Public Sentinels Mar 17 2021 In recent years, controversy has surrounded the role of top government lawyers in the United States and the United Kingdom. Allegations of bad lawyering and bad ethics in public office over the 'torture memos' in the United States and the political pressure placed on the Attorney-General in the United Kingdom

to approve the legality of the Iraq war, have seen these relatively obscure group of government lawyers thrust into the public debate. Unlike its Anglo-American contemporaries, Australia's chief legal adviser, the Solicitor-General, has remained largely out of the public eye. This collection provides a rare and overdue insight into a fundamental public institution in all Australian jurisdictions. It provides a historical, theoretical, practical and comparative perspective of this little known, but vitally important, office at a time when the transparency and accountability of government has taken on an increased significance. Of interest to anyone interested in the integrity of government, the book will be particularly useful to government, political parties and the academy. It will also be a valuable reference work to those working towards a redefinition of the role of top government legal advisors.

Essentials of Middle and Secondary Social Studies Jul 01 2022 Building on the success of the previous editions, Essentials of Middle and Secondary Social Studies Third Edition focuses on the key issues central to the teaching of middle and high school social studies, including lesson planning and instructional strategies. Written in an engaging, conversational style, the text encourages teachers in their development as professionals and enables them to effectively use creative and active learning strategies in the everyday classroom. New to This Edition This third edition has been refined with new and relevant topics and strategies needed for effectively teaching middle and high school social studies. New features include: An expanded chapter on the decision-making process in secondary social studies. This chapter provides additional discussion about the importance of helping middle and high school learners better understand the decision-making process and offers strategies for helping teachers make connections between choices, values, character development, and social justice. An updated chapter on technology designed to better prepare secondary social studies teachers to effectively incorporate technology into their instruction. Focus is given to virtual teaching and learning, media literacy, teaching with film, and numerous other ways to improve teaching and learning in the digital age. Updated further readings and helpful resources for all chapters to include supplemental digital and video sources related to various topics throughout the chapter. These resources were specifically curated to be impactful for preservice and in-service teachers, as well as anyone teaching secondary social studies methods courses. Added a "Checking for Understanding" section of questions at the end of each chapter that focuses on comprehension, application, and reflection on key concepts throughout the chapters. An expanded discussion of the Common Core Standards and C3 Framework and how it impacts teachers. An updated chapter titled "Experiencing Social Studies". This chapter focus on topics such as teaching with drama, role play, field trips, and service learning. Each chapter includes a "Helpful Resources" section that details various websites and online resources for further discovery.

Pakistan Apr 17 2021 This Report on the Observance of Standards and Codes (ROSC) provides a review of Pakistan's data dissemination practices against the IMF's General Data Dissemination System (GDDS), complemented by an in-depth assessment of the quality of the national

accounts, consumer and wholesale price indices, and government finance, monetary, and balance-of-payments statistics. Pakistani authorities are strongly committed to adhering to internationally accepted standards and good practices, as demonstrated by their recent participation in the GDDS. Nevertheless, the mission identified shortcomings in some statistical practices and databases.

Developments in Engineering Geology Sep 22 2021 Developments in Engineering Geology is a showcase of the diversity in the science and practice of engineering geology. All branches of geology are applicable to solving engineering problems and this presents a wide frontier of scientific opportunity to engineering geology. In practice, diversity represents a different set of challenges with the distinctive character of the profession derived from the crossover between the disciplines of geology and engineering. This book emphasizes the importance of understanding the geological science behind the engineering behaviour of a soil or rock. It also highlights a continuing expansion in the practice areas of engineering geology and illustrates how this is opening new frontiers to the profession thereby introducing new knowledge and technology across a range of applications. This is initiating an evolution in the way geology is modelled in engineering, geohazard and environmental studies in modern and traditional areas of engineering geology.

