At the age of just 31, Porsche became the technical director of Austro-Daimler, at the time one of the world's largest automobile manufacturers where Porsche designed some of the world's most iconic cars, like the Mercedes-Benz Kompressor and Typ S models. In 1933, Porsche developed the fabled 16-cylinder mid-engine Auto Union Grand Prix race car. In 1938 Porsche began development of the Typ 64. Built for long-distance endurance competition, the Typ 64 is considered the forefather of all Porsche race cars. Porsche captures the Porsche story through entries on the most iconic Porsche cars ever built, from the first 356 to the latest 911, to the mid-engine Boxster and Cayman, and all the front-engine cars including the 928, 944, 968 and Cayenne. No other sports car has achieved the success of those built by Porsche, on the street or on the world's racetracks. Part of Motorbooks' First Gear series, Porsche celebrates the German marque's history through lavishly illustrated profiles of the company's ground-breaking sports cars, each one supplemented with spec boxes and "did you know?" factoids.

Patina Volkswagens Jul 26 2019 Since the early 2000s, the apparent explosion of interest in Volkswagens with original paint, rust and patina has inspired a generation of car fanatics, who might not be able to afford to restore a car to show condition, but still want a good looking, cool car that will stand out from the crowd. Once looked upon as being in need of restoration, cars with original paint, rust and patina, especially within the global Volkswagen community, have gradually become far more popular than restored cars. When walking down a line of cars at a car show, it's easy to see why; these cars are rare, unspoiled survivors – cars that tell a story of an interesting and varied past. The look of the Volkswagens being built in this style is so honest, unspoiled and characterful, that it has begun to inspire the media; even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag, the generation it initially inspired has grown with the hobby, and produced a micro-industry that still manages to embrace the 'Built not bought' ethos. This book, superbly illustrated with stunning colour photographs, takes an inside look at some of the key car builders, dealers, celebrities and hobbyists, as well as the different styles of build, meaning every single car has a style all its own. Foreword by Drew Pritchard of TV's 'Salvage Hunters' fame.
