[On Power](#) Nov 24 2021 YOU DESERVE TO HAVE POWER. IT IS YOURS FOR THE TAKING. GENE SIMMONS IS HERE TO UNLOCK THE DOORS TO THE TEMPLE. Gene Simmons, KISS front-man, multi-hyphenate entrepreneur, and master of self-invention, shares his philosophy on power--how to attain it, how to keep it, and how to harness it as a driving force in business and in life. As co-founder of KISS, America's #1 gold record-award-winning group of all time, Simmons knows the thrill and seduction of power firsthand. But gold records alone don't equal power. The decisions you make once you attain a certain level of success are what separate the pretenders from the pantheon. Inspired by Niccolo Machiavelli's The Prince, Simmons offers his unique take on the dynamics of power in every realm of life, from the bedroom to the boardroom, to the world of rock, celebrity, and social media, to politics. With one-of-a-kind anecdotes from his life and career, as well as stories from historical and contemporary masters of power, including Winston Churchill, Napoleon Bonaparte, Warren Buffett, Michael Jordan, Oprah, and Elon Musk, Simmons crafts a persuasive and provocative theory on how the pursuit of power drives civilization and defines our lives. The rules of power are changing in today's fast-paced, hyper-connected world in a way that Machiavelli never could have imagined, and we all need to learn to adapt. Simmons tells readers: Ignore the negatives. Be unrelenting. Rise above the rest. You are the architect of your success.

[The Culture of Power and the Power of Culture](#) Dec 02 2019 In this fascinating new account of Old Regime Europe, T.C.W. Blanning explores the cultural revolution which transformed eighteenth-century Europe. During this period the court culture exemplified by Louis XIV's Versailles was pushed from the centre to the margins by the emergence of a new kind of space - the public sphere. The author shows how many of the world's most important cultural institutions developed in this space: the periodical, the newspaper, the novel, the lending library, the coffee house, the voluntary association, the journalist, and the critic. It was here that public opinion staked its claim to be the ultimate arbiter of culture and politics. For the established order this new force was to prove both a challenge and an opportunity and the author's comparative study of power and culture shows how regimes sought to keep their balance as the ground moved beneath their feet. In the process he explains, among other things, why Britain won the 'Second Hundred Years War' against France, how Prussia rose to become the dominant power in German-speaking Europe, and why the French monarchy collapsed.

Language, Society and Power Jul 29 2019 Language, Society and Power is an accessible introduction to studying language in a variety of social contexts. This book examines the ways language functions, how it influences the way we view society and how it varies according to age, ethnicity, class and gender. It considers whether representations of people and their language matter, explores how identity is constructed and performed, and considers the creative potential of language in the media, politics and everyday talk. The fifth edition of this popular textbook features: Updated chapters with new activities; Examples that include material related to youth language, computer-mediated communication, texting and electronic communication; New material on online mass media, fake news and Twitter as a form of political agency; More discussion of social media, social networking, memes and mobile communication; An introduction to the concepts of translanguaging and superdiversity; An expanded Gender chapter that questions binary gender identities; A companion website which includes more video material to support learning as students make their way through the book. Language, Society and Power assumes no linguistic background among readers, and is a must-read for all students of English language and linguistics, media, communication, cultural studies, sociology and psychology who are studying language and society for the first time.

But then a vital new force takes root and flourishes, causing their lives to converge with devastating effect. Teenage girls now have immense physical power--they can cause agonizing pain and even death. And, with this small twist of nature, the world drastically resets. From award-winning author Naomi Alderman, THE POWER is speculative fiction at its most ambitious and provocative, at once taking us on a thrilling journey to an alternate reality, and exposing our own world in bold and surprising ways.