Political Theory of Armed Groups Feb 25 2022 This Brief provides a comprehensive introduction to current research on armed groups and proposes a unitary political theory for their future analysis. Traditionally, theoretical and historical approaches to armed groups have focused on different categories of armed groups—insurgents, radical groups, militias, governmental forces—instead of treating them as unitary actors in international politics. This Brief departs from this traditional theoretical treatment, arguing that armed groups are fundamental units of politics, outside of class, gender, and the state, and should be analyzed as such. The book begins with a discussion of current classifications and definitions of armed groups as well as methodological approaches towards studying them. Chapter Two discusses armed groups from a historical and anthropological perspective. Chapter Three presents a critical analysis and interpretation of existing political perspectives on armed groups. The book concludes by introducing the new theory. Challenging traditional methods of political theory and analysis while providing a solid introduction to the field, this Brief will be of use to researchers and scholars in political theory, international relations, political science, and anthropology, as well as to professionals in fields such as policing, counter-terrorism, and internal affairs.

Role of the Solicitor-General Apr 05 2020 Behind every government there is an impressive team of hard-working lawyers. In Australia, the Solicitor-General leads that team. A former Attorney-General once said, 'The Solicitor-General is next to the High Court and God.' And yet the role of government lawyers in Australia, and specifically the Solicitor-General as the most senior of government lawyers, is under-theorised and under-studied. The Role of the Solicitor-General: Negotiating Law, Politics and the Public Interest goes behind the scenes of government – drawing from interviews with over 45 government and judicial officials – to uncover the history, theory and practice of the Australian Solicitor-General. The analysis reveals a role that is of fundamental constitutional importance to ensuring both the legality and the integrity of government action, thus contributing to the achievement of rule-of-law ideals. The Solicitor-General also works to defend government action and prosecute government policies in the court, and thus performs an important role as messenger between the political and judicial branches of government. But the Solicitor-General's position, as both an internal integrity check on government and an external warrior for government, gives rise to competing pressures: between the law, politics and the public interest. The office of the Solicitor-General in Australia has evolved many characteristics across the almost two centuries of its history in an attempt to navigate these tensions. These pressures are not unique to the Australian context. The understanding of the Australian position provided by this book is informed by, and will inform, comparative analysis of the role of government lawyers across the world.

Women and Cartography in the Progressive Era May 19 2021 In the twenty-first century we speak of a geospatial revolution, but over one hundred years ago another mapping revolution was in motion. Women's lives were in motion: they were playing a greater role in public on a variety of fronts. As women became more mobile (physically, socially, politically), they used and created geographic knowledge and maps. The maps created by American women were in motion too: created, shared, distributed as they worked to transform their landscapes. Long overlooked, this women's work represents maps and mapping that today we would term community or participatory mapping, critical cartography and public geography. These historic examples of women-generated mapping represent the adoption of cartography and geography as part of women's work. While cartography and map use are not new, the adoption and application of this technology and form of communication in women's work and in multiple examples in the context of their social work, is unprecedented. This study explores the implications of women's use of this technology in creating and presenting information and knowledge and wielding it to their own ends. This pioneering and original book will be essential reading for those working in Geography, Gender Studies, Women's Studies, Politics and History.

NATO in Contemporary Times Sep 30 2019 Powerful and compelling. One of the worlds most prolific writers on military intelligence and U.S. public administration has woven together a concise and commanding book on NATO and its continued relevance in peace keeping and global security. A must read. Lorenda Naylor, PH.D., Associate Professor and Schaefer Center Faculty Fellow, College of Public Affairs, University of Baltimore, USA If you think NATO is a Cold War relic, this book will convince you of the contrary. History's longest lasting defense alliance will continue to play an important role in the XXI century. Utilizing recent information, the author explains how NATO has repeatedly risen to the occasion to address conflicts in Europe, North Africa, and the Middle East. It is also a critical approach that identifies and explains its shortcomings and new challenges. Javier Aguayo, PH.D., Assistant Professor of Political Science, York College of Pennsylvania, USA This book builds on the six years of hands-on experience that the author had while working in the North Atlantic Treaty Organization. It provides an overview and history of NATO, looks at the political and military components of the Alliance, as well as the military command from the perspective of real-world contemporary NATO operations and planning. The author also looks at the military training, lessons, and exercise components and how it prepares forces to support upcoming NATO

Response Force (NRF) rotations to ensure that NATO is a viable threat deterrent and responsive organization to both Article 5 and non-Article 5 operations. This book will serve as a primer into the worlds longest enduring Alliance and one that has made an impact on real world operations over the last 20 years in Europe (Bosnia and Kosovo), Africa (Libya), Asia (Afghanistan and Pakistan), and the Middle East (Iraq). John Michael Weaver, DPA (University of Baltimore), is Associate Professor of Intelligence Analysis, York College of Pennsylvania (USA), a retired lieutenant colonel from the US Army, and a retired civilian from the Intelligence Community of the US.

