Guide to Organisation Design Aug 19 2021 Business failure is not limited to start ups. Industry Watch (published by BDO Stoy Hayward, an accounting firm) 'predicts that 17,043 businesses will fail (in the UK) in 2006, a further 4 per cent increase from 2005'. In America between 1990 and 2000, there were over 6.3 million business start-ups and over 5.7 million business shut-downs. Risk of failure can be greatly reduced through effective organizational design that encourages high performance and adaptability to changing circumstances. Organization design is a straightforward business process but curiously managers rarely talk about it and even more rarely take steps to consciously design or redesign their business for success. This new Economist guide explores the five principles of effective organization design, which are that it must be: driven by the business strategy and the operating context (not by a new IT system, a new leader wanting to make an impact, or some

other non-business reason). involve holistic thinking about the organization be for the future rather than for now not to be undertaken lightly - it is resource intensive even when going well be seen as a fundamental process not a repair job. (Racing cars are designed and built. They are then kept in good repair.)

Anatomy of Orofacial Structures Dec 31 2019 This comprehensive introductory text is perfect for students studying dentistry at any level or scope, featuring coverage of dental anatomy and head and neck anatomy, as well as oral histology and embryology. The easy-to-understand text material is enhanced and supported with abundant, high quality illustrations. This edition combines the text with built-in workbook features that enhance and reinforce learning. Flashcards help students memorize and quickly recall vital facts. No other text of its kind offers a learning package this complete! This is one of the only dental anatomy texts that cover all areas of study (dental anatomy, oral histology and embryology, and head and neck anatomy), written at an appropriate level for all students studying the dental sciences. Over 550 excellent illustrations support the text, including simple, accurate, effective line drawings that clearly show what the text explains and make difficult subject matter easier for students to comprehend. Review questions at the end of each chapter provide an opportunity for students to evaluate their understanding of the chapter material and review areas of weakness. Multiple-choice tests at the end of each unit enable students to check their comprehension of related topics and evaluate areas of weakness. A comprehensive glossary of all key terms throughout the chapters is provided at the end of the book so students can easily look up the definition of a key term at any time. Objectives listed at the beginning of all chapters outline what students should know after completing the chapter. Suggested readings refer the reader to current and classic resources for further study. A perforated workbook section is incorporated into the text, offering questions that follow the format of the dental hygiene national exam and the dental assisting certification exam. Additional flashcards include illustrations on one side and succinct, critical information on the other that students can use to review and memorize key concepts. A new chapter on Root Morphology offers new coverage of a topic that is extremely important to anyone doing root planing and curettage, addressing: how shape, length, and surface area of roots affect displacement; pathology; other factor affecting the root; normal ranges of root variation; and how the tooth is affected by pressures and tension. Chapters have been reorganized to present the most frequently used information first, covering Dental Anatomy before Oral Histology and Embryology and Head and Neck Anatomy. About 75 additional line drawings, with a second color added for emphasis, depict labeled parts.

The Structure of Scientific Examination Questions Oct 01 2022 This book shows how Systemic Functional Linguistics may be used to explore and explain the grammar of scientific examination questions. The author outlines the key elements of this theory and identifies problematical structures that affect the linguistic validity of such education assessment questions. This book also shows how examination questions may provide insight into the relationship between teaching and language in science. Do candidates give an incorrect answer because they do not understand the topic or because they do not understand the language by which the question is framed? This book shows how the analysis of scientific examination questions can answer this question. These chapters show how contemporary linguistics can inform the assessment of science and address topics including: the role of images, lexicography, the morphology of sentences, semantic discontinuity and the active reader. An example question is used throughout the text to illustrate the theories and each chapter has its own useful summary, making it a very readable work.

Romance Languages and Linguistic Theory 2011 Nov 29 2019 In 2011, the annual conference series Going Romance celebrated its 25th edition in Utrecht, the founder city of the enterprise. Since its inception in the eighties of the last century, the local initiative has developed into the major European discussion forum for research focussing on the contribution of (one of the) Romance languages to general linguistic theorizing as well as on the working out of in-depth analyses of Romance data within linguistic frameworks. The annual meeting took place on December, 8-10. The present volume is the 5th of the series Romance Languages and Linguistic Theory published by John Benjamins. We publish here a selected set of peer-reviewed articles bearing on topics in phonology, morphology, syntax and semantics, that represent both issues of theoretical nature as well as developments in the field of acquisition. The articles are of great interest for specialists of Romance and for general linguists appreciating parameters and/or language acquisition. Among the contributions are three papers presented by invited speakers (Andrea Calabrese, Ricardo Etxepare and Jason Rothman), while two other very prominent Romance linguists figure as co-authors (Aafke Hulk, Luigi Rizzi).