Teach Truth to Power Apr 17 2021 How academics and researchers can influence education policy: putting research in a policy context, finding unexpected allies, interacting with politicians, and more. Scholarly books and journal articles routinely close with policy recommendations. Yet these recommendations rarely reach politicians. How can academics engage more effectively in the policy process? In Teach Truth to Power, David Garcia offers a how-to guide for scholars and researchers who want to influence education policy, explaining strategies for putting research in a policy context, getting "in the room" where policy happens, finding unexpected allies, interacting with politicians, and more. Countering conventional wisdom about research utilization (also referred to as knowledge mobilization), Garcia explains that engaging in education policy is not a science, it is a craft--a combination of acquired knowledge and intuition that must be learned through practice. Engaging in policy is an interpersonal process; academics who hope to influence policy have to get face-to-face with the politicians who create policy. Garcia's experience as trusted insider, researcher, and political candidate make him uniquely qualified to offer a roadmap that connects research to policy. He explains that academics can leverage their content expertise to build relationships with politicians (even before they are politicians); demonstrates the effectiveness of the research one-pager; and shows how academics can teach politicians to be champions of research.

The Purpose of Power Dec 26 2021 An essential guide to building transformative movements to address the challenges of our time, from one of the country's leading organizers and a co-creator of Black Lives Matter "Excellent and provocative . . . a gateway [to] urgent debates." --Keeanga-Yamahtta Taylor, The New Yorker NAMED ONE OF THE BEST BOOK OF THE YEAR BY Time • Marie Claire • Kirkus Reviews In 2013, Alicia Garza wrote what she called "a love letter to Black people" on Facebook, in the aftermath of the acquittal of the man who murdered seventeen-year-old Trayvon Martin. Garza wrote: Black people. I love you. I love us. Our lives matter. With the speed and networking capacities of social media, #BlackLivesMatter became the hashtag heard 'round the world. But Garza knew even then that hashtags don't start movements--people do. Long before #BlackLivesMatter became a rallying cry for this generation, Garza had spent the better part of two decades learning and unlearning some hard lessons about organizing. The lessons she offers are different from the "rules for radicals" that animated earlier generations of activists, and diverge from the charismatic, patriarchal model of the American civil rights movement. She reflects instead on how making room amongst the woke for those who are still awakening can inspire and activate more people to fight for the world we all deserve. This is the story of one woman's lessons through years of bringing people together to create change. Most of all, it is a new paradigm for change for a new generation of changemakers, from the mind and heart behind one of the most important movements of our time.

The 48 Laws Of Power Dec 14 2020 THE MILLION COPY INTERNATIONAL BESTSELLER Drawn from 3,000 years of the history of power, this is the definitive guide to help readers achieve for themselves what Queen Elizabeth I, Henry Kissinger, Louis XIV and Machiavelli learnt the hard way. Law 1: Never outshine the master Law 2: Never put too much trust in friends; learn how to use enemies Law 3: Conceal your intentions Law 4: Always say less than necessary. The text is bold and elegant, laid out in black and red throughout and replete with fables and unique word sculptures. The 48 laws are illustrated through the tactics, triumphs and failures of great figures from the past who have wielded - or been victimised by - power. (From the Playboy interview with Jay-Z, April 2003) PLAYBOY: Rap careers are usually over fast: one or two hits, then styles change and a new guy comes along. Why have you endured while other rappers haven't? JAY-Z: I would say that it's from still being able to relate to people. It's natural to lose yourself when you have success, to start surrounding yourself with fake people. In The 48 Laws of Power, it says the worst thing you can do is build a fortress around yourself. I still got the people who grew up with me, my cousin and my childhood friends. This guy right here (gestures to the studio manager), he's my friend, and he told me that one of my records, Volume Three, was wack. People set higher standards for me, and I love it.

Breakthrough Power Jun 27 2019 Reader-friendly introduction to energy breakthroughs, their politics and implications.

