charismatic leader? Is Turkey more polarised now than at any point in its recent history? These are among the questions at the heart of *The New Turkey and Its Discontents*, which traces Turkey's evolution under Erdogan's leadership, and assesses the likely consequences at home and abroad.

Taxation in the Digital Economy Oct 23 2021 A robust and efficient tax administration in a modern tax system requires effective tax policies and legislation. Policy frameworks should cover all aspects of tax administration and include the essential processes of capturing, processing, analyzing, and responding to information provided by taxpayers and others concerning taxpayers' affairs. By far the greatest challenges facing tax administrations in all countries are those posed by the continuing developments in the digital economy. Whereas societies are grappling to come to terms with the transitions from the third industrial or digital revolutions, revenue authorities grapple with the consequences for the sustainability of their tax bases and the efficient administration and collection of taxes. This book presents a critical review of the status of tax systems in Asia and the Pacific in the era of the digital economy. The book suggests how countries can maximize their domestic resource mobilization when confronted by the challenges that digitalization inevitably produces, as well as how they can best harness or take advantage of aspects of digitalization to serve their own needs. The full implications of the COVID-19 crisis are still too uncertain to predict, but it is clear that the crisis will accelerate the trend towards digitalization and also increase pressures on public finances. This, in turn, may shape the preference for, and the nature of, both multilateral and unilateral responses to the tax challenges posed by digitalization and the need to address them. This book will be a timely reference for those researching on taxation in digital economy and for policy makers.

The Northeast Question Feb 24 2022 This book explores the idea, psychology and political geography of Northeast India as forged by two interrelated but autonomous meta-narratives. First, the politics of conflict inherent in, and therefore predetermined by physical geography, and second, the larger geopolitics that was unfolding during the colonial period. Unravelling the history behind the turmoil engulfing Northeast India, the study contends that certain geographies — most pertinently fertile river valleys and surrounding mountains which feed the rivers — are integral to nature and any effort to disrupt this cohesion will result in conflict.

It comprehensively traces the geopolitics of the region since colonial era — in particular the Great Game; the politics that went into the making of the McMahon Line, the Radcliffe Line and the Pemberton Line; the region's relations with its international neighbours (China, Bhutan, Myanmar, Bangladesh and Nepal); as well as the issue of many formerly non-state-bearing populations awakening to the reality of the modern state. Lucid and analytical, this book will be of great interest to scholars and researchers of Northeast India, modern Indian history, international relations, defence and strategic studies, and political science.

Multilevel Regulation of Military and Security Contractors Dec 25 2021 The outsourcing of military and security services is the object of intense legal debate. States employ private military and security companies (PMSCs) to perform functions previously exercised by regular armed forces, and increasingly international organisations, NGOs and business corporations do the same to provide security, particularly in crisis situations. Much of the public attention on PMSCs has been in response to incidents in which PMSC employees have been accused of violating international humanitarian law. Therefore initiatives have been launched to introduce uniform international standards amidst what is currently very uneven national regulation. This book analyses and discusses the interplay between international, European, and domestic regulatory measures in the field of PMSCs. It presents a comprehensive assessment of the existing domestic legislation in EU Member States and relevant Third States, and identifies implications for future international regulation. The book also addresses the crucial questions whether and how the EU can potentially play a more active future role in the regulation of PMSCs to ensure compliance with human rights and international humanitarian law.

Young People and Everyday Peace Sep 09 2020 *Young People and Everyday Peace* is grounded in the stories of young people who live in Los Altos de Cazucá, an informal peri-urban community in Soacha, to the south of Colombia's capital Bogotá. The occupants of this community have fled the armed conflict and exist in a state of marginalisation and social exclusion amongst ongoing violences conducted by armed gangs and government forces. Young people negotiate these complexities and offer pointed critiques of national politics as well as grounded aspirations for the future. Colombia's protracted conflict and its effects on the population raise many questions about how we think about peacebuilding in and with communities of conflict-affected people. Building on contemporary debates in International Relations about post-liberal, everyday peace, Helen Berents draws on feminist International Relations and embodiment theory to pay meaningful attention to those on the margins. She conceptualises a notion of embodied-everyday-peace-amidst-violence to recognise the presence and voice of young people as stakeholders in everyday efforts to respond to violence and insecurity. In doing so, Berents argues for and engages a more complex understanding of the everyday, stemming from the embodied experiences of those centrally present in conflicts. Taking young people's lives and narratives seriously recognises the difficulties of protracted conflict, but finds potential to build a notion of an embodied everyday amidst violence, where a complex and fraught peace can be found. *Young People and Everyday Peace* will be of interest to scholars of Latin American Studies, International Relations and Peace and Conflict Studies.