Asking Questions Jun 16 2021 Asking Questions examines a central phenomenon of language - the use of sentences to ask questions. Although there is a sizable literature on the syntax and semantics of interrogatives, the logic of "questions", and the speech act of questioning, no one has tried to put the syntax and semantics together with the speech acts over the full range of phenomena we pretheoretically think of as asking questions. Robert Fiengo not only does this, but also takes up some more foundational issues in the theory of language. By positioning the findings of contemporary grammatical theorizing within the larger domain of language use, Fiengo challenges the use theorist to acknowledge the importance of grammatical form and the grammarian to acknowledge the importance of use. In addition to developing an Austinian distinction between four questioning speech-acts, and a proposal concerning the philosophy of language, Asking Questions contains a useful discussion of the type-token distinction and how use of language compares with use of other things. Fiengo also considers the nature of multiple questions, revealing what one must know to ask them, and what speech acts one may perform when asking them. Asking Questions advances our understanding of a wide range of issues in a number of important respects. Scholars and students of linguistics and philosophy will find plenty to interest them in this pioneering work.

Discourse-Related Features and Functional Projections Aug 31 2022 In this volume Silvio Cruschina uses a comparative analysis to determine the syntax of the functional projections associated with discourse-related features, and to account for the marked word orders found in Romance - particularly in the fronting phenomena. Several language-specific analyses of discourse-related phenomena have been proposed in the literature, including studies on the notions of topic and focus in Romance, but the lack of a uniform definition of these notions, together with different assumptions in relation to the triggering features, has led to the perception that the Romance languages show many distinct and heterogeneous properties with respect to dislocation and fronting constructions. This volume is intended to complement the existing literature by integrating recent work on the topic and by emphasizing original and unifying reflections that combine and coordinate diverse elements. Cruschina's investigations clarify fundamental notions such as topic, focus, and contrast, drawing on new data from Sicilian, Sardinian, and other Romance varieties.

Homo Interrogans May 16 2021 Emerging from the Brentano-Husserl tradition, this volume charts new ground in the conceptual discourse of questioning answering. Bruin address the "logic" of questions and argues, along phenomenological lines that internality has the structure of questioning and answering. Here, he breaks rank with the better known and more traditional speech-act, grammatical, semantic, and logical approaches to the study of questioning to explore question from a phenomenological perspective. Particular attention is given to the internal aspects of questions and answer and the question-answer relationship. The author goes beyond simply demonstrating that questioning is somehow basic to human existence to explore the mechanics of why this is so.

Data Structures Sep 19 2021 Data Structures: Abstraction and Design Using Java offers a coherent and well-balanced presentation of data structure implementation and data structure applications with a strong emphasis on problem solving and software design. Step-by-step, the authors introduce each new data structure as an abstract data type (ADT), explain its underlying theory and computational complexity, provide its specification in the form of a Java interface, and demonstrate its implementation as one or more Java classes. Case studies using the data structures covered in the chapter show complete and detailed solutions to real-world problems, while a variety of software design tools are discussed to help students "Think, then code." The book supplements its rigorous coverage of basic data structures and algorithms with chapters on sets and maps, balanced binary search trees, graphs, event-oriented programming, testing and debugging, and other key topics. Now available as an enhanced e-book, the fourth edition of Data Structures: Abstraction and Design Using Java enables students to measure their progress after completing each section through interactive questions, quick-check questions, and review questions.

Structure and Architecture Jan 24 2022 'Structure and Architecture' is an essential textbook for students and practitioners of architecture and structural engineering. MacDonald explains the basic principles of structure and describes the ranges of structure types in current use. Furthermore, the book links these topics directly with the activity of architectural design and criticism. An update of the first edition, 'Structure and Architecture 2ed' includes a revised opening chapter, and a new section that discusses prominent buildings constructed since the last edition was published in 1994. Angus MacDonald deals with structures holistically, relating detailed topics back to the whole structure and building. He aims to answer the questions: What are architectural structures? How does one define the difference between the structure of a building and all of the other components and elements of which it consists? What are the requirements of structures? What is involved in their design? An understanding of the concepts involved in answering these questions and an appreciation of how the structure of a building functions enhances the ability of an individual to appreciate its architectural quality. This book is unique in that it discusses the structural component of architectural design in the context of visual and stylistic issues.