The Sources of Social Power: Volume 1, A History of Power from the Beginning to AD 1760 Aug 29 2019 This is the first part of a three-volume work on the nature of power in human societies. In it, Michael Mann identifies the four principal 'sources' of power as being control over economic, ideological, military, and political resources. He examines the interrelations between these in a narrative history of power from Neolithic times, through ancient Near Eastern civilisations, the classical Mediterranean age, and medieval Europe, up to just before the Industrial Revolution in England. Rejecting the conventional monolithic concept of a 'society', Dr. Mann's model is instead one of a series of overlapping, intersecting power networks. He makes this model operational by focusing on the logistics of power - how the flow of information, manpower, and goods is controlled over social and geographical space--thereby clarifying many of the 'great debates' in sociological theory. The present volume offers explanations of the emergence of the state and social stratification.

Sources of Power Mar 17 2021 Anyone who watches the television news has seen images of firefighters rescuing people from burning buildings and paramedics treating bombing victims. How do these individuals make the split-second decisions that save lives? Most studies of decision making, based on artificial tasks assigned in laboratory settings, view people as biased and unskilled. Gary Klein is one of the developers of the naturalistic decision making approach, which views people as inherently skilled and experienced. It documents human strengths and capabilities that so far have been downplayed or ignored. Since 1985, Klein has conducted fieldwork to find out how people tackle challenges in difficult, nonroutine situations. Sources of Power is based on observations of humans acting under such real-life constraints as time pressure, high stakes, personal responsibility, and shifting conditions. The professionals studied include firefighters, critical care nurses, pilots, nuclear power plant operators, battle planners, and chess masters. Each chapter builds on key incidents and examples to make the description of the methodology and phenomena more vivid. In addition to providing information that can be used by professionals in management, psychology, engineering, and other fields, the book presents an overview of the research approach of naturalistic decision making and expands our knowledge of the strengths people bring to difficult tasks.

Sweetness and Power Oct 12 2020 A fascinating persuasive history of how sugar has shaped the world, from European colonies to our modern diets In this eye-opening study, Sidney Mintz shows how Europeans and Americans transformed sugar from a rare foreign luxury to a commonplace necessity of modern life, and how it changed the history of capitalism and industry. He discusses the production and consumption of sugar, and reveals how closely interwoven are sugar's origins as a "slave" crop grown in Europe's tropical colonies with its use first as an extravagant luxury for the aristocracy, then as a staple of the diet of the new industrial proletariat. Finally, he considers how sugar has altered work patterns, eating habits, and our diet in modern times. "Like sugar, Mintz is persuasive, and his detailed history is a real treat." -San Francisco Chronicle

Media and Power Jun 19 2021 In this major new book, James Curran addresses three key questions about media power: How much power do the media have? Who really controls the media? What is the relationship between media and power in society?Media and Power addresses three key questions about the relationship between media and society.*How much power do the media have? *Who really controls the media? *What is the relationship between media and power in society?In this major new book, James Curran reviews the different answers which have been given, before advancing original interpretations in a series of ground-breaking essays. This book also provides a guided tour of the major debates in media studies. What part did the media play in the making of modern society? How did 'new media' change society in the past? Will radical media research recover from its mid-life crisis? Is public service television the dying product of the nation in an age of globalization? Media and Power provides both a clear introduction to media research and an innovative analysis of media power.

Language and Power Nov 12 2020 Essential study guides for the future linguist. Language and Power is an introduction to how English is used to influence, persuade and position us within hierarchies. It is suitable for students at advanced level and beyond. Written with input from the Cambridge English Corpus, it looks at the linguistic techniques in situations where language is used to exert influence, exploring how contexts affect the language we use. Short activities help explain analysis methods, guiding students through major modern issues and concepts. It summarises key concerns and modern findings, while providing inspiration for language investigations and non-examined assessments (NEAs) with research suggestions.

