August Storm: The Soviet 1945 Strategic Offensive In Manchuria [Illustrated Edition] Mar 28 2022 [Includes 15 tables, 1 tables, 26 maps] In August 1945, only three months after the rumble of gunfire had subsided in Europe, Soviet armies launched massive attacks on Japanese forces in Manchuria. In a lightning campaign that lasted but ten days, Soviet forces ruptured Japanese defenses on a 4,000-kilometer front, paralyzed Japanese command and control, and plunged through 450 kilometers of forbidding terrain into the heartland of Manchuria. Effective Soviet cover and deception masked the scale of offensive preparations and produced strategic surprise. Imaginative tailoring of units to terrain, flexible combat formations, and bold maneuvers by armor-heavy, task-organized forward detachments and mobile groups produced operational and tactical surprise and, ultimately, rapid and total Soviet victory. For the Soviet Army, the Manchurian offensive was a true postgraduate combat exercise. The Soviets had to display all the operational and tactical techniques they had learned in four years of bitter fighting in the west. Though the offensive culminated an education, it also emerged as a clear case study of how a nation successfully begins a war in a race against the clock and not only against an enemy, but also against hindering terrain. Soviet military historians and theorists have recently focused on the Manchurian offensive, a theater case study characterized by deep mobile operations on a broad front designed to pre-empt and overcome defenses. Because these characteristics appear relevant to current theater operations, the Soviets study the more prominent operational and tactical techniques used in Manchuria in 1945. What is of obvious interest to the Soviet military professional should be of interest to the U.S. officer as well.

Union River Ironclad 1861 – 65 Apr 04 2020 At the start of the American Civil War, neither side had warships on the Mississippi River, which was a vital strategic artery. In what would prove the vital naval campaign of the war, both sides fought for control of the river. While the Confederates relied on field fortifications and small gunboats, the Union built a series of revolutionary river ironclads. First commissioned in January 1862, these ironclads spent the next two years battling for control of the Mississippi, fighting in a string of decisive engagements that altered the entire course of the war. This book explains how these vessels worked, how they were constructed, how they were manned and how they were fought.

The present volume is concerned with the tactical operations of the Third Army and its subordinate units. The story of command and decision in higher headquarters is told only when it has a direct bearing on the campaign in Lorraine. The logistics of this campaign likewise have been subordinated to the tactical narrative. The basic unit in the present narrative is the infantry or armored division. The story of the division has been told in terms of its regiments and battalions, but swerves on occasion to the company or the platoon, just as the operations themselves turned on the exploits of these smaller units. Attention has been focused throughout the volume on the combat formations actually in the line. It is hoped, however, that the reader will gain some impression of the vital combination of arms and services which in the long run bring the infantry and the tanks to victory.

Battle for the City of the Dead Jan 26 2022 In the spring and summer of 2004, Iraq was coming apart at the seams. Sectarian violence pitted Shiite against Sunni. American consul L. Paul Bremer had disbanded the Iraqi Army, placing disgruntled young men on the street without jobs or the prospect of getting one. Their anger developed into a full-blown insurgency fed by a relentless campaign by the clergy for jihad against the “ occupation force. ” In August, a Shiite cleric named Muqtada Al-Sadr called upon his thousands of armed followers, the Mahdi Militia, to resist the occupation. Fighting broke out in several locations, including the holy city of Najaf, the site of the largest Moslem cemetery in the world, and the Imam Ali Mosque. The U.S. forces fought in 120-degree heat through a tangle of crypts, mausoleums, and crumbling graves. The fight was brutal, pitting religious zealots against the highly motivated and disciplined U.S. Army and Marine Corps troops. It makes for a riveting account of Americans in battle.

Slow Burn Dec 01 2019 Police work is never routine; domestics, gang violence... flesh craving zombies!? For decades the Mexican drug cartels looked at the United States of America as a business partner. The cartels supplied the drugs, and the millions of American addicts supplied them with an endless amount of money. But when the War on Drugs heats up and the money alone is not enough, the cartels decided to up the ante. With the help of a ruthless Russian mercenary, they unleashed a lethal bio-weapon, initially conceived during the Cold War to quickly bring the West to her knees. Skillfully deployed, the virus initially worked as designed. What started as a slow burn soon spread at an exponential rate, decimating the host population. Finally powerful enough to conquer a stricken nation, the cartel stood ready to move in and enslave the surviving population. But unknown to their leaders, the virus had a small side effect. The infected victims refused to stay dead, and had an agenda all of their own. For two veteran police officers and their small group of friends, the first day of the outbreak starts out like any other. Random fights and car accidents keep them busy, that is until they are confronted with a new and unexpected enemy. Each one of them is forced to confront the unthinkable. Zombies were real, and craving the living with an insatiable appetite. Against the full specter of a society crumbling around them, and the dead stalking the living in the streets, it will take all of their skill, knowledge and courage to survive. They see terrifying news broadcasts and learn of hastily constructed refugee camps and an overmatched military stretched to the limit. Yet, amongst all of this, they still face enemies among the living as well. Armed gangs free to roam the streets. Powerful men who want to play politics with peoples lives, and wolves in sheeps clothing. Together, the group faces an uncertain future as they struggle against relentless enemies, living and dead, in a devastated America.

