Cross-Curricular Approaches to Language Education Mar 02 2020 Current applied linguistic research generally supports the adoption of interdisciplinary approaches in education with the objective of enhancing learners' progress and teachers' practices. In this spirit, this edited volume explores the issue of cross-curricular learning and teaching from a wider perspective. The twenty-three papers collected here are categorised in four thematic units, all of which, however, share a common feature: they focus on interdisciplinary learning and promote the integration of knowledge and skills from various subject areas. As such, all the papers brought together in this volume, thus, emphasise the interconnectedness of knowledge and ideas in primary, secondary and tertiary education. The theme of Cross-Curricular Teaching and Learning is related in this volume to Intercultural Education, to Content and Language Integrated Learning, and to Information and Communication Technology (ICT). The book will be of interest to scholars who are interested in relevant research-based data and results, and to educators who wish to update their knowledge about cross-curricular teaching and improve their language teaching practices.

Learning from Shanghai Jul 18 2021 The Shanghai school system has attracted worldwide attention since its impressive performance in the Programme for International Student Assessment (PISA) in 2009. The system ranks as a 'stunning success' according to standards of the Organisation for Economic Co-operation and Development (OECD). Shanghai also stands out for having the world's highest percentage of 'resilient students' - students from socio-economically disadvantaged backgrounds who emerge as top performers. *Learning From Shanghai: Lessons on Educational Success* offers a close-up view of the people and the policies that have achieved such world-class performance. Based on research and personal observation gathered during the author's recent field work with school principals, teachers and students, this book explores the factors that explain Shanghai's exceptional success in education. The approach combines high standards of scholarly research and analysis with the author's unique personal insights, as evidenced by chapters entitled *Education is Filling a Bucket* and *Lighting a Fire and Tiger Mothers, Dragon Children*. Drawing on her experience as an education professional and a teacher of teachers, Charlene Tan thoroughly examines and analyzes the people, the policies and the practices that distinguish Shanghai educators. The contents include comprehensive details on the Shanghai approach to quality education, from discussion of the balance between centralization and decentralization, to school autonomy and accountability, to testing policy and professional development for teachers. The book includes detailed tables on curriculum and school performance targets, sample appraisal forms for teachers and students, and dozens of photographs. The author

Extraordinary Experiences of an Army Officer Sep 19 2021 'Extraordinary Experiences of an Army Officer' is a compilation of my personal experiences, with palmistry and the inexplicable pronouncements that I have been making over the years. Most of these had turned into reality in very weird ways. These have made me believe that there is some supernatural power which controls the universe and some or many of us humans, who have strong connections with what is commonly called the 'Sixth Sense' which prompts and guides us in our thought, speech and sometimes actions. For those who have not yet experienced such incidents in their lives, these would seem 'Extraordinary'. All of my 'Extraordinary Experiences' as mentioned here in the Book, are absolutely true and 'Real Life Events'. They are being presented with no dramatization, in simple Indian English. Though they all happened in real life, some may sound quite Far-fetched, especially the one in which I refused to vacate the Coupe of a sitting central minister, and maybe also the one in which I retrieved the liquor and cash from the corrupt Railway Officials on KK Express.

He sets out to de-mystify first-class degrees in the arts, humanities and social sciences, clearly articulating the difference between the excellent and the merely competent in undergraduate work. This concise, no-nonsense guidebook will give prospective and current students advice on teaching and learning styles that prevail in university and on how to manage their two most important resources - their time and their lecturers. In an accessible and entertaining style, the author looks at subjects such as: making the transition from school to university developing transferable skills making use of lectures and seminars using libraries and the Internet note-taking, essays, seminars and presentations common mistakes to avoid writing with clarity and style revision and examinations. Illustrated with many examples from a range of academic disciplines, *How to Get a First* is an all-purpose guide to success in academic life. Visit the companion website www.getafirst.com