Politics Is for Power Oct 24 2021 A brilliant condemnation of political hobbyism—treating politics like entertainment—and a call to arms for well-meaning, well-informed citizens who consume political news, but do not take political action. Who is to blame for our broken politics? The uncomfortable answer to this question starts with ordinary citizens with good intentions. We vote (sometimes) and occasionally sign a petition or attend a rally. But we mainly “engage” by consuming politics as if it’s a sport or a hobby. We soak in daily political gossip and eat up statistics about who’s up and who’s down. We tweet and post and share. We crave outrage. The hours we spend on politics are used mainly as pastime. Instead, we should be spending the same number of hours building political organizations, implementing a long-term vision for our city or town, and getting to know our neighbors, whose votes will be needed for solving hard problems. We could be accumulating power so that when there are opportunities to make a difference—to lobby, to advocate, to mobilize—we will be ready. But most of us who are spending time on politics today are focused inward, choosing roles and activities designed for our short-term pleasure. We are repelled by the slow-and-steady activities that characterize service to the common good. In Politics Is for Power, pioneering and brilliant data analyst Eitan Hersh shows us a way toward more effective political participation. Aided by political theory, history, cutting-edge social science, as well as remarkable stories of ordinary citizens who got off their couches and took political power seriously, this book shows us how to channel our energy away from political hobbyism and toward empowering our values.

The Power To Control Sep 22 2021 In The Power To Control, you will find out how the elite use their vast wealth and power to manipulate you and the general population into supporting their beliefs and interests. The modern human struggle is not about sex, religion, race, ideology, or any of the common themes elites and their media companies and institutions claim it is, as they rile up the populace to garner support for whatever actions and goals will benefit their own interests. The true battle is class warfare between the owners of society and everyone else, as the elites of all societies across the world conspire against the masses by directing the systems and institutions they own and control to create an imbalanced playing field that benefits themselves at the expense of all others.

Sex, Time, and Power May 31 2022 As in the bestselling The Alphabet Versus the Goddess, Leonard Shlain’s provocative new book promises to change the way readers view themselves and where they came from. Sex, Time, and Power offers a tantalizing answer to an age-old question: Why did big-brained Homo sapiens suddenly emerge some 150,000 years ago? The key, according to Shlain, is female sexuality. Drawing on an awesome breadth of research, he shows how, long ago, the narrowness of the newly bipedal human female’s pelvis and the increasing size of infants’ heads precipitated a crisis for the species. Natural selection allowed for the adaptation of the human female to this environmental stress by reconfiguring her hormonal cycles, entraining them with the periodicity of the moon. The results, however, did much more than ensure our existence; they imbued women with the concept of time, and gave them control over sex—a power that males sought to reclaim. And the possibility of achieving immortality through heirs drove men to construct patriarchal cultures that went on to dominate so much of human history. From the nature of courtship to the evolution of language, Shlain’s brilliant and wide-ranging exploration stimulates new thinking about very old matters.

