Racing and Collecting Slot Cars Nov 14 2021 Covers slot racing cars and tracks, how to duplicate real race tracks in scale, troubleshooting and performing maintenance on slot cars, racing terms, and how to organize a race event.

A Collector's Guide to American Flyer "Tru-Model" Trains, 3/16" Scale "O" Gauge, 1939-1941 Jan 16 2022 Following responses from numerous discussions/arguments with (mostly older) "train guys" as to whether American Flyer trains had two or three rail track, it seemed some clarification was in order. It also appeared that, while the post-war "S" gauge two-rail period is quite well covered, there is very little information still in print on their immediate ancestors. The purpose of this little guide is to present, to the people who are unaware of their existence, the three-rail "Tru-Model" toy trains of the A. C. Gilbert Company, of New Haven CT, which were introduced at the 1939 New York World's Fair, and which were produced until the war-imposed shutdown of non-essential manufacturing, in July 1942. Dimensions and color schemes are provided, throughout the work. Wheel arrangements follow the Whyte system of course. Lengths given exclude couplers. Locomotive lengths given include the proper tender. At LEAST one large color photo is included for EACH distinct item, and EVERY set is illustrated in catalog format, in color! Captions are self-explanatory. All (220+) photographs were taken by the author, of specimens from his personal collection, unless specifically credited otherwise. While an attempt was made to show 'better-grade, collectible' specimens, the cars are representative of vintage TOYS, and are not intended to represent the pristine, mint-in-the-box, items available to only a very wealthy few. It should be noted that when Gilbert brought American Flyer in 1938 there was a substantial amount of salable (but non-scale) "Chicago" inventory on hand. Prior to that time, most toy trains, in general, were quite unrealistic in appearance, particularly car length. If you wanted more realism, you had but one choice - build from scratch! This guide does NOT cover ANY of that pre-1940 "Chicago Flyer" material! The 1939 American Flyer catalog first introduced the die-cast 3/16" scale equipment, but only in the four most expensive sets, with would become the two top-of-the-line locomotives. By 1940, the conversion to 3/16" scale (including the first pressed-steel cars) was well under way, but it was not until the 1941 catalog that ALL offerings were of Gilbert's new 3/16" scale design. The first post-war catalog (for 1946) does not list the very limited remaining stock of "O" gauge trains which was sold off as soon as possible so as to concentrate on the brand new - and more exciting - two-rail lineup. There is some intentional redundancy in the descriptions, since it is felt that many users are going to simply look in the index for "their" car(s), and I wanted them to be able to find everything in one place, without their having to crawl page by page. It should be noted that legitimate, factory produced, items are known with some feature(s) differing slightly from the "standard" versions of the items presented here. Money was saved wherever possible, and shortcuts were taken, particularly as to colors, and markings. Nothing was wasted - some cabooses were even made on tender frames! The most common off-beat example being that some cars will have two "American Flyer Lines" decals instead of the normal one, plus the car number. Paint shades may vary. It must be remembered that their intent was to produce operable toys, hopefully at a profit, for the enjoyment of (mostly) children, and they were not following any rigid rules to satisfy 'nit-picking' collectors in the then far-distant future. Within certain parameters almost anything is at least possible and, after 80 years, some repairs, repaints, etc. have themselves acquired the patina of genuine-ness and antiquity. The author takes full responsibility for the accuracy of any opinions regarding such specimens which may be stated in this work. The author welcomes input from fellow collectors having any corrections, or further information, regarding these trains, which may be incorporated into future editions of this work.