In the course of this campaign, the 4th Armored Division practiced a mode of warfare that has since become known to the Army as AirLand Battle. In as much as the encirclement of Nancy is one of the few historical examples that shows American mechanized forces waging war in accordance with the tenets of AirLand Battle, anyone seeking a deeper appreciation of today's doctrine would do well to study this campaign carefully. The 4th Armored Division in the Encirclement of Nancy originated at the U.S. Army Command and General Staff College as an introductory class for a course on modern division level operations. It is a companion piece to *The Lorraine Campaign: An Overview*, September-December 1944, published in February 1985.

Breaking The Mold: Tanks In The Cities [Illustrated Edition] Aug 01 2022 Illustrated with 30 maps. Few lessons are as prevalent in military history as is the adage that tanks don't perform well in cities. The notion of deliberately committing tanks to urban combat is anathema to most. In *Breaking the Mold: Tanks in the Cities*, Mr. Ken Gott disproves that notion with a timely series of five case studies from World War II to the present war in Iraq. This is not a parochial or triumphant study. These cases demonstrate that tanks must do

more than merely “ arrive ” on the battlefield to be successful in urban combat. From Aachen in 1944 to Fallujah in 2004, the absolute need for specialized training and the use of combined arms at the lowest tactical levels are two of the most salient lessons that emerge from this study. When properly employed, well-trained and well-supported units led by tanks are decisive in urban combat. The reverse is also true. Chechen rebels taught the Russian army and the world a brutal lesson in Grozny about what happens when armored units are poorly led, poorly trained, and cavalierly employed in a city. The case studies in this monograph are high-intensity battles in conflicts ranging from limited interventions to major combat operations. It would be wrong to use them to argue for the use of tanks in every urban situation. As the intensity of the operation decreases, the second and third order effects of using tanks in cities can begin to outweigh their utility. The damage to infrastructure caused by their sheer weight and size is just one example of what can make tanks unsuitable for every mission. Even during peace operations, however, the ability to employ tanks and other heavy armored vehicles quickly can be crucial. A study on the utility of tanks in peace operations is warranted, and planned.- Timothy R. Reese Colonel, Armor

Vietnam Studies - Mounted Combat In Vietnam [Illustrated Edition] May 18 2021 [Includes 1 chart, 17 maps, 6 diagrams and 38 illustrations] “ The generally unsuccessful experience of French armored forces in Southeast Asia from the end of World War II to 1954 convinced American military men that armored units could not be employed in Vietnam. “ It was not until 1967, however, when a study titled Mechanized and Armor Combat Operations, Vietnam...was sent to the Chief of Staff and Secretary of the Army, that the potential of armored forces was fully described to the Army ’ s top leaders. Despite the study ’ s findings that armored cavalry was probably the most cost-effective force on the Vietnam battlefield-there was little that could be done to alter significantly either the structure of forces already sent to Vietnam or those earmarked for deployment...The armored force of the Army of the Republic of Vietnam, meanwhile had been successful enough in fighting the elusive Viet Cong that U.S. armored units had been deployed in limited numbers, usually as part of their parent divisions. “ From early March 1965 until the cease-fire in Jan. 1973, U.S. armored units participated in virtually every large-scale offensive operation and worked closely with South Vietnamese Army and other free world forces. After eight years of fighting over land on which tanks were once thought to be incapable of moving, in weather that was supposed to prohibit armored operations, and dealing with an elusive enemy against whom armored units were thought to be at a considerable disadvantage, armored forces emerged as powerful, flexible, and essential battle forces. In large measure they contributed to the success of the free world forces, not only in close combat, but in pacification and security operations as well. When redeployment began in early 1969, armored units were not included in the first forces scheduled for redeployment, and indeed planners moved armored units down the scale time and again, holding off their redeployment until the very end. ”

City Fights Feb 24 2022 “ Urban terrain will likely be the predominant battlefield of future wars. ” As September 11 and Somalia proved, hostile forces are now engaging America differently, avoiding open combat with our enormous military, striking at our civic centers or dragging us into theirs. But urban warfare isn ’ t new; it is as old as the battle of Jericho. Now an incomparable collection written by esteemed military veterans—some currently serving, others civilian analysts—re-creates the last century ’ s most astonishing examples of this kind of fighting . . . and offers important lessons for our future. Here are fourteen riveting histories that are both invaluable teaching tools for security leaders and engrossing accounts for any reader. They include • William M. Waddell ’ s “ Tai-Erh-Chuang, 1938: The Japanese Juggernaut Smashed ” —How China defeated the Japanese in battle for the first time in three hundred and forty years, by using a city only as a pivot area and attacking the exposed flank and rear ranks of its unprepared enemy. • Eric M. Walters ’ s “ Stalingrad, 1942: With Will, a Weapon, and a Watch ” —The largest and longest-running urban fight of the twentieth century, in which the Red Army became the tortoise to the Germans ’ hare, out-lasting its stronger foe. • Norm Cooling ’ s “ Hue City, 1968: Winning a Battle While Losing a War ” —The six-day fight for the cultural center of Vietnam revealed how the American military ’ s distrust of the media made it fail to expose the enemy ’ s mass executions and lose the all-important information war.