How to Be a Power Connector: The 5+50+100 Rule for Turning Your Business Network into Profits Jun 07 2020 Create a personal “power grid” of influence to spark professional and personal success “Other people have the answers, deals, money, access, power, and influence you need to get what you want in this world. To achieve any goal, you need other people to help you do it.” -- JUDY ROBINETT As anyone in business knows, strategic planning is critical to achieving long-term success. In How to Be a Power Connector, super-networker Judy Robinett argues that strategic relationship planning should be your top priority. When you combine your specific skills and talents with a clear, workable path for creating and managing your relationships, nothing will stop you from meeting your goals. With high-value connections, you’ll tap into a dynamic “power grid” of influence guaranteed to accelerate your personal and professional success. Robinett uses her decades of experience connecting the world’s highest achievers with one another to help you build high-value relationships. She reveals all the secrets of her trade, including proven ways to: Find and enter the best network “ecosystem” to meet your goals Reach even the most unreachable people quickly and effectively Get anyone’s contact information within 30 seconds Create a “3-D connection” that adds value to multiple people at the same time Access key influencers through industry and community events Subtly seed conversation with information about interests and needs Use social media to your best advantage Robinett has based her methods on solid research proving that social groups begin to break up when they become larger than 150 people, and that 50 members is the optimal size for group communication. As such, she has developed what she calls the “5+50+100” method: contact your top 5 connections daily, your Key 50 weekly, and your Vital 100 monthly. This is your power grid, and it will work wonders for your career. Nothing will stop you when you learn How to Be a Power Connector. PRAISE FOR HOW TO BE A POWER CONNECTOR: “Unlike many books in this genre, this one is written by a woman who has lived it. . . . Judy Robinett offers guidance on how to form authentic relationships that bring mutual benefits.” -- ADAM GRANT, Wharton professor and New York Times bestselling author of Give and Take “How to Be a Power Connector is like an MBA in networking: an advanced course in finding and developing quality relationships with the people who can make the biggest difference in your professional success.” -- IVAN MISNER, founder and chairman of BNI “Talk about power! Follow Judy Robinett’s logical, straightforward, and helpfully detailed advice, and you can be a ‘Power Connector’ yourself! Great ideas, well presented, with no ‘wasted space’ in her argument!” -- DON PEPPERS, coauthor of Extreme Trust: Honesty as a Competitive Advantage “Absolutely brilliant. A step-by-step guide to building a network that will be both invaluable to you and just as valuable to those whose lives you will now have the opportunity to touch. I can’t imagine a more powerful book for one who truly desires to be a Power Connector.” -- BOB BURG, coauthor of The Go-Giver and author of Adversaries into Allies “In the C-Suite or in your personal life everything comes down to the quality of your relationships. Judy’s book helps you attract and maintain the relationships that will get you what you want most. Be a super connector now!” -- JEFFREY HAYZLETT, TV host and bestselling author of Running the Gauntlet

Power Trip Sep 30 2019 A global tour of energy—the builder of human civilization and also its greatest threat. Energy is humanity’s single most important resource. In fact, as energy expert Michael E. Webber argues in Power Trip, the story of how societies rise can be told largely as the story of how they manage energy sources through time. In 2019, as we face down growing demand for and accumulating environmental impacts from energy, we are at a crossroads and the stakes are high. But history shows us that energy’s great value is that it allows societies to reinvent themselves. Power Trip explores how energy has transformed societies of the past and offers wisdom for today’s looming energy crisis. There is no magic bullet; energy advances always come with costs. Scientific innovation needs public support. Energy initiatives need to be tailored to individual societies. We must look for long-term solutions. Our current energy crisis is real, but it is solvable. We have the power.

Literacy and Power Feb 02 2020 The often bloody struggles of Central America have dominated news reports for a long time. Behind the headlines lies an enormous population of the desperately poor, and it is axiomatic that they are rendered even more powerless by widespread illiteracy. What actually counts as literacy is less clear. Archer and Costello describe some of the most exciting and innovative programmes designed to overcome the problem and how, as they worked with many of them, they discovered how varied and controversial they are. El Salvador, Nicaragua, Honduras, Ecuador, Mexico, Chile, Bolivia and Guatemala are all included, and for each country the authors have provided a thrilling account of the lives and circumstances of the people who both teach and learn as well as describing the varied forms that literacy teaching, even literacy itself, can take. This book is not only about literacy, but is also a guide to the societies of one of the world’s most troubled regions. Originally published in 1990