Towards an Emissions Trading System in Mexico: Rationale, Design and Connections with the Global Climate Agenda Jun 07 2020 This Open Access book provides detailed information about the incoming Mexican Emissions Trading System, including an analysis on why the system was implemented, how the system was designed, how it operates, how it could work, and how it could be strengthened by 2023 when it will be formally launched. This document is aimed at those who want to understand how an ETS can operate in an emerging economy. Although it has been written for experts and non-experts, this book does not provide the underlying theory of market-based instruments and emissions trading systems in general. The book can be read from start to finish, but can also be used as a reference for specific components of regional ETSs. The book draws upon a meticulous study of background documents and fieldwork from different authors to tell the story of how a Mexican ETS, the first of its kind in Latin America, can be set in the country. The emissions trading system cover many greenhouse gas emissions and has been hailed as one of the cornerstones of the Mexican climate policy. The book also examines and explains how the ETS is designed and implemented.

Imprudent King Jul 09 2020 Philip II is not only the most famous king in Spanish history, but one of the most famous monarchs in English history: the man who married Mary Tudor and later launched the Spanish Armada against her sister Elizabeth I. This compelling biography of the most powerful European monarch of his day begins with his conception (1526) and ends with his ascent to Paradise (1603), two occurrences surprisingly well documented by contemporaries. Eminent historian Geoffrey Parker draws on four decades of research on Philip as well as a recent, extraordinary archival discovery—a trove of 3,000 documents in the vaults of the Hispanic Society of America in New York City, unread since crossing Philip's own desk more than four centuries ago. Many of them change significantly what we know about the king. The book examines Philip's long apprenticeship; his three principal interests (work, play, and religion); and the major political, military, and personal challenges he faced during his long reign. Parker offers fresh insights into the causes of Philip's leadership failures: was his empire simply too big to manage, or would a monarch with different talents and temperament have fared better?

New Scientist May 07 2020 New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.

The Intimidation Game Nov 24 2021 From Kim Strassel-one of the preeminent political columnists writing today and member of the Wall Street Journal editorial board-comes an insightful, alarming look at how the Left, once the champion of civil liberties, is today orchestrating a coordinated campaign to bully Americans out of free speech. For nearly 40 years, Washington and much of the American public have held up disclosure and campaign finance laws as ideals, and the path to cleaner and freer elections. This book will show, through first-hand accounts, how both have been hijacked by the Left as weapons against free speech and free association, becoming the most powerful tools of those intent on silencing their political opposition. THE INTIMIDATION GAME provides a chilling expose of political scare tactics and overreach, including: How Citizens United set off a wave of liberal harassment against conservative politicians The targeting of Tea Party groups by the IRS How Wisconsin prosecutors, state AGs, and a Democratic Congress shut down political activists and businesses The politicization by the Obama administration of a host of government agencies including the FEC, FCC and the SEC THE INTIMIDATION GAME will shine a much-needed light on how

liberal governance and the Democratic machine bullies the political process.

Civic Discipline Jan 27 2022 The American Geographical Society was the pre-eminent geographical society in the nineteenth-century U.S. This book explores how geographical knowledge and practices took shape as a civic enterprise, under the leadership of Charles P. Daly, AGS president for 35 years (1864-1899). The ideals and programmatic interests of the AGS link to broad institutional, societal, and spatial contexts that drove interest in geography itself in the post-Civil War period, and also link to Charles Daly's personal role as New York civic leader, scholar, revered New York judge, and especially, popularizer of geography. Daly's leadership in a number of civic and social reform causes resonated closely with his work as geographer, such as his influence in tenement housing and street sanitation reform in New York City. Others of his projects served commercial interests, including in American railroad development and colonization of the African Congo. Daly was also New York's most influential access point to the Arctic in the latter nineteenth century. Through telling the story of the nineteenth-century AGS and Charles Daly, this book provides a critical appraisal of the role of particular actors, institutions, and practices involved in the development and promotion of geography in the mid-nineteenth century U.S. that is long overdue.