PERFECT POWER: How the Microgrid Revolution Will Unleash Cleaner, Greener, More Abundant Energy Mar 29 2022 What’s the solution to the world’s growing energy problem? PERFECT POWER Electric usage is rising. Fuel costs are rocketing. Blackouts are happening more frequently. Why? Because our electrical power system—built on a vast network of resources including nuclear energy, natural gas, water, and coal—has become woefully outdated, increasingly expensive, and dangerously fragile. We need to change the current system, and we need to do it now. Written by business visionary and former Motorola chairman Robert Galvin, Perfect Power shows us how to create a “perfect” system that can deliver power where needed, at an astonishing reliability standard of 99.9999999 percent. By super-charging the “Six Sigma” concepts that Galvin developed as the founder and CEO at Motorola, we can Meet the energy reliability and quality needs of the Digital Age Generate new goods and services that create jobs, empower consumers, and lower energy cost Eliminate wasteful spending on our electrical infrastructure that can be used for peak power needs Facilitate local, regional, and, ultimately, national energy independence Fundamentally reduce the impact of energy on the environment Invest in the microgrid revolution Energy providers and policy makers will reinvent today’s centralized power systems and integrate them with new, efficient “microgrids.” Investors and entrepreneurs will spot tomorrow’s hottest technologies. Consumers will demand change from “the powers that be.” And environmentalists will take advantage of cleaner, greener energy sources available. We have the power to fulfill our energy needs, fix our old systems, forge ahead with new ideas, and fuel our dreams. It’s Perfect Power.

Rivers of Power May 19 2021 An “eye-opening, sometimes alarming, and ultimately inspiring” natural history of rivers and their complex and ancient relationship with human civilization (Elizabeth Kolbert, Pulitzer Prize-winning author of The Sixth Extinction). Rivers, more than any road, technology, or political leader, have shaped the course of human civilization. They have opened frontiers, founded cities, settled borders, and fed billions. They promote life, forge peace, grant power, and can capriciously destroy everything in their path. Even today, rivers remain a powerful global force -- one that is more critical than ever to our future. In Rivers of Power, geographer Laurence C. Smith explores the timeless yet underappreciated relationship between rivers and civilization as we know it. Rivers are of

course important in many practical ways (water supply, transportation, sanitation, etc). But the full breadth of their influence on the way we live is less obvious. Rivers define and transcend international borders, forcing cooperation between nations. Huge volumes of river water are used to produce energy, raw commodities, and food. Wars, politics, and demography are transformed by their devastating floods. The territorial claims of nations, their cultural and economic ties to each other, and the migrations and histories of their peoples trace back to rivers, river valleys, and the topographic divides they carve upon the world. And as climate change, technology, and cities transform our relationship with nature, new opportunities are arising to protect the waters that sustain us. Beautifully told and expansive in scope, Rivers of Power reveals how and why rivers have so profoundly influenced our civilization and examines the importance this vast, arterial power holds for the future of humanity. "As fascinating as it is beautifully written."---Jared Diamond, Pulitzer Prize-winning author of Guns, Germs, and Steel, Collapse, and Upheaval

Wealth and Power Mar 05 2020 ASIAN HISTORY. By now everyone knows the basic facts of China's rise to pre-eminence over the past three decades. But how did this erstwhile sleeping giant finally manage to arrive at its current phase of dynamic growth? How did a century-long succession of failures to change somehow culminate in the extraordinary dynamism of China today? By examining the lives of eleven influential officials, writers, activists and leaders whose contributions helped create modern China, Wealth and Power addresses these questions. This fascinating survey moves from the lead-up to the first Opium War through to contemporary opposition to single-party rule. Along the way, we meet titans of Chinese history, intellectuals and political figures. By unwrapping the intellectual antecedents of today's resurgent China, Orville Schell and John Delury supply much-needed insight into the country's tortured progression from nineteenth-century decline to twenty-first-century boom.

Lever of Power Jul 21 2021 Understanding the power of the corporations and how to take the struggle directly to them It's no secret that "the 1%" - the business elite that commands the largest corporations and the connected network of public and private institutions- exercise enormous control over U.S. government. While this control is usually attributed to campaign donations and lobbying, Levers of Power argues that corporate power derives from control over the economic resources on which daily life depends. Government officials must constantly strive to keep capitalists happy, lest they go on "capital strike" - that is, refuse to invest in particular industries or locations, or move their holdings to other countries - and therefore impose material hardship on specific groups or the economy as a whole. For this reason, even politicians who are not dependent on corporations for their electoral success must fend off the interruption of corporate investment. Levers of Power documents the pervasive power of corporations and other institutions with decision-making control over large pools of capital, particularly the Pentagon. It also shows that the most successful reform movements in recent U.S. history - for workers' rights, for civil rights, and against imperialist wars - succeeded by directly targeting the corporations and other institutional adversaries that initiated and benefitted from oppressive policies. Though most of today's social movements focus on elections and politicians, movements of the "99%" are most effective when they inflict direct costs on corporations and their allied institutions. This strategy is also more conducive to building a revolutionary mass movement that can replace current institutions with democratic alternatives.

Knowledge and Power Aug 02 2022 Ronald Reagan 's most-quoted living author-George Gilder-is back with an all-new paradigm-shifting theory of capitalism that will upturn conventional wisdom, just when our economy desperately needs a new direction. America 's struggling economy needs a better philosophy than the college student's lament: "I can't be out of money, I still have checks in my checkbook!" We 've tried a government spending spree, and we 've learned it doesn 't work. Now is the time to rededicate our country to the pursuit of free market capitalism, before we 're buried under a mound of debt and unfunded entitlements. But how do we navigate between government spending that's too big to sustain and financial institutions that are "too big to fail?" In Knowledge and Power, George Gilder proposes a bold new theory on how capitalism produces wealth and how our economy can regain its vitality and its growth. Gilder breaks away from the supply-side model of economics to present a new economic paradigm: the epic conflict between the knowledge of entrepreneurs on one side, and the blunt power of government on the other. The knowledge of entrepreneurs, and their freedom to share and use that knowledge, are the sparks that light up the economy and set its gears in motion. The power of government to regulate, stifle, manipulate, subsidize or suppress knowledge and ideas is the inertia that slows those gears down, or keeps them from turning at all. One of the twentieth century 's defining economic minds has returned with a new philosophy to carry us into the twenty-first. Knowledge and Power is a must-read for fiscal conservatives, business owners, CEOs, investors, and anyone interested in propelling America 's economy to future success.

Power Relationships Oct 31 2019 The Relationship Laws that Drive Success There are powerful but invisible laws that determine whether your relationships -with your clients, colleagues, and friends-will thrive or wither. These relationship laws are ever-present. When you align with them, the results are dramatic. Your network will grow rapidly. You 'll be seen by clients as a trusted partner rather than an expense to be managed. And you 'll find the people around you eager to help you succeed. When you ignore the laws, however, your efforts will falter. Relationship building will seem like very hard work. Power Relationships gives readers a unique, entertaining guide to relationship success at work and in life. Each of the 26 laws is illustrated and explained using a compelling, real-life story that shows how to implement it. The second section of the book presents 16 common relationship challenges with specific solutions. You 'll read about: The top Citigroup executive whose relationship with a CEO was changed forever on a business trip that exploded into chaos, and how you can use the same principle to deepen your own relationships. The philanthropist who, on the verge of being mugged in a dark parking lot, learns how his actions have had an unimaginable ripple effect across several generations How one of the authors flew halfway around the world and used Law 18- "Make them curious" -to turn a make-or-break, five-minute meeting with a top executive into a long-term relationship. The chance encounter on an airplane with a famous actor that revealed a simple but profound truth. It 's Law 25: "Build your network before you need it." Sobel (author of Clients for Life, All for One, and Power Questions (with Panas)) and Panas (author of Asking and Supremely Successful Selling) have sold over half a million books and are the leading authorities in their field. Power Relationships is a unique, road-tested guide to relationship success.

Abuse and Power Oct 04 2022 The chickens are coming home to roost for the corrupt officials, mainstream media, and Democratic operatives who ruined the life of an innocent American in an attempt to subvert our democracy. Carter Page, the man at the center of one of the worst scandals in our country 's history, reveals how our nation 's top law enforcement officials abused their power and framed an innocent American citizen in their effort to take down Donald Trump. Page 's gripping account, which shows that the rot goes deeper than anyone realized, names the men and women who tried to pull off a coup and didn't care who got hurt. The Life Power and How to Use It Feb 25 2022 The sun gives forth to us heat and light rays, without which this old world could never be. Glory to warmth and light, which are power and wisdom shed upon us. But there is likewise a third kind of ray shed by old Sol, whose mission we may not so readily bless. The sun 's actinic rays are death-dealing. They cause disintegration, decomposition.

The Last Word on Power: Executive Re-Invention for Leaders Who Must Make the Impossible Happen Apr 05 2020 How leaders can achieve something meaningful--transform a brand, a workplace, a technology, themselves--beyond holding an influential position. Do you want to do work that is worthy of your time and talent? Do you want to make your mark on your industry, company, or within your community? Are you satisfied with the fact that reengineering, quality improvements, and other changes never really make a lasting impact? Then you need to go beyond the techniques of improvement and learn the skills that it takes to be extraordinary. The power to be extraordinary is not one we are born with. Rather, it is a power that one can learn, and Tracy Goss helps executives realize this power. Here in this book for the first time, Goss makes her coursework available to the general reader. Goss's unique methodology shows how you how you can "put at risk the success you've become for the power of making the impossible happen." She positions executives to take on the future that they dream about.

She teaches how to behave differently so that you are free of past constraints. She shows how you can be at home in the environment in which you are constantly surrounded by threats, and how to transcend the ordinary to make the impossible happen. Her work has resulted in many important life changes and organizational reinventions worldwide. "Goss offers powerful information, far above the glib self-help mush that already lines the shelves. She answers the fundamental question of why management fads do not work: the personal work has not yet been done." --Library Journal

New Power Jul 01 2022 From two influential and visionary thinkers comes a big idea that is changing the way movements catch fire and ideas spread in our highly connected world. For the vast majority of human history, power has been held by the few. "Old power" is closed, inaccessible, and leader-driven. Once gained, it is jealously guarded, and the powerful spend it carefully, like currency. But the technological revolution of the past two decades has made possible a new form of power, one that operates differently, like a current. "New power" is made by many; it is open, participatory, often leaderless, and peer-driven. Like water or electricity, it is most forceful when it surges. The goal with new power is not to hoard it, but to channel it. New power is behind the rise of participatory communities like Facebook and YouTube, sharing services like Uber and Airbnb, and rapid-fire social movements like Brexit and #BlackLivesMatter. It explains the unlikely success of Barack Obama's 2008 campaign and the unlikelier victory of Donald Trump in 2016. And it gives ISIS its power to propagate its brand and distribute its violence. Even old power institutions like the Papacy, NASA, and LEGO have tapped into the strength of the crowd to stage improbable reinventions. In **New Power**, the business leaders/social visionaries Jeremy Heimans and Henry Timms provide the tools for using new power to successfully spread an idea or lead a movement in the twenty-first century. Drawing on examples from business, politics, and social justice, they explain the new world we live in--a world where connectivity has made change shocking and swift and a world in which everyone expects to participate.

How to Have Confidence and Power In Dealing With People Jul 09 2020 Taking a brass tacks approach to communication, **How to Have Confidence and Power in Dealing With People** explains how to interact with others as they really are, not as you would like them to be. The goal is to get what you want from them successfully - be it cooperation, goodwill, love or security. Les Giblin, a recognized expert in the field of human relations, has devised a method for dealing with people that can be used when relating with anyone - parents, teachers, bosses, employees, friends, acquaintances, even strangers. Giblin shows step by step how to get what you want at any time and in ways that leave you feeling good about yourself. Moreover, the people who have given you what you want wind up feeling good about themselves, too. The result? Nobody gets shortchanged. It 's a win-win situation. Each chapter includes a handy summary, so there 's absolutely no chance of missing the book 's key points. You can also use these recaps to refresh your memory after you 've finished the book. Instead of feeling miserable about your interpersonal skills, read this best-selling guide and learn to succeed with people in every area of your life.
